Exports, Trade Policy and Economic Growth in Eras of Globalization Edward M. Feasel, 2018-06-13 This book provides an excellent resource for understanding the forces in international trade liberalization over two centuries that have brought us to this point where the successes, setbacks, and the countervailing forces now vie for the public's mind and support the outcome of which will determine the future progress of increased globalization or lack thereof. The book also examines whether trade policy has indeed promoted exports in the vast number of countries which increasingly look to trade agreements to gain a competitive edge and to what extent export-driven growth has been an important force in advancing economic development around the world. In doing so, the book examines one of the most controversial issues in economic development: the promotion and significance of export-led growth

The Politics and the Economics of Integration in Asia and the Pacific Shiro Armstrong, 2011-11-03 The shape of economic integration in the global and regional economies and the extent to which goods, services, and factors of production move more or less freely across borders depends not only upon underlying economic conditions but also upon politics. Whether integration is market-led as has been the case in Asia or institution-led as in Europe, there are political elements that affect all forms of regional and international economic integration. While geopolitics influences international economic integration, so too does domestic politics. Economic integration in Asia has been driven by rapid unilateral trade and investment liberalization, and while trade and investment patterns have been determined largely by comparative advantage, political forces have also affected patterns of economic interdependence. The form that regional institutions take and their effectiveness also depends on political relations between countries. The particular circumstances in Asia and the relationships between regional economies have profoundly shaped regional institutions and will continue to do so. The chapters in this volume draw on papers originally presented to the 33rd Pacific Trade and Development Conference held in Taipei in 2009 to look in original ways at how politics shape economic integration and its various dimensions in Asia and the Pacific and globally

Sustainable Production Consumption Systems Louis Lebel, Sylvia Lorek, Rajesh Daniel, 2009-12-02 Sustainable Production Consumption Systems brings together a set of designed case studies intended to

provide a more in depth understanding of challenges and opportunities in bringing knowledge and actions closer together for the sustainable management of specific production and consumption systems The case study approach enabled researchers to engage directly with some of the actors involved in the production consumption or regulation of specific goods or services and other stakeholders affected by those processes Such engagement was particularly worthwhile when it helped mobilize actors to pursue linking knowledge with action in ways that improve the prospects for sustainability *Proceedings of the International Conference on Emerging Challenges: Sustainable Strategies in the Data-Driven Economy (ICECH 2024)* Dinh Nguyen Van, Nguyen Nguyen Danh, Ngoc Luu Thi Minh, Mai Nguyen Phuong, 2025-04-30 This is an open access book International School Vietnam National University Hanoi Hanoi University of Science and Technology School of Economics and Management University of Economics and Business Vietnam National University Hanoi National Economics University Faculty of Business Management The University of Danang University of Economics University of Economics Ho Chi Minh City Foreign Trade University University of Economics Hue University University of Hertfordshire UK AVSE Global France PPM School of Management Indonesia EM Normandie Business School France will organize the 12th International Conference on Emerging Challenges Sustainable Strategies in the Data driven Economy in Thanh Hoa Vietnam on November 1 2 2024 We would like to invite you to be a part of the ICECH2024 and submit your research papers for presentation The details are as follows Thanks to the juggernaut technological development especially in the context of the Industrial Revolution 4 0 such as greater data availability and the increasing popularity of the Internet governments firms and people are utilizing data especially big data to improve their decision making boost productivity understand citizens and or customers needs and behaviours meet a greater variety of demands and many others benefits It is undeniable that the data driven economy features powerful economies of scale economies of scope network externalities in many sectors and pervasive information asymmetry Businesses globally are experiencing a significant increase in digitalization leading to a surge in data volumes and emphasizing the need for enterprises to prioritize data driven approaches Data is becoming a crucial company asset and its value relies on effectively utilizing it to produce actionable insights for strategic decision making In addition to the challenges that businesses are facing in the data driven economy over the past few years the world has been gripped with rising uncertainties and significant challenges such as the COVID 19 pandemic the Russia Ukraine or the Israel Hamas conflicts These issues coupled with current lingering problems such as climate change do pose significant threats to economies and companies around the world In response to these challenges governments and firms have adopted sustainability oriented approaches such as the digitalization and or digital transformation of business activities the pursuant of sustainable development goals SDGs or the adoption of Environmental Social and Governance ESG practices In the context of coupling challenges as mentioned above it is essential to discuss the solutions that businesses should take to be resilient in uncertain contexts and achieve sustainable development Thus ICECH2024 aims to provide a forum for academics and

Schechter,2016-07-27 The chapters in this volume identify and assess the political process and bases of support for multilateralism in terms of the shifting power relations in world politics institutional innovations in the United Nations and non UN multilateralisms They seek to answer the question What can and should be done to confront salient issues of the global problematic More specifically the essayists ask whether currently existing multilateral mechanisms are up to the challenge *International Law in Financial Regulation and Monetary Affairs* Thomas Cottier,John H. Jackson,Rosa M. Lastra,2012-10-04 The early twenty first century has seen a conspicuous absence of formal international law concerning money and finance This book argues that this lack of formal international regulation was a significant contributing factor to the global financial crisis that began in 2007 It focuses on this lack of global substantive principles and hard law rules in the field of financial regulation and monetary affairs and analyses the emerging framework within international law that aims to govern financial institutions and markets The global financial crisis has demonstrated the essential need for financial and monetary regulatory reform and for the establishment of appropriate mechanisms for the settlement of financial disputes and for the regulation of cross border financial institutions This book therefore presents the foundations of solutions that could fill these critical gaps in international financial law It addresses cross border issues

financial regulation and provides detailed analyses of monetary policies and regulation This book is an updated collection of papers first published in the Special Edition of the Journal of International Economic Law on The Quest for International Law in Financial Regulation and Monetary Affairs Volume 12 Number 3 September 2010 which also show that the regulatory hands off approach was not replicated in other areas of international economic law International trade regulation witnessed an increased number of international rules and the reinforcement of a rule oriented if not rule based approach Judicial dispute settlement and retaliation exclusively based upon international ruling and authorization was reinforced Given the importance of trade regulation and WTO law which has an established institutional and legal framework the book therefore provides a much needed comparative approach Love and Trade War Li Sheng,Dmitri Felix do Nascimento,2021-01-24
