**Global International Relations in Southeast Asia** Chanintira na Thalang, Yong-Soo Eun, 2024-08-02 This edited volume explores the contours of Global International Relations IR in terms of teaching and research in Southeast Asia and China with the purpose of revealing existing and hidden pre theories conceptual frameworks and theoretical contributions to Global IR rooted in local histories contemporary experiences and indigenous thought The exploration is conducted within a context where scholars across regions are progressively taking strides to reshape IR which has long gravitated towards Western experiences thought and knowledge into a more inclusive discipline Otherwise known as the Global IR project these efforts aim not only to amplify marginalized voices and experiences but also introduce new conceptual and theoretical tools derived from a diverse range of experiences While some of these insights provide new understandings others offer useful implications that transcend national and regional boundaries fostering crossregional discussions about the diverse realities within our world An essential read for scholars and students of IR with an interest in

Global IR IR theory in general and the development of IR in parts of Southeast Asia      Human and Global Security Peter John Stoett, 1999-01-01 Discusses four principal security threats state violence environmental degradation population displacement and globalization and shows that any meaningful interpretation must include both a narrow legal definition and a broader global perspective      Global Studies Tuo Cai, Zhenye Liu, 2020-06-07 Since the 1950s globalization has been an increasingly irresistible trend and one that has exerted a tremendous impact on the political economic military environmental and social fortunes of mankind and yet existing theories in humanities and social sciences have been fundamentally built upon the traditional nation state model These two volumes a pioneering work on global studies to be published out of China aim at creating a new theoretical framework against the backdrop of globalization This volume discusses globalization on the supranational level The editors reveal the complexity of global studies by examining the multi level and multi dimensional nature of globalization analyzing processes and systems of global society against the backdrop of globalization and exploring the construction of a stable and rational global order These two volumes are an essential reference for scholars and students in politics economics international relations and law      *Global Order* Lynn H. Miller, 1990      *Peacemaking and International Order after the First World War* Peter Jackson, William Mulligan, Glenda Sluga, 2023-06 This volume reinterprets the peace settlements after 1918 as a site of remarkable innovations in the making of international order      Introduction to International Relations and Global Politics Sorensen,      **The Oxford Handbook of Governance** David Levi-Faur, 2012-03-29 This Oxford Handbook will be the definitive study of governance for years to come Governance has become one of the most popular terms in contemporary political science this Handbook explores the full range of meaning and application of the concept and its use in a number of research fields      *Regional Orders and Regional Powers* Nadine Godehardt, Dirk Nabers, 2011 Annotation Regional Powers and Regional Orders presents a re examination and re conceptualization of the concept of region and its function within power and order systems Utilising a comparative and case study approach the volume examines new regional powers such as Brazil China India Russia and South Africa These territories as regional powers are novel phenomenon in the field of international politics and even more so in the field of international relations The book focuses on the emerging role of these new regional powers within their respective region and asks how other members of these regions cope with and react to that role Regional Powers and Regional Orders will be of interest to students and scholars of international and regional politics and power and international relations      The China-India Rivalry in the Globalization Era T.V. Paul, 2018-09-03 As the aspirations of the two rising Asian powers collide the China India rivalry is likely to shape twenty first century international politics in the region and far beyond This volume by T V Paul and an international group of leading scholars examines whether the rivalry between the two countries that began in the 1950s will intensify or dissipate in the twenty first century The China India relationship is important to analyze because past experience has shown that when two rising great powers share a border the relationship is volatile and potentially

dangerous India and China's relationship faces a number of challenges including multiple border disputes that periodically flare up division over the status of Tibet and the Dalai Lama the strategic challenge to India posed by China's close relationship with Pakistan the Chinese navy's greater presence in the Indian Ocean and the two states competition for natural resources Despite these irritants however both countries agree on issues such as global financial reforms and climate change and have much to gain from increasing trade and investment so there are reasons for optimism as well as pessimism The contributors to this volume answer the following questions What explains the peculiar contours of this rivalry What influence does accelerated globalization especially increased trade and investment have on this rivalry What impact do US China competition and China's expanding navy have on this rivalry Under what conditions will it escalate or end The China India Rivalry in the Globalization Era will be of great interest to students scholars and policymakers concerned with Indian and Chinese foreign policy and Asian security

**Making War on the World** Mark Shirk, 2022-03-01 The state bounds politics it constructs and enforces boundaries that separate what it controls from what lies outside its domain However states face a variety of threats that cross and challenge their geographical and conceptual boundaries Transnational violent actors that transcend these boundaries also defy the state's claims to political authority and legitimacy Mark Shirk examines historical and contemporary state responses to transnational violence to develop a new account of the making of global orders He considers a series of crises that plagued the state system in different eras golden age piracy in the eighteenth century anarchist propagandists of the deed at the turn of the twentieth and al Qaeda in recent years Shirk argues that states redraw conceptual boundaries such as between international and domestic to make sense of and defeat transnational threats In response to forms of political violence that challenged boundaries states developed creative responses that included new forms of control surveillance and rights As a result these responses gradually made and transformed the state and global order Shirk draws on extensive archival research and interviews with policy makers and experts and he explores the implications for understandings of state formation Combining rich detail and theoretical insight **Making War on the World** reveals the role of pirates anarchists and terrorists in shaping global order

