**Global Variational Analysis** Marston Morse, 1976-05-21 This book builds upon the revolutionary discovery made in 1974 that when one passes from function  $f$  to a function  $J$  of paths joining two points  $A_1$   $A_1$  the connectivities  $R_1$  of the domain of  $f$  can be replaced by connectivities  $R_1$  over  $Q$  common to the pathwise components of a basic Frechet space of classes of equivalent curves joining  $A_1$  to  $A_1$  The connectivities  $R_1$  termed Frechet numbers are proved independent of the choice of  $A_1$   $A_1$  and of a replacement of  $M_n$  by any differential manifold homeomorphic to  $M_n$  Originally published in 1976 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These paperback editions preserve the original texts of these important books while presenting them in durable paperback editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Global Analysis, Analysis on Manifolds* Themistocles M. E. J. Brouwer, G. D. Birkhoff, Lefschetz and Alexander and it was Morse's genius and destiny to discover one of the most beautiful and far reaching relations between this fledgling and Analysis a relation which is now known as Morse Theory In retrospect all great ideas take on a certain simplicity and inevitability partly because they shape the whole subsequent development of the subject And so to us today Morse Theory seems natural and inevitable This whole flight of ideas was of course acclaimed by the mathematical World it eventually earned him practically every honor of the mathematical community over twenty honorary degrees the National Science Medal the Legion of Honor of France Library Journal ,1976 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035
