Globalisation And Eu Policy Making The Neo Liberal Transformation Of Telecommunications And Electricity:

Globalisation and EU Policy-making Ian Bartle, 2005 Assesses and contrasts the roles of globalisation institutions and ideas on policy making in the EU Views the creation of liberalised European single markets in the telecommunications and electricity supply sectors out of national monopolies as an example of the dramatic transformation of economic organisation across Europe in the last twenty years Connects micro policy making processes in two industrial sectors to macro international political economy Covers the period from the mid 1980s when the single market came on the agenda through the liberalising initiatives in the 1990s to the new regulatory framework in communications in 2002 and the 2003 directive on the full liberalisation of electricity by 2007 Will be of interest to anyone studying globalisation European integration and policy making regulation and policy in utility sectors **Globalisation and EU Policy-Making** Ian Bartle, 2005-11

Media and Communications Policy Making Robert G. Picard, 2020-03-25 This textbook focuses on how media and communications policy is made and what influences its design It explores the structures and processes in which policymaking takes place worldwide the factors that determine its forms influence its elements and affect its outcomes It explores how to analyze policy proposals evaluate policy and use policy studies approaches to examine policy and policymaking Truly international in scope it lays out the variety of political social economic and institutional influences on policy the roles of industries and policy advocates in the processes and issues and factors that complicate effective policymaking and skew policy outcomes This textbook is a valuable resource for advanced undergraduate and postgraduate students **Policy**

Transfer in European Union Governance Simon Bulmer, David Dolowitz, Peter Humphreys, Stephen Padgett, 2007-05-07 This new book presents a clear conceptual framework for understanding the transfer of policy ideas between EU states together with an empirical study of regulatory change within European utilities Policy transfer is a new instrument for understanding EU policy making This volume shows how the nature of institutions interdependence between trans national and national jurisdictions and social systems relate policy actors across geographical boundaries identifying four basic types of EU policy transfer and learning uploading how member states compete to shape the EU agenda in line with their own institutional arrangements and policy preferences downloading how states adapt to changing EU incentives and constraints socialization how EU policy norms are internalized in the belief systems of domestic actors information exchange between national actors in the course of EU interactions leading to a horizontal diffusion of policy ideas The authors use an institutional perspective to show how these forms of policy transfer operate across the diverse systems of governance found across the EU Policy Transfer in European Union Governance will be of great interest to students and scholars of European Union politics and policy comparative public policy and political economy *Constructing a Policy-Making State?* Jeremy John Richardson, Jeremy Richardson, 2012-09-20 Constructing a Policy Making State is a guide to how the European Union really works in which 12 policy sectors are analysed by some of the leading EU scholars in the world Its considers how

policy is made at the EU level who is involved which are the key institutions and if they are pro integration The New Electronic Marketplace George Christou,Seamus Simpson,2007-01-01 This book breaks new ground by exploring governance strategies that the EU has been developing over the last decade for the growing electronic economy driven by the Internet Through an analysis of key EU policy initiatives the authors provide an explanation of both the form and mechanics of emergent governance arrangements within the European e economy Drawing on data gathered through interviews with key national and EU level policymakers the volume applies theoretical insights from academic work on the regulatory and post regulatory state to situate and explain the EU s role as an international regional actor in a new area of economic activity with important national and global dimensions The Emerald Handbook of Digital Media in Greece Anastasia Veneti,Athina Karatzogianni,2020-10-22 The Emerald Handbook of Digital Media in Greece Journalism and Political Communication in Times of Crisis presents the empirical applications of digital media in political communication and in a number of social settings including the environment homelessness migration and social movements **The Rise of the Regulatory State of the South** Navroz K. Dubash,Bronwen Morgan,2013-06-27 Recent decades have witnessed a spurt of energetic institution building in the developing world as regulatory agencies emerge to take over the role of the executive in key sectors This volume empirically explores the emergence of regulatory agencies of a range of developing countries across Asia Africa and Latin America *International Regulatory Co-operation: Case Studies, Vol. 2 Canada-US Co-operation, EU Energy Regulation, Risk Assessment and Banking Supervision* OECD,2013-05-13 This volume complements the stocktaking report on International Regulatory Co operation Rules for a Global World by providing evidence on regulatory co operation in the Canada U S Regulatory Cooperation Council as part of EU energy regulation under the Global Risk Assessment Dialogue etc

