#### **Economic Corridors in Asia: Paradigm of**

**Integration? A Reflection for Latin America** Varios Autores, 2020-08-31 Global geopolitics has shifted dramatically over the last thirty years After the vanishing expectations of a unipolar international system led by the United States China has gained an increasingly dominant role in areas as innovative as quantum computing robotics and artificial intelligence In the non digital dimension the eastern superpower has made gigantic investments in its Belt and Road Initiative which include the development of a massive network of highways industrial centers harbors pipelines and bridges among many other works of

infrastructure These investments allow for the connection of more than 60 countries worldwide guaranteeing China's energetic security easier conditions for trading goods and services and perhaps more importantly a significant influence in the political and economic events of the world States with political regimes as diverse as those of Russia and India are part of this growing network in various cases in exchange for the benefits associated with being part of it major concessions were made By way of illustration Sri Lanka and Pakistan among others given their lack of capacity to pay for some of the works have agreed to forfeit control of specific areas of their territories

China's Globalization from Below Theodor Tudoroiu, 2021-09-09 This book analyzes the Chinese centered globalization from below brought about by China's entrepreneurial migrants and conceived of as a projection of Chinese power in the Belt and Road Initiative partner states It identifies the features of this globalization from below scrutinizes its mutually reinforcing relationship with China's globalization from above and shows that these two globalizations are intrinsically related to the construction of a new international order It outlines how the actors in China's globalization from below include Chinese emigrants who are located in informal transnational economic networks It reveals that Beijing has enacted many laws that compel these emigrants to contribute to the development of their country of origin but also influences them through the successful promotion of a specific type of deterritorialized nationalism and that China is ready to impose harsh punitive actions on political elites in partner states which fail to protect its migrants or limit their economic activities Finally it argues that China's globalization from below is fundamentally different from the non hegemonic globalization from below represented by among others Lebanese and East Indian traders and that China's globalization from

below is rather a self interested national strategy intended to support the construction of a Chinese centered international order
