## **Globalization And Law Trade Rights War:**

**Globalization and Law** Adam Gearey, 2005-07-14 To understand globalized law it is necessary to bring together insights gained from disparate strands of study international political economy economic law human rights law and the law of war Focusing on WTO the UN the World Bank and the IMF Globalization and Law shows how their legal and regulatory regimes are linked to the politics of world markets It also looks at the operation of law and economy at a national level where globalized law can be seen in action Chapters consider the politics of oil and human rights in Nigeria and the invasion and reconstruction of Iraq Other broad themes are also examined Looking at the fate of people in the third world who are the subjects of economic development and development law we can bring to light the power relationships and ideologies that are attendant on the development project In conclusion it is argued that we need to engage with the claims to humanity that lie behind the notion of human rights the war against terrorism and military intervention Globalized law raises fraught questions about the role of international regimes and the interests and values in whose name they claim to operate Globalization and Law Adam Gearey, 2005 Globalized law brings together disparate strands of study including international political economy human rights law and the law of war Globalization and Law examines international institutions including the WTO the World Bank and the IMF and shows how they are linked to the politics of world markets and the politics of war The book looks at these interactions at the micro level where globalized law can be seen in action from the politics of oil and human rights in Nigeria to the current war in Iraq and the claim of a just war fought for human rights Looking at the fate of people worldwide in the context of trends in economic development the exploitation of human rights regimes and supposedly humanitarian interventions we see that many are unhomed by the forces of globalization Whose humanity lies behind the claims to human rights Whose interests are best served by the market Can we ever go home again The Effects of Globalization in Latin America, Africa, and Asia Kema Irogbe, 2014-05-01 In The Effects of Globalization in Latin America Africa and Asia Kema Irogbe argues that the forces of globalization which include the IMF World Bank WTO and Western media technology are subordinated to the interests of multinational corporations under the tutelage of a lone superpower in strangling the development efforts of poor countries Irogbe subjects the operations and the existing relationships among these international governmental and nongovernmental actors to the test of empirical reality and logical plausibility by drawing from the experiences of a varied selection of marginalized countries such as Venezuela Guatemala Mexico Brazil in Latin America Nigeria South Africa and Ghana in Africa and Iraq Iran India Afghanistan and Vietnam in Asia The book argues that globalization is a sophisticated lexicon for the pursuit of a homogenized political economic and cultural world order which is a recipe for unending global crises **An Introduction to International Human Rights Law** Azizur Rahman Chowdhury, Jahid Hossain Bhuiyan, 2010-06-14 This book is designed to provide an overview of the development and substance of international human rights law and what is meant concretely by human rights guarantees such as civil and

**Decolonising International Law** Sundhya

Pahuja,2011-09-29 The universal promise of contemporary international law has long inspired countries of the Global South to use it as an important field of contestation over global inequality Taking three central examples Sundhya Pahuja argues that this promise has been subsumed within a universal claim for a particular way of life by the idea of development As the horizon of the promised transformation and concomitant equality has receded ever further international law has legitimised an ever increasing sphere of intervention in the Third World The post war wave of decolonisation ended in the creation of the developmental nation state the claim to permanent sovereignty over natural resources in the 1950s and 1960s was transformed into the protection of foreign investors and the promotion of the rule of international law in the early 1990s has brought about the rise of the rule of law as a development strategy in the present day

and occupation *Human Rights* Albert A. Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic

**Trade and Cultural Diversity in International Law** Jingxia Shi, 2013-04-30 This book attempts to reconcile the concept of free trade with a key non trade social value cultural diversity in an era of economic globalisation It first shows how we can look at culture in many different ways and explains why we should care about cultural diversity The book then examines the challenges that policymakers are faced with in formulating cultural measures in the new media environment and analyses UNESCO's theories and approaches to cultural diversity This is followed by a comprehensive examination of the treatment of culture in global and regional trade agreements including the framework of the GATT WTO system the WTO's judicial practice involving cultural products and the treatment of culture under the EC EU and NAFTA This identifies the challenges trade norms encounter in dealing with cultural products The author seeks to formulate a balanced view of the challenge of protecting and promoting cultural diversity while also recognising the important goal of trade liberalisation To this end

Professor Shi proposes a dual method through which the norms found in WTO agreements and in UNESCO cultural instruments may be brought into alignment the first highlighting the compatibility of cultural policy measures with trade obligations on a domestic level the second suggesting potential linkages between the WTO rules and the UNESCO Convention from the perspectives of treaty interpretation

**Global Governance, Human Rights and International Law** Errol P. Mendes, 2022-08-18 This book offers a stimulating introduction to the links between areas of global governance human rights global economy and international law By drawing on a range of diverse subject areas it argues that the foundations of global governance human rights and international law are undermined by a conflict or tragic flaw where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self interest for both the state and the global community Following the election of President Donald Trump the second edition will explores how we are witnessing a critical battle to ensure that human rights international law and the beneficial aspects of globalization will still be relevant and applied in some of the critical institutions of global governance and in the operations of the global private sector The second edition will focus on how States institutions and global civil society will have to ramp up the struggle to fight this tragic flaw that is now even more evident with the actions of the US and other authoritarian states like China and Russia in this second decade of the 21st Century
