

An aerial photograph of a beach at sunset or sunrise. The ocean waves are breaking onto the shore, creating white foam. The sand is a warm, golden-brown color. The sky is not visible, but the lighting suggests a low sun. The text is overlaid on the image in a white, sans-serif font, with a black background for the first two lines.

Global warming is no longer a philosophical
threat, no longer a future threat, no longer a
threat at all. It's our reality.

Greed to Green Charles Derber,2015-11-17 This book shows how we can solve the climate change crisis which is the greatest threat humanity has faced Charles Derber a prominent sociologist and political economist shows that global warming is a symptom of deep pathologies in global capitalism In conversational and passionate writing Derber shows that climate change is capitalism s time bomb certain to explode unless we rapidly transform our economy and create a new green American Dream Derber shows there is hope in the financial meltdown and Great Recession we are now suffering The economic crisis has raised deep questions about Wall Street and the US capitalist model Derber systematically explores the causal links between capitalism and climate change a taboo subject in the U S and opens up new thinking to solve both the economic and climate crises

Age of Joy Yaseva,2021-02-05 Have you at some time or the other wondered whether it is ever possible for human civilization to move away from its present inconsistent and jarring ways Whether the deep down desires of human beings will ever get met in a widespread way If the anxiety uncertainty and confusion that seem to be the norm of these times get replaced with rampant and pervasive peace happiness and joy Many feel that the world is progressing especially with the advancement in technology and communication But in reality if one looks closely it is debatable whether humanity is moving up or sliding down The global pandemic violent territorial disputes between nations religious chauvinism intolerance extreme poverty

violence against women and children trafficking discrimination and so on are certainly not manifestations of human civilization progressing it s more like degeneration The Climate Emergency we are living in is pushing the planet towards extinction The unscrupulous pharmaceutical industry is exploiting the health system for financial gains The humongous war and armament industry drives the economy of developed nations and subversively fuels conflicts and jingoism among neighboring nations to keep their market flourishing The insatiable greed of corporate tycoons for endless growth and wealth garnering has no consideration for the livelihood of the vulnerable causing chronic inequity The mindless destruction and pollution of the planet s primary resources namely air water and earth to boost GDP carries on merrily All these are categorized as aspects of unworkability and left to persist as situations that we are expected to live with Pursuit of Joy is the panacea for all social anomalies and will usher human civilization into the Age of Joy

Wrecking Ball Stu Woolman, 2021-04-29 Wrecking Ball explores in an unprecedented manner a decalogue of wicked problems that confronts humanity Nuclear proliferation climate change pandemics permanent technological unemployment Orwellian public and private surveillance social media that distorts reality cyberwarfare the fragmentation of democracies the inability of nations to cabin private power the failure of multinational institutions to promote collaboration and the deepening of autocratic rule in countries that have never known anything but extractive institutions Collectively or even severally these wicked problems constitute crises that could end civilisation Does this list frighten you or do you blithely assume that tomorrow will be just like yesterday Wrecking Ball shows that without an inclusive system of global governance the collective action required to solve those wicked problems falls beyond the remit of the world s 20 inclusive democracies 50 flawed democracies and 130 extractive elitist autocracies Flawed democracies and autocracies that already struggle to produce goods necessary for their own citizens to flourish are simply incapable of committing to international arrangements that address the existential threats posed by the decalogue of wicked problems This then is our children s inheritance Dystopias far far worse than the polities that we ourselves have known What if anything can mitigate the harms that are our legacy Wrecking Ball offers as an answer a ground breaking analysis of South Africa s political economy It demonstrates that this country s elitist and extractive political and economic institutions not only make resolution of ongoing domestic crises unattainable likewise they make meaningful responses to wicked problems impossible Smart people think they have all the answers Without laboring under any such illusions Martin Luther King Jr eloquently opined The arc of the moral universe is long but it bends towards justice But what will happen King would acidly ask if we continue to dawdle and simply run out of time Wrecking Ball similalry operates under no such smart pretenses and undeterred and unmatched ventures into terrains traversed by truly great political economists Smith Ricardo Marx and Keynes By knitting together what we all know to be the facts with cutting edge theory in economics sociology history and political science the book paints an unflinching portrait of where we are and where

we are headed Are we ready to be honest with ourselves about the likely future of this overheated overpopulated planet

Young, Woke and Christian Victoria Turner,2022-02-28 Young people are often referred to as the church s missing generation But perhaps it is not them that are missing from God s mission but the church itself Young Woke and Christian brings together young church leaders and theologians who argue that the church needs to become increasingly awake to injustices in British society It steers away from the capitalistic marketing ideas of how to attract young people into Christian fellowship and proclaims that the church s role in society is to serve society give voice to the marginalised and stand up to damaging dominating power structures Covering themes such as climate change racial inclusivity sexual purity homelessness food poverty sexuality trans identity feminism peace making interfaith relations and disability justice the collection is a cry for the reform of the church to not ally with woke issues because they are popular with youth but because they are gospel issues With a powerful prologue from Anthony Reddie

The Climate Swerve Robert Jay Lifton,2017-10-10 Longlisted for the PEN America E O Wilson Prize for Literary Science Writing Well worth the read A prescient handoff to the next generation of scholars The Washington Post From one of the world s foremost thinkers Bill Moyers a profound hopeful and timely call for an emerging new collective consciousness to combat climate change Over his long career as witness to an extreme twentieth century National Book Award winning psychiatrist historian and public intellectual Robert Jay Lifton has grappled with the profound effects of nuclear war terrorism and genocide Now he shifts to climate change which Lifton writes presents us with what may be the most demanding and unique psychological task ever required of humankind what he describes as the task of mobilizing our imaginative resources toward climate sanity Thanks to the power of corporate funded climate denialists and the fact that with its slower incremental sequence climate change lends itself less to the apocalyptic drama a large swathe of humanity has numbed themselves to the reality of climate change Yet Lifton draws a message of hope from the Paris climate meeting of 2015 where representatives of virtually all nations joined in the recognition that we are a single species in deep trouble Here Lifton suggests in this lucid and moving book that recalls Rachel Carson and Jonathan Schell was evidence of how we might call upon the human mind our greatest evolutionary asset to translate a growing species awareness or climate swerve into action to sustain our habitat and civilization
