How Great Thinkers Transformed Our Ideas C C Hagan, 2024-05-08 Dare to think This was the catch cry of the Enlightenment over 300 years ago when the breakaway from religion towards a more secular society began Isaac Newton led the Scientific Revolution which transformed society for the next 300 years with progress not then dreamed of Stephen Hawking revealed a new cosmology and linked Einstein s relativity to small scale quantum mechanics Yet what was the mind set of Newton s age compared to Hawking s age What were the changes in the mind sets of society and philosophy during those 300 years and were they all linked to science This book represents a slice of the history of ideas science and philosophy mixed with their personal lives against how science mathematics and philosophy evolved over those 300 years Revealed are the truly astonishing stories and ideas of five of the greatest thinkers who ever lived who provided us rich insights into the cosmos Their stories class them as true founders of scientific revolutions battlers with feats of endurance and triumphs to rise to great heights Through the personal tragedies of Curie and Hawking to the intellectual battles fought by Einstein Newton and Leibniz these five scientists inspire us and enrich our ideas

Cross-Border Investing Julia Djarova, 2007-05-08 Cross Border Investing The Case of Central and Eastern Europe offers a view that reflects two main hypotheses You cannot understand foreign direct investment FDI trends and developments unless you understand the company s motives to invest You cannot understand a company s cross border investment decision making unless you understand what the investment area offers This is the reason why this text builds up a relationship between the world of companies decision makers and that of the policy makers in the public sector It does so by linking the business processes to the factors that together constitute the location profile of a country or a region Based on more than 15 years of practical experience as well as research in the field of FDI Dr Julia Djarova offers a Cross Border Investment Model to

describe the logic behind the decision making process concerning foreign investments made by companies The model is illustrated by a number of case studies of multinationals

company's ability to create value the most Generate superior performance through strategies that are optimized for the three A's adaptation adjusting to differences aggregation overcoming differences and arbitrage exploiting differences Using in depth examples Ghemawat reveals how companies such as Cemex Toyota Procter Gamble Tata Consultancy Services IBM and GE Healthcare are adroitly managing cross border differences He also shares examples of other well known companies that have failed at this challenge Crucial for any business competing across borders Redefining Global Strategy will help you make the most of our semiglobalized world
