Dimitrova, 2025-01-15 Global Journalism: Understanding World Media Systems provides an overview of the key issues in global journalism today and traces how media systems have evolved over time in different world regions. Taking into account local context as well as technological change across media industries, the book lays down the foundation for today's journalism students learning about the practice, growth, and impact of global media. It offers an up-to-date thorough overview of media developments in all world regions embedded in their unique political, cultural, and economic context. The book explains the theoretical foundations of global journalism from the classic Four Theories of the Press to more nuanced media models and proposes a framework for studying world media systems. Readers will gain knowledge about a wide range of topics including media freedom, global news cultures, professional ethics, and responsibilities, and education of global journalists. The second edition of the book underscores the essential role of generative AI and social media and discusses issues such as fake news and disinformation, soft power, and public diplomacy, foreign news reporting, and international news flow. Case studies serve as an excellent supplement to the conceptual content, exposing students to a number of hot topics from the FIFA World Cup in Qatar to the doctored photo of the Princess of Wales scandal. **Global Journalism** Vera Slavtcheva-Petkova, Michael Bromley, 2018-10-09 Providing a truly comprehensive overview of international journalism and global news reporting in the digital age, this new introductory textbook surveys the full variety of contexts that journalists around the world operate in, the challenges and pressures they face, their journalistic practices, and the wider theoretical and social implications. He explores how in a diverse Arab media landscape expressing myriad opinions journalists are still under siege as governments fight a rear guard action to manage the message This innovative book breaks through the stereotypes about Arab journalists to reveal the fascinating and complex reality and what it means for the rest of us **The Handbook of Election News Coverage Around the World** Jesper Strömbäck, Lynda Lee Kaid, 2009-09-10 The Handbook of Election Coverage Around the World focuses on the news coverage of national elections in democracies around the globe It brings together and compares election news coverage within a single framework offering a systematic consideration of various factors Considering the prominence and power of the press in the election process this volume will offer unique breadth in its global consideration of the topic The volume will appeal to scholars in political communication political science mass media and society and others studying elections and media coverage around the world *Foreign Correspondents and International Newsgathering* Colleen Murrell, 2014-11-27 This book reveals that fixers local experts on whom foreign correspondents rely play a much more significant role in international television newsgathering than has been documented or understood Murrell explores the frames through which international reporting has traditionally been analysed and then shows that fixers who have largely been dismissed by scholars as logistical aides are in fact central to the day to day decision making that takes place on the road Murrell looks at why and how fixers are selected and what their significance is to foreign correspondence She asks if fixers help introduce a local perspective into the international news agenda or if fixers are simply People Like Us PLU Also included are in depth case studies of correspondents in Iraq and Indonesia **Korean Communication, Media, and Culture** Kyu Ho Youm, Nojin Kwak, 2018-08-31 Korean Communication Media and Culture is a bibliography of English language publications for non Korean speaking academics researchers and professionals In addition to the actual annotations of all the major books book chapters journal articles and theses dissertations each chapter includes contextual introductory commentary on its topic The authors not only historicize their findings but they also prescribe the direction that English language research on Korean communication should take **Media and the Politics of Culture** Nickesia S. Gordon, 2008 There is a great deal of discussion about media globalization particularly television especially as it is being driven by the spread of satellite technology and cable While certain schools of thought view this trend as promoting cultural heterogeneity and the diversification of programme content this book argues otherwise It discusses the influence of globalization on Jamaica s television industry Specifically it looks at how market liberalization globalization s twin force has lead to government divestment of the television sector and increased private ownership and consolidation within this sector It revisits the cultural imperialism debate within the context of media globalization and locates Jamaica s position within this milieu It suggests that old concerns relating to cultural imperialism are still relevant in new ideas such as cultural proximity and programme modeling The book also discusses the implications that increased private ownership of television media in Jamaica have for public broadcasting services especially in an age of consolidation Finally the book examines current media

