*The Domestic Dynamics Of China's Energy Diplomacy* Chi Zhang, 2015-09-17 Since the beginning of the 21st century China's energy diplomacy has been expanding rapidly and the country is searching for energy resources worldwide This movement has not only improved China's energy security and international relations but also enabled the Chinese national oil companies NOCs to access new investment markets and implement development strategies The Chinese government and the NOCs need each other's support to realise their respective interests The interaction between the government and the NOCs will have a critical influence on China's energy diplomacy The Domestic Dynamics of China's Energy Diplomacy explores the long neglected domestic dynamics of China's energy diplomacy in particular the interaction of national and corporate interests It argues that the convergence of national and corporate interests is the key momentum of China's energy diplomacy It observes that the government NOC relationship

has been evolving with China's economic and enterprise reform. Finally, it tests the empirical evidence of the domestic dynamics of China's energy diplomacy against the three mainstream international political economy theories, showing their merits and shortcomings in explaining the phenomenon before providing an alternative conceptualisation of the movement.

**Chineseness And Modernity In A Changing China: Essays In Honour Of Professor Wang Gungwu** Yongnian

Zheng, Litao Zhao, 2020-02-13 This book is a collection of essays in honour of Professor Wang Gungwu. Professor Wang is not only a great historian on Chinese history in general and the Chinese overseas in particular but has much wider influence through remarkable domain crossing, namely spatial crossing characterised by geographical straddling between inside and outside of China, temporal crossing from the ancient past to the contemporary, inter-disciplinary crossing from history to the social sciences and intellectual crossing from the academia to public activism. He has been a long-lasting source of inspiration for understanding some of the most pressing and complex issues in our times, including the nature of China's rise and its implications for the regional and world order. In a nutshell, this book presents Wang as a highly active educator-scholar who has achieved the highest academic standard as well as far-reaching influence over issues that concern all walks of life. By focusing on the theme of Chineseness and China's modernity, this book adds depth to the analysis of China's rise and its implications for the region and the world. It contains a chapter providing the most comprehensive and updated review of Wang's scholarship thus far. Another chapter demonstrates how Wang, based on his deep understanding of Chinese civilisation and history, articulates a distinct view of the world order that differs from either the thesis of Thucydides's trap or the advocacy of mutual accommodation. Interestingly, this book also includes a chapter that highlights Wang's Southeast Asian-ness, suggesting that Wang's scholarship cautions against not only western-centric views towards China but also Sino-centric views towards Southeast Asia. In short, this edited volume is both a reference book for understanding Wang's scholarship and an extension of his scholarship to the analysis of China's growing international influence and its implications for the world order.

**The Chinese Party-State in the 21st Century** Andre Laliberte, Marc Lanteigne, 2007-12-18 As the CCP moves away from traditional Maoism, it seeks to maintain its commanding role in political life despite a growing number of challenges to its claims of legitimacy. This book describes these challenges and explains how the CCP adapts to maintain its authority.

*China's Soft Power and International Relations* Hongyi Lai, Yiyi Lu, 2012-05-23 China's soft power has attracted considerable attention in the recent decade. In this volume, scholars from the U.K., Europe, the U.S., Singapore, Australia, Hong Kong, and mainland China, including a number of well-established and well-known analysts on China, examine main areas where China has made noticeable advances in its appeal and influence. They include China's foreign policy discourse, international communication, cultural diplomacy, and foreign assistance. In addition, Chinese concept of soft power, foreign policy strategy, and the relationship between its international standing and that of the U.S. are also closely analysed. The volume covers some of the most recent development and assesses China's soft power critically. This book offers an

assessment of China's efforts to cultivate its international image as well as a critique of Nye's theory of soft power. It draws on case studies of the Chinese diplomatic practice and utilizes world opinion polls. This volume offers a theoretical and empirical perspective on the discussion on soft power with a particular focus on China's soft power. **Understanding**

**Globalization** Robert K. Schaeffer, 2009-01-16 This book examines the globalization of production and its impact on work and gender relations, the impact of technology on workers around the world, the economic problems associated with debt crisis, the political opportunities associated with democratization, the impact of global warming, the reasons behind China's rise as an economic superpower, and the problems in countries across the Middle East that culminated in the attacks of 9/11.

**China's Regions in an Era of Globalization** Tim Summers, 2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization, yet China is a continent-sized economy and society with substantial diversity across its different regions. This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China's regions. This book responds to this challenge by looking at the development of China's regions in this era of globalization. It traces the evolution of regional policy in China and its implications in a global context. Detailed chapters examine the global trajectory of what is now becoming known as the Greater Bay Area in southern China, the globalization of the inland mega-city of Chongqing, and the role of China's regions in the globally focused Belt and Road initiative launched by the Chinese government in late 2013. The book will be of interest to practitioners and scholars engaging with contemporary China's political economy and international relations. **Re-envisioning Sovereignty** Trudy

Jacobsen, 2016-04-08 Sovereignty as a concept is in a state of flux. In the course of the last century, traditional meanings have been worn away while the limitations of sovereignty have been altered as transnational issues compete with domestic concerns for precedence. This volume presents an interdisciplinary analysis of conceptions of sovereignty. Divided into six overarching elements, it explores a wide range of issues that have altered the theory and practice of state sovereignty, such as human rights and the use of force for human protection purposes, norms relating to governance, the war on terror, economic globalization, the natural environment, and changes in strategic thinking. The authors are acknowledged experts in their respective areas and discuss the contemporary meaning and relevance of sovereignty and how it relates to the constitution of international order. **The Future of Multilateralism and Globalization in the Age of the U.S.-China Rivalry** Norbert

