Global Resurgence Of Religion And The Transformation Of International Relations:

The Global Resurgence of Religion and the Transformation of International Relations S. Thomas, 2005-10-03 This book is about the global resurgence of culture and religion in international relations and how these social changes are transforming our understanding of International Relation theory and the key policy related issue areas in world politics It is evident in the on going debates over the root causes of 9 11 that there are many scholars journalists and members of the public who still believe culture and religion can be explained away by appeals to more basic economic social or political forces in society Therefore The Global Resurgence of Religion and the Transformation of International Relations presents an argument for taking culture and particularly religion as social forces that are important for understanding world politics in the post Westphalian era

Religious NGOs in International Relations Karsten Lehmann, 2016-01-29 Over the last 30 years non governmental

organizations NGOs have become increasingly present in international discourses and active in international decision making Among the estimated several million NGOs in existence today an increasingly visible number of organizations are defining themselves in religious terms referring to themselves as religious spiritual or faith based NGOs This book documents the initial encounters between the particularly international segment of those organizations and the UN while at the same time covering the Protestant and Catholic spectrum that dominated the early years of their activities in the UN context This book focuses on the construction of the human rights discourse inside two religiously affiliated organizations The Commissions of the Churches on International Affairs CCIA and Pax Romana IMCS ICMICA These organizations have been formally accredited as NGOs by the UN label themselves as religious and look back upon a long and intense cooperation with the UN Lehmann presents material from the archives of those two organizations that has so far rarely been used for academic analysis In doing so as well as documenting the encounters between those organizations and the UN and looking at the Protestant and Catholic spectrum the book provides new insights into the very construction of the notions of the religious and the secular inside those organizations This work will be of great interest to all students of religion and international relations and will also be of interest to those studying related subjects such as global institutions comparative politics and international politics

An Introduction to International Relations and Religion Jeffrey Haynes, 2014-04-23 Not so very long ago it seemed reasonable to assert that the influence of religion on global politics was on the wane As the Western world became increasingly secular and the process of globalisation deepened it seemed inevitable on the surface at least that the voice of religion was to be heard softly if it was to be heard at all This has now changed and changed perhaps irrevocably As Jeff Haynes argues in this thought provoking and important new book various religious actors are now significantly involved in international relations and have become a crucial influence on policy in a post Westphalian world International Relations and Religion guides the reader through the complex issues at the heart of this topic with clarity and insight This updated second edition starts with a close reading of the many theoretical and analytical concepts notably Huntington and the clash of civilisations that have grown up around this area and then concludes with a summary of the issues under discussion and attempts to put into context what it means to live in a world that is increasingly shaped by a whole host of diverse religious groups Essential reading for students of International Relations and Politics

such as Islamic feminism that seek to build a more inclusive global economy Religions and their ideas should be seen as a constitutive part of neoliberal globalization and its contestation in IPE

Religion in International Relations Theory Nukhet Sandal, Jonathan Fox, 2013-06-19 There is a growing realization among international relations scholars and practitioners that religion is a critical factor in global politics The Iranian Revolution the September 11 attacks the ethno religious conflicts such as the ones in the former Yugoslavia and Sri Lanka are among the many reasons for this increased focus on religion in international affairs The rise of religious political parties across the world ranging from the Christian Democrats in Europe to Bharatiya Janata Party in India similarly illustrated religion's heightened international profile Despite all this attention it is challenging to situate religion within a discipline which has been dominantly secular from its inception Only a few existent works have ventured to integrate religion into core international relations theories such as Classical Realism Neorealism Neoliberalism Constructivism and the English school This work is the first systematic attempt to comparatively assess the place of religion in the aforementioned theoretical strands of international relations with contemporary examples from around the world Written in an accessible and systematic fashion this book will be an important addition to the fields of both religion and international relations Nukhet A Sandal is Assistant Professor in the Political Science Department at Ohio University Jonathan Fox is Professor in the Department of Political Studies at Bar Ilan University Israel

Faith and Politics in South Asia Astha Chadha, 2024-11-18 This book explores the role of faith and politics in shaping the international relations of South Asia Adopting a neo classical realist framework and a discourse historical approach to analyze how religious actors construct their political identities and interests through the interpretation of sacred texts or exegesis the book makes several key contributions to the field of international relations It introduces the concept of exegesis as a novel analytical tool to understand the role of religion in world politics The book argues that exegesis is not only a theological exercise but also a political one as it shapes the worldviews values norms and interests of religious actors The author applies exegesis to three case studies of South Asia the partition of India and Pakistan the rise of Hindu nationalism in India and the emergence of Islamic radicalism in Pakistan and resurging signs of the same in Bangladesh The research then challenges the conventional assumptions of IR such as the secularization thesis the clash of civilizations and the rational actor model by showing how religious actors are not monolithic homogeneous or irrational but rather diverse heterogeneous and strategic The book offers a nuanced and comprehensive understanding of the role of religion in world politics especially in the context of South Asia