**A Small State's Guide to Influence in World Politics** Tom Long, Thomas Stephen Long, 2022 A complete guide for how small states can be strikingly successful and influential if they assess their situations and adapt their strategies Small states are crucial actors in world politics Yet they have been relegated to a second tier of International Relations scholarship In **A Small State's Guide to Influence in World Politics** Tom Long shows how small states can identify opportunities and shape effective strategies to achieve their foreign policy goals To do so Long puts small states relationships at the center of his approach Although small states are defined by their position as materially weaker actors vis a vis large states Long argues that this condition does not condemn them to impotence or irrelevance Drawing on typological theory Long builds an explanation of when and how small states might achieve their goals The book assesses a global range of cases both successes and failures and offers a set of tools for scholars

and policymakers to understand how varying international conditions shape small states opportunities for influence

**(Un)avoidable Conflict in Ukraine** Cristian Nitoiu, 2025-06-26 Taking a conceptual approach to European Russian relations in the post Cold War era this book traces how each side's ideal self came into conflict with fault lines in international politics Russia's 2022 full scale invasion of Ukraine is not only a symptom of conflict taking over the European continent but also a point of no return that will be difficult to roll back Could the state of conflict on the European continent have been avoided To understand the nature and evolution of conflict with Russia this book presents a theoretically informed discussion of the way relations between the European Union EU and Russia deteriorated beyond repair during the more than three decades since the collapse of the Soviet Union First the book develops the concept of ideal self of states and international organisations like the EU which posits that a series of ideal perceptions about how the self should act in the world order drives the behaviour of states and their policymakers Second the book turns to the study of fault lines or spaces of divergence in the world order that harbour the potential for conflict With these two theoretical toolkits the book shows how leaders in the EU and Russia by February 2022 came to view conflict as a feasible preferable and possibly the only option available to them Even though neither the EU nor Russia had desired conflict both made little effort to avoid it As a result the European continent has sleepwalked into conflict with the potential for that conflict to spill over from Europe and escalate beyond a point of no return between the West and its global challengers **Dangerous Peace** Alpo M

Rusi, 2021-11-28 Alpo Rusi provides a broad vision of the strategic landscape for the coming century warning against dangers inherent in the emerging world order He predicts a more complex and potentially hostile multipolar system based on four or five rival trading blocs Despite the centrality of trade rivalries the role of military force will not vanish Although he considers superpower conflict unlikely he expects that lower level conflicts will become more prevalent Consequently Rusi believes that the trading blocs will have to actively pursue security arrangements that will safeguard the traditional role of the nation state Examining the international system from a geopolitical and geoeconomic perspective Alpo Rusi provides a broad vision and bold forecast of the emerging strategic landscape for the coming century An asymmetrical world system is emerging The United States is now the sole true world power it forms the core of a unipolar order characterized by an uneven division of world power and economic resources Rusi argues however that this post Cold War order will not survive into the next century Rusi suggests that the power vacuum in the former Soviet empire will be filled by China in Asia and by the European Union in Eastern Europe Russia's disintegration and decline in world power status will continue but may have reached its bottom line economically and Islam will gain strength in various parts of the world embracing a new international role He also predicts that the world will be split into four or five distinct trading blocs A European bloc formed around the European Union an East Asian bloc potentially strong interventionist and even aggressive formed around China and the Singapore economic region Japan as a strong and still competitive economic power and a Pan American bloc also strong but potentially

isolationist formed around the United States One of the question marks will be the future ability of an orthodox Russia to facilitate conditions for an economic space According to Rusi these trading blocs will develop new political or geopolitical interests For example the European bloc will extract fossil fuels from the former Soviet Union instead of the Middle East thereby changing the existing global trade system Each bloc will have certain internal problems the Europeans will be linked to the unstable successors to the Soviet Union the East Asian Bloc will have to contemplate whether Chinas economic growth and geopolitical expansions will create a new bipolar world in the early twenty first century and the Pan American bloc will struggle with continuing political and economic instability in South and Central America Finally Rusi warns that it is crucial for the European and Pan American blocs to build upon the traditional Euro Atlantic relationship Without it he argues a truly polarized and potentially hostile bloc system will take root most likely lining the Western pan regions against Chinas expansiveness

Doing Political Science and International Relations Heather Savigny, Lee Marsden, 2011-05-24 This is an ideal introduction for all embarking on a degree in Politics or International Relations Starting from the premise that the doing of political science is an active and interactive process of critical evaluation it addresses the crucial question of how as well as what we should study The book examines a wide range of theoretical perspectives and shows how they can be usefully applied to questions such as Why do states go to war and In whose interests does the political system work Chapters are organized by core areas of study such as power the state policy institutions the media security political economy and show how theories can be used and applied within each topic