Telecommunications Research Trends Hans F. Ulrich,Ernst P. Lehrmann,2008 Telecommunication is the transmission of signals over a distance for the purpose of communication In modern times this process typically involves the sending of electromagnetic waves by electronic transmitters but in earlier times telecommunication may have involved the use of smoke signals drums or semaphore or heliograph Today telecommunication is widespread and devices that assist the process such as the television radio and telephone are common in many parts of the world There are also many networks that connect these devices including computer networks public telephone networks radio networks and television networks Computer communication across the Internet is one of many examples of telecommunication This book presents the latest research from around the world **Experimentalist Governance in the European Union** Charles F. Sabel,Jonathan Zeitlin,2010-02-25 This book brings together a distinguished interdisciplinary group of European and American scholars to analyze the core theoretical features of the EU s new experimentalist governance architecture and explore its empirical development across a series of key policy domains Mobile Telephones Alvin C. Harper,Raymond V. Buress,2008 The mobile phone or mobile also called a cellular phone or cell phone is a long range portable electronic device used for mobile

communication that uses a network of specialised base stations known as cell sites In addition to the standard voice function of a telephone current mobile phones can support many additional services such as SMS for text messaging email packet switching for access to the Internet and MMS for sending and receiving photos and video Most current mobile phones connect to a cellular network of base stations cell sites which is in turn interconnected to the public switched telephone network PSTN the exception is satellite phones This book presents the latest research in this revolutionary field *The Political Economy of European Union Competition Policy* Tuna Baskoy,2008-06-24 Competition policy is the first truly supranational public policy regulating market competition in the European Union This book offers the first thorough investigation of competition policy analyzing where it has succeeded and where and how it has failed to achieve its objectives of preventing excessive market concentration *Medical Devices* Christa Altenstetter,2017-09-08 Medical devices are the bread and butter from which health care and clinical research are derived Such devices are used for patient care genetic testing clinical trials and experimental clinical investigations Without medical devices there is no clinical research or patient care Without life adjusting devices there are no medical procedures or surgery Without life saving and life maintaining devices there is no improvement in well being and quality of life Without innovative medical devices and experimentation there can be no medical progress or patient safety Medical devices and medical technology are used to create or support many different products and medical surgical procedures This volume on the regulation of medical devices in the European Union with a focus on France tackles a topic of interdisciplinary interest and significance for policymakers in countries around the globe The EU regulatory regime is one of three global regional regimes and medical products manufactured in EU countries are sold worldwide As countries confront an aging population on a global scale with associated increases in chronic diseases physical handicaps and multi morbidity there will inevitably be an increase in the demand for health services and concomitantly the use of medical devices in medical and surgical procedures This will be the case regardless of whether services are delivered in hospitals doctors offices or at home The associated risks of a particular device will be the same whatever the country of origin for the device or where the need occurs Revolutionary medical advances increase diagnostic capabilities but they increase the potential of harm and risks to patients Medical technologies and devices are used ethically most of the time yet they have the potential for unethical use when scientific medicine is elevated over human life and death Assumptions that are taken for granted can be dangerous to a patient s health That is why our understanding of appropriate and effective regulation of medical devices is significant to all people on all continents **Doctor Who: A British Alien?** Danny Nicol,2018-02-02 This book argues that Doctor Who the world s longest running science fiction series often considered to be about distant planets and monsters is in reality just as much about Britain and Britishness Danny Nicol explores how the show through science fiction allegory and metaphor constructs national identity in an era in which identities are precarious ambivalent transient and elusive It argues that Doctor Who s projection of Britishness is not merely

descriptive but normative putting forward a vision of what the British ought to be The book interrogates the substance of Doctor Who's Britishness in terms of individualism entrepreneurship public service class gender race and sexuality It analyses the show's response to the pressures on British identity wrought by devolution and separatist currents in Scotland and Wales globalisation foreign policy adventures and the unrelenting rise of the transnational corporation