Gaillard, Fumihito Gotoh, Rick Michalek, 2023-10-26 Despite the growing consensus that the rise of China is transforming international relations, policy makers and scholars have not sufficiently addressed the geopolitical and geoeconomic implications of a new paradigm, especially since the Covid-19 pandemic and the Russo-Ukrainian war. This book fills this gap. This is an original and innovative book that investigates how a new *modus vivendi* between China and the United States in a post-globalized world requires more economic independence because of the distrust between G20 economies but heightened

international cooperation in order to avert a shift to nationalism and protectionism and to fight financial and climate crises The book is divided into four parts Part I investigates the specific features of Chinese and U S capitalisms Part II argues that several flaws observed in the multilateral architecture since the early 2000s have caused global imbalances and increased misunderstanding and mistrust between the two superpowers Part III analyzes how the China U S rivalry has manifested in Asia Latin America and in terms of global development finance and finally Part IV provides a blueprint for a successful and revamped international order The book provides an ambitious interdisciplinary analysis of the future of multilateralism and globalization with contributions from economists lawyers and political scientists Due to its multidisciplinary approach the book will attract the interest of scholars and postgraduate students from wide ranging fields as well as practitioners working in international organizations policy makers and more generally educated lay readers interested in the topic

*Non-Governmental Organizations in Contemporary China* Qiusha Ma, 2005-11-16 Based on documentary materials including interviews with key players in China this book charts the development of non governmental and non profit organizations in China from the late 1970s to the present day It recounts how in the aftermath of the 1978 reforms that created a market economy and diversified interests and social life new institutions and organizations outside of the state system increased dramatically in number size and influence These organizations which barely existed before the reforms began in the late 1970s carry out many social economic and cultural tasks neglected by the government Qiusha Ma examines two key questions crucial to understanding the development of NGOs in China First is it possible under China s one party state for non governmental organizations to thrive and play important economic social and political functions And secondly are NGOs facilitating the formation of a civil society in China

*China and the Global Politics of Regionalization* Emilian Kavalski, 2016-05-23 This volume examines the prominent role of China in global politics and the relevance of the new regionalism paradigm to China s international outreach It provides a comprehensive and critical assessment of China s impact on the global politics of regionalization offers a novel application of analytical models investigates the aspects of the Chinese practice of regionalization that set it apart and demonstrates China s transformative potential in international life Addressing the need to re Orient the research and policy agenda of international relations this comprehensive study demonstrates both the lack of language to engage with existing norms and standards and the difficulty of applying them to an evaluation of the global politics of China s non Western international agency

*Sinicization and the Rise of China* Peter J. Katzenstein, 2013-03-01 China s rise and processes of Sinicization suggest that recombination of new and old elements rather than a total rupture with or return to the past is China s likely future In both space and time civilizational politics offers the broadest social context It is of particular salience in China Reification of civilizations into simple categories such as East and West is widespread in everyday politics and common in policy and academic writings This book s emphasis on Sinicization as a specific instance of civilizational processes counters political and intellectual shortcuts and corrects the mistakes to which

they often lead Sinicization illustrates that like other civilizations China has always been open to variegated social and political processes that have brought together many different kinds of peoples adhering to very different kinds of practices This book tries to avoid the reifications and celebrations that mark much of the contemporary public debate about China's rise It highlights instead complex processes and political practices bridging East and West that avoid easy shortcuts The analytical perspectives of this book are laid out in Katzenstein's opening and concluding chapters They are explored in six outstanding case studies written by widely known authors which cover questions of security political economy and culture Featuring an exceptional line up and representing a diversity of theoretical views within one integrative perspective this work will be of interest to all scholars and students of international relations sociology and political science Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

*Japanese Development Cooperation* André Asplund, Marie Soderberg, 2016-12-19 The world order as we know it is currently undergoing profound changes and in its wake so is foreign aid Donors of foreign aid development assistance or development cooperation around the world are already facing new challenges in the changing development architecture This is an architecture that globally seems to become increasingly forgiving of foreign aid as a win-win concept that also meets the donors' own national interests something that has been an unofficial Japanese trademark for many years This book examines Japan's development assistance as it transitions away from Official Development Assistance and towards Development Cooperation In this transition the strong and reciprocal relationships between Japanese development policy and comprehensive security diplomacy foreign domestic and economic policies are likely to become even more consolidated and integrated The utilization of and changes within Japanese development policy therefore affects not only recipients of foreign aid but also the relationships Japan enjoys with its allies and strategic partners as well as the relations to competing donors and rivals in the region and around the world Japanese foreign aid as such provides an extremely interesting case from where regional and even global changes can be understood Written by a multidisciplinary team of contributors from the fields of political science international relations development economics public opinion and Japan studies the book sets out to be innovative in capturing the essence of the changing patterns of development cooperation and more importantly Japan's role in within it in an era of great change This book will be of great interest to students and scholars of Japanese Politics Foreign Policy and International Relations

**De Facto Federalism In China: Reforms And Dynamics Of Central-local Relations**  
Yongnian Zheng, 2007-01-23 This book is the first attempt to conceptualize China's central-local relations from the behavioral perspective Although China does not have a federalist system of government the author believes that with deepening reform and openness China's central-local relations is increasingly functioning on federalist principles Federalism as a functioning system in China is under studied The author defines the political system existing in China as de facto federalism and provides

a detailed analysis of its sources and dynamics in the book *The system is mainly driven by two related factors inter governmental decentralization and globalization* While economic decentralization since the 1980s has led to the formation of de facto federalism globalization since the 1990s has accelerated this process and generated increasingly high pressure on the Chinese leadership to institutionalize de facto federalism by various measures of selective recentralization
