**International Fiscal-financial Spillovers: The Effect of Fiscal Shocks on Cross-border Bank Lending** Sangyup Choi, Davide Furceri, Chansik Yoon, 2019-07-12 This paper sheds new light on the degree of international fiscal financial spillovers by investigating the effect of domestic fiscal policies on cross border bank lending By estimating the dynamic response of U S cross border bank lending towards the 45 recipient countries to exogenous domestic fiscal shocks both measured by spending and revenue between 1990Q1 and 2012Q4 we find that expansionary domestic fiscal shocks lead to a statistically significant increase in cross border bank lending The magnitude of the effect is also economically significant the effect of 1 percent of GDP increase decrease in spending revenue is comparable to an exogenous decline in the federal funds rate We also find that fiscal shocks tend to have larger effects during periods of recessions than expansions in the source country and that the adverse effect of a fiscal consolidation is larger than the positive effect of the same size of a fiscal expansion In contrast we do not find systematic and statistically significant differences in the spillover effects across recipient countries depending on their exchange rate regime although capital controls seem to play some moderating role The extension of the analysis to a panel of 16 small open economies confirms the finding from the U S economy **A**

S. Monetary Policy Shocks: Dutch Disease and Capital Flow Measures in Emerging Markets and Developing Economies** Juan Yepez, 2021-08-06 Dutch disease is often referred as a situation in which large and sustained foreign currency inflows lead to a contraction of the tradable sector by giving rise to a real appreciation of the home currency This paper documents that this syndrome has been witnessed by many emerging markets and developing economies EMDEs as a result of surges in capital inflows driven by accommodative U S monetary policy In a sample of 25 EMDEs from 2000 17 U S monetary policy shocks coincided with episodes of currency appreciation and a contraction in tradable output in these economies The paper also shows empirically that the use of capital flow measures CFMs has been a common policy response in several EMDEs to U S monetary policy shocks Against this background the paper presents a two sector small open economy augmented with a learning by doing LBD mechanism in the tradable sector to rationalize these empirical findings A welfare analysis provides a rationale for the use of CFMs as a second best policy when agents do not internalize the LBD externality of costly resource misallocation as a result of greater capital inflows However the adequate calibration of CFMs and the quantification of the LBD externality represent important implementation challenges Fifty Years After Bretton Woods Mr. James M. Nguyen, 2024-09-27 Fiscal policy uncertainty FPU ambiguity in government spending and tax plans as well as in public debt valuation is widely regarded as a source of economic and financial disruptions However assessing its impact has so far been limited to a few large economies In this paper we construct a novel database of news based fiscal policy uncertainty for 189 countries Importantly we track fiscal uncertainty events that generate global attention that we refer to as the global fiscal policy uncertainty This uncertainty has contractionary effects reducing industrial production in both advanced and emerging market economies with impacts greater than country specific fiscal policy uncertainty Additionally global fiscal policy uncertainty raises sovereign borrowing costs and generates synchronous movements in the global financial variables even after accounting for US monetary policy shocks