Identity and Intercultural Communication Nicoleta Corbu, Dana Popescu-Jourdy, Tudor Vlad, 2014-10-21 The search for identity is a continuous challenge in the global world from personal identity to social national European or professional identities each person experiences nowadays a multi dimensional self representation Placing the topic against an intercultural background with a focus on communication this book addresses the complicated relationship between self identity and society from an academic perspective The authors of the chapters in this book offer a complex landscape of professional and scholar approaches and research in various parts of the world including Canada China Estonia France Greece Israel Romania and the United States of America

The Constitutional Protection of Capitalism Danny Nicol, 2010-01-29 In 1945 a Labour government deployed Britain's national autonomy and parliamentary sovereignty to nationalise key industries and services such as coal rail gas and electricity and to establish a publicly owned National Health Service This monograph argues that constitutional constraints stemming from economic and legal globalisation would now preclude such a programme It contends that whilst no state has ever or could ever possess complete freedom of action nonetheless the rise of the transnational corporation means that national autonomy is now significantly restricted The book focuses in particular on the way in which these economic constraints have been nurtured reinforced and legitimised by the creation on the part of world leaders of a globalised constitutional law of trade and competition This has been brought into existence by the adoption of effective enforcement machinery sometimes embedded within the nation states sometimes formed at transnational level With Britain enmeshed in supranational economic and legal structures from which it is difficult to extricate itself the British polity no longer enjoys the range and freedom of policymaking once open to it Transnational legal obligations constitute not just law but in effect a de facto supreme law entrenching a predominantly neoliberal political settlement in which the freedom of the individual is identified with the freedom of the market The book analyses the key provisions of WTO EU and ECHR law which provide constitutional protection for private enterprise It dwells on the law of services liberalisation public monopolies state aid public procurement and the fundamental right of property ownership arguing that the new constitutional order compromises the traditional ideals of British democracy

The Routledge Handbook of State-Owned Enterprises Luc Bernier, Massimo Florio, Philippe Bance, 2020-05-27 State owned enterprises make up roughly 10 percent of the world economy yet they are woefully understudied This handbook offers the first synthesis of the topic since the 1980s and offers a comprehensive reference for a generation The authors provide a detailed explanation of the theory that underpins the expansion of state owned enterprises in the 21st century Each chapter delivers an overview of current knowledge as well as

identifying issues and relevant debates for future research The authors explain how state owned enterprises are used in both developed and developing countries and offer an insight into complex and fascinating organizations such as the German municipal conglomerates or the multinational companies owned by states New modes of governance and regulation have been invented to make sure they act in the public interest This handbook brings together a wealth of international scholars offering multiple theoretical perspectives to help shape a brave new world It will be of interest to teachers and students of Economics Public Administration and Business academics established researchers and PhD students seeking rigorous literature reviews on specific aspects of SOEs as well as practitioners and decision makers in international organizations

Devolution and social citizenship in the UK Greer, Scott L.,2009-01-21 Most of the expansive literature on social citizenship follows its leading thinker T H Marshall and talks only about the British state often referring only to England But social citizenship rights require taxation spending effective public services and politics committed to them They can only be as strong as politics makes them That means that the distinctive territorial politics of the UK are reshaping citizenship rights as they reshape policies obligations and finance across the UK This timely book explores how changing territorial politics are impacting on social citizenship rights across the UK The contributors contend that whilst territorial politics have always been major influences in the meaning and scope of social citizenship rights devolved politics are now increasingly producing different social citizenship rights in different parts of the UK Moreover they are doing it in ways that few scholars or policymakers expect or can trace Drawing on extensive research over the last 10 years the book brings together leading scholars of devolution and citizenship to chart the connection between the politics of devolution and the meaning of social citizenship in the UK The first part of the book connects the large and largely distinct literatures on citizenship devolution and the welfare state The empirical second part identifies the different issues that will shape the future territorial politics of citizenship in the UK intergovernmental relations and finance policy divergence bureaucratic politics public opinion and the European Union It will be welcomed by academics and students in social policy public policy citizenship studies politics and political science The British National Bibliography Arthur James Wells,2009
