Global Warming and the Challenge of International Cooperation Gary C. Bryner, 1992      **The Climate Change Convention and Developing Countries** J. Gupta, 2013-03-09 The climate change problem can only be effectively dealt with if global anthropogenic greenhouse gas GHG emissions can be reduced substantially Since the emission of such gases is closely related to the economic growth of countries a critical problem to be addressed by the United Nations Framework Convention on Climate Change FCCC is how will the permissible emission levels be shared between industrialised ICs and developing countries DCs The thesis of this book is that the long term effectiveness of the FCCC runs the risk of a horizontal negotiation deadlock between countries and the risk of vertical standstill within countries if there is little domestic support for the domestic implementation of measures being announced in international negotiations The research question is Can one observe trends towards horizontal deadlock and vertical standstill and if yes how can the treaty design be improved so as to avoid such potential future bottlenecks The research focuses on the perspectives of domestic actors on the climate convention and related issues in four developing countries India Indonesia Kenya and Brazil The following key findings emerge from the research 1 Handicapped negotiating power The common theme of the foreign policy of DCs is that ICs are responsible for the bulk of the GHG emissions and need to take appropriate domestic action      Forum for Applied Research and Public Policy ,1995      *The World's Water 2002-2003* Peter H. **Corporate America and Environmental Policy** Sheldon Kamieniecki, 2006 This book adds to the environmental politics and policy literature by conducting a comprehensive investigation of business influence in agenda building and environmental policymaking in the United States over time As part of this investigation the author presents an analysis of six cases in which private firms were involved in disputes concerning pollution control and natural resource management In addition to determining how much business interests influence environmental and natural resource policy the book tests possible explanations for their level of success in shaping the government's agenda and policy The study offers a general conceptual framework for analyzing the influence of corporate America over environmental policymaking The research then explores how much firms have influenced Congress the U S Environmental Protection Agency and certain natural resource agencies and the courts on environmental and natural issues since the beginning of the environmental movement in 1970 No other study has examined the ability of business to influence environmental policy in all three branches of government and in such detail      The History of Global Climate Governance Joyeeta Gupta, 2014-02-06 A systematic exploration of the underlying issues and negotiation history of climate change governance for policymakers NGOs researchers and graduate students      The Journal of Environment & Development ,1992      **Conservation and Environmentalism** Robert C. Paehlke, 2013-04-03 Focusing on both problems and solutions this authoritative reference work maintains a healthy balance

between science and the social sciences in its coverage of all aspects of the environment The book is arranged alphabetically and is divided into three major sections Ecology Pollution and Sustainability The list of 240 contributors reads like a who's who of the world's leading conservation and environmental professionals Best Reference Source Outstanding Reference Source

Climate Change in the South Pacific: Impacts and Responses in Australia, New Zealand, and Small Island States

Alexander Gillespie, William C.G. Burns, 2006-04-11 ALEXANDER GILLESPIE WILLIAM C G BURNS The idea for this book grew out of the Ecopolitics conference in Canberra Australia in 1996 The conference captured the ferment of the climate change debate in the South Pacific as well as some of its potential implications for the region's inhabitants and ecosystems At that conference one of the editors Gillespie delivered a paper on climate change issues in the region as did Ros Taplin and Mark Diesendorf who are also contributors to this volume This book focuses on climate change issues in Australia New Zealand and the small island nations in the Pacific as the world struggles to cope with possible the impacts of environmental change and to formulate effective responses While Australia and New Zealand's per capita emissions of greenhouse gases are among the highest in the world their aggregate contributions are small However both nations may exert a disproportionate influence in the global greenhouse debate because their obstinate positions at recent conferences of the parties to the United Nations Framework Convention on Climate Change may provide justification for other developed nations as well as developing countries to refuse to make meaningful reductions in their greenhouse gas emissions **Bibliography of Agriculture with**