policies and discusses whether or not they are adequate to address the present media environment within which the market model of media management encourages anti competitive behaviour among media firms News Media in the Arab World Barrie Gunter,Roger Dickinson,2013-06-06 News Media in the Arab World A Study of 10 Arab and Muslim Countries is based on ongoing research at the Department of Media and Communication University of Leicester and has investigated the rapidly changing nature of the news media in Arab countries They have investigated the role of newspapers and television in news provision and the impact of new media developments most especially the emergence of the internet as a platform for news distribution and of international satellite television channels such as Al Jazeera Examining the constantly developing nature of news the collection contains separately authored chapters produced by the researchers responsible for each original analysis covering Bahrain Egypt Iraq Kuwait Libya Oman Qatar Palestine Saudi Arabia and the United Arab Emirates Based on original primary and secondary research this will be the first empirical based collection to blend perspectives from both the Western and Arab nations Handbook of Research on Media Literacy in the Digital Age Yildiz, Melda N.,Keengwe, Jared,2015-12-02 With the current ubiquity of technological tools and digital media having the skillset necessary to use and understand digital media is essential Integrating media literacy into modern day education can cultivate a stronger relationship between technology educators as well as students The Handbook of Research on Media Literacy in the Digital Age presents key research in the field of digital media literacy with a specific emphasis on the need for pre service and in service educators to become familiar and comfortable with the current digital tools and applications that are an essential part of youth culture Presenting pedagogical strategies as well as practical research and applications of digital media in various aspects of culture society and education this publication is an ideal reference source for researchers educators graduate level students and media specialists **International News in the Digital Age** Judith Clarke,Michael Bromley,2012-01-25 The new research presented in this volume suggests that general perceptions cultural psychological geographical allied to the customs and values of journalism and underpinned by the uses of technology significantly shape international news This gives rise to a blend of the old and the new traditions of cultural centredness and innovative practices anchorages of place and the rootlessness of globalization Technology per se has not swept all before it On the other hand its uses have altered the means and methods of international news sourcing construction and dissemination Consequently the uptake of technology has contributed to fundamental changes in style and form and has greatly facilitated cross cultural exchanges The category international news is now more of a hybrid as recognized by the BBC and others The chapters in this book demonstrate that this hybridity is unevenly distributed across geo political domains and often across time Nevertheless as the contributors to this volume show the concept of international news relies on tightly interwoven elements of orthodox journalism social media civic expression and public assembly **Media Studies** Pieter J. Fourie,2010-06 Exploring the media as an institution this volume also introduces the topics of media regulation and content

The nature of communications policy is explained following overviews of internal and external media regulation Strategic ways of managing the media are discussed in addition to the guide s analysis of the ways that media presents issues of identity race gender sexual orientation the environment AIDS and terrorism Reporting the Cuban Revolution Leonard Ray Teel,2015-12-16 Reporting the Cuban Revolution reveals the untold story of thirteen American journalists in Cuba whose stories about Fidel Castro s revolution changed the way Americans viewed the conflict and altered U S foreign policy in Castro s favor Between 1956 and 1959 the thirteen correspondents worked underground in Cuba evading the repressive censorship of Fulgencio Batista s dictatorship in order to report on the rebellion led by Fidel Castro The journalists stories appeared in major newspapers magazines and national television and radio influencing Congress to abruptly cut off shipments of arms to Batista in 1958 Castro was so appreciative of the journalists efforts to publicize his rebellion that on his first visit to the United States as premier of Cuba he invited the reporters to a private reception at the Cuban Embassy in Washington where he presented them with engraved gold medals While the medals revealed Castro s perception of the correspondents as like minded partisans the journalists themselves had no such intentions Some had journeyed to Cuba in pursuit of scoops that could rejuvenate or jump start their careers others sought to promote press freedom in Latin America still others were simply carrying out assignments from their editors Bringing to light the disparate motives and experiences of the thirteen journalists who reported on this crucial period in Cuba s history Reporting the Cuban Revolution is both a masterwork of narrative nonfiction and a deft analysis of the tension between propaganda and objectivity in the work of American foreign correspondents
