**World Economic and Financial Surveys** International Monetary Fund, 1988-01-01 This paper assesses recent trends in international capital markets It reviews in particular the forces currently reshaping the markets of industrial countries and confronting financial institutions with major challenges For the international capital markets 1988 was generally a year of recovery The international securities markets depressed during the second and third quarters of 1987 and badly shaken by the October market break rebounded in 1988 Intensifying competition and changing regulatory requirements characterize contemporary financial markets Competition has been fostered by the internationalization of institutions the liberalization of domestic markets technological advances in data processing and telecommunications and financial product innovations that more extensively link traditional banking and securities markets A fundamental task of financial intermediaries is to appraise and assume risk and to charge for it appropriately As a result of regulatory change the growth of derivative product markets and technological innovation competitive pressure appears to be increasing the general level of risk assumed by intermediaries while only partially providing the tools needed to manage that risk

**Alternative Beta Strategies and Hedge Fund Replication** Lars Jaeger, Jeffrey Pease, 2008-10-13 There s a buzzword that has quickly captured the imagination of product providers and investors alike hedge fund replication In the broadest sense replicating hedge fund strategies means replicating their return sources and corresponding risk exposures However there still lacks a coherent picture on what hedge fund replication means in practice what its premises are how to distinguish different approaches and where this can lead us to Serving as a handbook for replicating the returns of hedge funds at considerably lower cost Alternative Beta Strategies and Hedge Fund Replication

provides a unique focus on replication explaining along the way the return sources of hedge funds and their systematic risks that make replication possible It explains the background to the new discussion on hedge fund replication and how to derive the returns of many hedge fund strategies at much lower cost it differentiates the various underlying approaches and explains how hedge fund replication can improve your own investment process into hedge funds Written by the well known Hedge Fund expert and author Lars Jaeger the book is divided into three sections Hedge Fund Background Return Sources and Replication Techniques Section one provides a short course in what hedge funds actually are and how they operate arming the reader with the background knowledge required for the rest of the book Section two illuminates the sources from which hedge funds derive their returns and shows that the majority of hedge fund returns derive from systematic risk exposure rather than manager Alpha Section three presents various approaches to replicating hedge fund returns by presenting the first and second generation of hedge fund replication products points out the pitfalls and strengths of the various approaches and illustrates the mathematical concepts that underlie them With hedge fund replication going mainstream this book provides clear guidance on the topic to maximise returns

### **Commodity Trading Advisors**

Greg N. Gregoriou, Vassilios Karavas, François-Serge Lhabitant, Fabrice D. Rouah, 2011-09-02. Authoritative up to date research and analysis that provides a dramatic new understanding of the rewards and risks of investing in CTAs. Commodity Trading Advisors: CTAs are an increasingly popular and potentially profitable investment alternative for institutional investors and high net worth individuals. Commodity Trading Advisors is one of the first books to study their performance in detail and analyze the survivorship bias present in CTA performance data. This book investigates the many benefits and risks associated with CTAs, examining the risk return characteristics of a number of different strategies deployed by CTAs from a sophisticated investor's perspective. A contributed work, its editors and contributing authors are among today's leading voices on the topic of commodity trading advisors and a veritable Who's Who in hedge fund and CTA research. Greg N. Gregoriou, Plattsburgh, NY, is a Visiting Assistant Professor of Finance and Research Coordinator in the School of Business and Economics at the State University of New York. Vassilios N. Karavas, Amherst, MA, is Director of Research at Schneeweis Partners. François-Serge Lhabitant, Coppet, Switzerland, is a FAME Research Fellow and a Professor of Finance at EDHEC France and at HEC University of Lausanne, Switzerland. Fabrice Rouah, Montreal, Quebec, is Institut de Finance Mathématique de Montréal Scholar in the finance program at McGill University.

### **Capturing Finance**

Carolyn Hardin, 2021-07-09. Arbitrage, the trading practice that involves buying assets in one market at a cheap price and immediately selling them in another market for a profit, is fundamental to the practice of financial trading and economic understandings of how financial markets function. Because traders complete transactions quickly and use other people's money, arbitrage is considered to be riskless. Yet despite the rhetoric of riskless trading, the arbitrage in mortgage-backed securities led to the 2008 financial crisis. In *Capturing Finance*, Carolyn Hardin offers a new way of understanding arbitrage as a means for capturing value in financial capitalism. She shows how arbitrage relies on a system of abstract domination built around risk. The commonsense beliefs that taking on debt is necessary for affording everyday life and that investing is necessary to secure retirement income compel individuals to assume risk while financial institutions amass profits. Hardin insists that mitigating financial capitalism's worst consequences, such as perpetuating class and racial inequities, requires challenging the narratives that naturalize risk as a necessary element of financial capitalism as well as social life writ large.
