Development and Security in Southeast Asia Carolina G. Hernandez,2019-07-15 This title was first published in 2003 This three volume set examines the relationship between government and civil society in their efforts to define and pursue security Including the results of an extensive research program each volume is organized around one of the three principal themes environment people and globalization

supplying compelling evidence of the tension between economic change and human well being Challenging the conventional wisdom about the beneficial results of economically induced change this first volume suggests that too often the mismanagement of development jeopardizes the security of individuals families communities and possibly the state by harming the very environment which is required to sustain both people and their economic existence Bringing together an international group of scholars from a variety of disciplines this volume is particularly relevant for academic and general research communities in the areas of social economic political and security matters of Southeast Asia **Security Studies**

Human Development Report 1999 , Refugees, Gender and Human Security Ellen Lammers,1999 The concept of gender **International Economic Law with a Human Face** Friedl Weiss,Erik Denters,Paul de Waart,2023-12-18 International Economic Law with a Human Face addresses a vital question in contemporary international economies the design structure and content of the legal and institutional framework within an increasingly globalized civil society and market economy It is based on the belief that liberalized global markets cannot be expected to provide the public goods required to secure the *acquis communautaire* for human rights worldwide let alone to extend those rights to peoples hitherto deprived of their benefits Scholars from Europe America Asia and Australia examine a variety of aspects of relevant state practice in a fresh and stimulating manner They combine international social critique of state practice with ideas for social engineering offering critical legal analysis and ideas about policy options for setting standards to induce legal change and development International Economic Law with a Human Face is a user friendly book Twenty seven chapters are sub titled and arranged under three main headings Towards a new human and economic order chapters 1 8 Trade environmental protection and resource management chapters 9 18 and Investment and finance chapters 19 27 It also contains a detailed Table of Contents and an Index **The Human Security Paradigm: Challenges & Opportunities** Dr. Priti Chahal ,Dr. Meenakshi Mawi ,Dr. Megha Kumari ,2024-12-20 In an era marked by unprecedented global challenges the concept of human security has emerged as a significant framework for rethinking traditional approaches to security Historically security was almost exclusively understood in terms of state sovereignty military capacity and territorial protection However as the

world has become more interconnected with transnational threats becoming more complex there has been a growing recognition of the need to move beyond the state centric militarized definition of security The human security paradigm offers an alternative one that emphasizes the security of individuals and communities rather than just that of states This shift reflects the reality that the threats faced by people today are multidimensional and transcend national borders From poverty inequality and environmental degradation to terrorism pandemics and cyber threats the sources of insecurity are increasingly non military in nature demanding a more comprehensive and people centric approach

Mainstreaming Human Security in Peace Operations and Crisis Management Wolfgang Benedek, Matthias C. Kettemann, Markus Möstl, 2010-10-04 The concept of human security is a new approach to security that focuses on the individual human being and provides policy alternatives to the traditional state centred view which considers the state to be the only and ultimate referent of security Formally introduced into the United Nations system in 1994 the concept's intellectual roots draw from international humanitarian law human rights and human development and since its introduction human security has been progressively integrated into the international security discourse

Mainstreaming Human Security Policies Problems Potential paints a comprehensive picture of the relevance of the concept of human security in practice in a time of changing security paradigms and a challenging international environment This volume looks at the practical implications of mainstreaming human security It focuses on the potential problems and policies of human security in peace operations and crisis management operations of the United Nations and of the European Union Topics addressed by the contributors include mainstreaming human rights and human security in peace and crisis management in general and the role of human security in the EU's Common Security and Defence Policy security sector reform restorative responses to human rights violations by peacemakers human security in Serbia and in African peace operations as well as proposals for human security training The contributions to the book focus equally on mainstreaming human security in the UN and in the EU context The global issues discussed and conclusions drawn are of relevance for the future of security addressed by peace and crisis management operations all over the world
