The Spatiality of Violence in Post-war Cities Emma Elfvérsson,Ivan Gusic,Kristine Höglund,2020-05-21 The Spatiality of Violence in Post war Cities analyses violence in post war cities from different perspectives and in different parts of the world with a shared attention to space and how it affects violent dynamics The world is urbanising rapidly and cities are increasingly held as the most important arenas for sustainable development

Cities emerging from war are no exception but across the globe many post war cities are ravaged by residual or renewed violence which threatens progress towards peace and stability This volume addresses why such violence happens where and how it manifests and how it can be prevented It includes contributions that are informed by both post war logics and urban particularities that take intra city dynamics into account and that adopt a spatial analysis of the city They focus on cases around the world including Medell n Colombia Johannesburg South Africa and Mitrovica Kosovo The volume makes a threefold contribution to the research agenda on violence in post war cities First the contributions nuance our understanding of the causes and forms of the uneven spatial distribution of violence insecurities and trauma within and across post war cities Second the collection demonstrates how urban planning and the built environment shape and generate different forms of violence in post war cities Third the contributions explore the challenges opportunities and potential unintended consequences of conflict resolution in violent urban settings Providing novel insights into the causes and dynamics of violence in post war cities and challenges and opportunities for violence reduction *The Spatiality of Violence in Post war Cities* will be of great interest to scholars of peace violence conflict and its resolution urban studies built environment and planning The chapters were originally published as a special issue of *Third World Thematics* *The Routledge Research Companion to Planning and Culture* Greg Young,2016-03-23 It has become increasingly evident that effective planning for sustainable communities environments and economies pivots on the ability of planners to see the possibilities for culture in comprehensive social historical and environmental terms and to more fully engage with the cultural practices processes and theorisation that comprise a social formation More broadly an approach to planning theory and practice that is itself formed through a close engagement with culture is required This Research Companion brings together leading experts from around the world to map the contours of the relationship between planning and culture and to present these inextricably linked concepts and issues together in one place By examining significant trends in varying national and international contexts the contributors scrutinise the theories and practices of both planning and culture and explore not only their interface but significant divergences and tensions In doing so this collection provides the first comprehensive overview and analysis of planning and culture interdisciplinary and international in scope It is comprised of six parts organised around the themes of global and historical contexts key dimensions of planning and cultural theory and practice and cultural and planning dynamics Each section includes a final chapter that provides a case study lens which pulls the themes of the section together with reference to a significant planning issue or initiative *The Rise of Interactive Governance and Quasi-Markets* S.A. Denters,Oscar van Heffen,J. Huisman,P.J. Klok,2013-06-29 It has taken a long time to make this book Many initial drafts of the chapters published in this book were presented in November 2000 during a two day conference on Interactive governance towards a post parliamentary democracy held in Enschede The Netherlands The Netherlands Institute of Governance NIG sponsored the conference After this conference the organisers discussed the possibility of making a book on

the basis of papers presented at this event In the end it was agreed that such a publication would indeed be worthwhile provided the initial papers were fundamentally revised Moreover it was agreed that also supplementary chapters should be included in order to strengthen the international comparative perspective On this basis authors of the conference papers chapters and envisioned new chapters were invited to re submit drafts The completion of the book however was unexpectedly halted by the tragic sudden death of our co editor and dear friend Oscar van Heffen In his lifetime he was the driving force behind this project Without his efforts insightful comments and helpful suggestions this book in its present form would never have been published As such we dedicate this volume to his memory the completion of the book being an honorary debt to our friend and his wife Mirjan

The Routledge Research Companion to Planning and Culture Dr Greg Young, Professor Deborah Stevenson, 2013-09-28 It has become increasingly evident that effective planning for sustainable communities environments and economies pivots on the ability of planners to see the possibilities for culture in comprehensive social historical and environmental terms and to more fully engage with the cultural practices processes and theorisation that comprise a social formation More broadly an approach to planning theory and practice that is itself formed through a close engagement with culture is required This Research
