Global Superhighways:

Global Superhighways Vincent Cable, Catherine Distler, 1995 Building the Global Fiber Optics Superhighway C. David Chaffee, 2005-12-27 A re working of C D Chaffee s previously published The Rewiring of America Academia 1988 this professional book describes the fiber optics revolution There have been many changes in the fiber optics field since the book s first publication These include advances in optical networking the additional bandwidth created by the Internet and associated data services liberalization of the global telecommunications industry and the rewiring of the world s oceans with fiber optics Building the Global Fiber Optics Superhighway details all these developments C D Chaffee writes One thing is clear as our networks become primarily data driven they need to be built differently to be able to handle data first but also voice It is a different way of looking at the world **Exiting the Global Economic Superhighway** Hideki Kato, 2023-11-27 This book tackles global economic and social issues from a perspective that may seem obvious but which no author has yet taken that we humans are living beings In today s artificially globalized world we have increasingly lost sight of our original humanity Despite the serious environmental social and political problems we are facing we cannot stop focusing on economic growth efficiency and liberalization In doing so we continue to make the world slicker and more unstable This book identifies these conventional values and ways of thinking as the root cause underlying many of today s challenges and it offers the perspective of a bumpier and more organic human existence that provides a greater sense of traction and stability The book begins with a discussion of global systems and structures proposing a world with two systems to limit the effects of artificially constructed globalization The second part examines the modern welfare state outlining a process to revive democracy and social capital by making social issues the business of everyday citizens The third and final part focuses on human well being emphasizing physicality and the Japanese concept of kata as keys to restoring our humanity Rather than searching for specific solutions through specialized knowledge this book makes use of the author s broad perspective acquired through many years of public policy research and reform It asserts that knowledge should be acquired through hands on experience and in studies based on real world situations involving people at the forefront of society s challenges whether politicians businesspeople scientists craftspeople or farmers In both its analysis of humanity s problems and the solutions it offers this book takes an entirely new yet utterly natural approach to steering humanity off the global economic superhighway **Information Highways for a Smaller World and Better Living** Seon Jong Chung, 1996 This work discusses the issues among people creating computer communication technology the people using computer communication the people impacted by it and the regulators responsible for balancing the interest of these multiple groups **Bike Highways** Everett Sinclair, AI, 2025-03-12 Bike Highways explores the rise of high speed bike lanes as integral components of urban transportation It examines how cities globally are adapting infrastructure to embrace cycling moving beyond mere amenities to establish efficient and equitable systems These dedicated bike networks aim to reduce traffic congestion

improve air quality and boost public health The book highlights that well designed cycling infrastructure is not just about recreation it s about improving urban sustainability and fostering economic development by providing affordable transportation options The book progresses from a historical overview of urban cycling to case studies of successful bike lane networks in cities like Copenhagen and Amsterdam It delves into technical design aspects such as route planning and signaling systems and explores the social and economic impacts including effects on property values and public health Data from diverse sources including urban planning reports and traffic monitoring systems quantifies the benefits A unique focus is on the practical challenges and opportunities in building and maintaining these bike highways offering a realistic assessment of the costs benefits and trade offs involved in implementation

Super Continent Kent E. Calder,2019-04-30 A Eurasian transformation is underway and it flows from China With a geopolitically central location the country s domestic and international policies are poised to change the face of global affairs The Belt and Road Initiative has called attention to a deepening Eurasian continentalism that has argues Kent Calder much more significant implications than have yet been recognized In Super Continent Calder presents a theoretically guided and empirically grounded explanation for these changes He shows that key inflection points beginning with the Four Modernizations and the collapse of the Soviet Union and culminating in China s response to the Global Financial Crisis and Crimea s annexation are triggering tectonic shifts Furthermore understanding China s emerging regional and global roles involves comprehending two ongoing transformations within China and across Eurasia as a whole and that the two are profoundly interrelated Calder underlines that the geo economic logic that prevailed across Eurasia before Columbus and that made the Silk Road a central
