Globalization Technological Change And Public Education:

Globalization, Technological Change, and Public Education Torin Monahan, 2005 New information technologies combined with the restructuring of school districts has led to dramatic changes in public education Technologies are intended to help students compete in the global marketplace and organizational restructuring has been a way to increase productivity and accountability Yet a closer look at the interplay of these two phenomena suggests the emergence of new less promising power relations While decision making authority is becoming increasingly centralized accountability for centrally made decisions is increasingly becoming distributed to those along the periphery students and teachers Through detailed ethnographic research and interviews in a large urban school system this book reports on the first extensive study of globalization and technology in education describing examples of globalization on the ground With few exceptions information technologies are used to demand greater flexibility of students and workers to adapt to systems that are evermore rigid and controlling This is the latest addition to the popular Social Theory Education and Cultural Change series

Globalization, Technological Change, and Public Education Torin Monahan, 2013-01-11 Globalization Technological Change and Public Education documents the dramatic changes taking place in public education through the incorporation of new information technologies These additions to the public school environment have generally been seen as enabling tools to help students and nations compete in the global marketplace Yet a closer look at the interplay of technological change and organizational restructuring suggests the emergence of new less promising power relations Through detailed ethnographic research and interviews in the Los Angeles public school system Torin Monahan reveals how with few exceptions these changes to the educational process are forcing both students and workers to adapt to systems that are ever more rigid and controlling

Education Technology Policies in the Middle East Michael Lightfoot, 2016-09-14 This book explores the potential educational technologies have for transforming education in the Middle East Although technology has increasingly become a part of classrooms around the globe over recent decades its application in classrooms in the MENA region remains underused and this book draws on a case study from the Arabian Gulf to examine the beneficial impact technologies have on teaching and learning The book identifies the many social and cultural pressures that prevent government technology policies to be implemented in the way that the international community would find recognisable and acceptable and how education policy from the Global North is transplanted into a separate context without considering the different requirements The study seeks to address the ways in which educational technology policy in government schools plays a part in the enactment of education reforms and how government policy aspirations are played out in practice

Diviv Distrusting Educational Technology Neil Selwyn, 2013-11-26 Distrusting Educational Technology critically explores the optimistic consensus that has arisen around the use of digital technology in education Drawing on a variety of theoretical and empirical perspectives this book shows how apparently neutral forms of educational technology have actually served to align

educational provision and practices with neo liberal values thereby eroding the nature of education as a public good and moving it instead toward the individualistic tendencies of twenty first century capitalism Following a wide ranging interrogation of the ideological dimensions of educational technology this book examines in detail specific types of digital technology in use in education today including virtual education open courses digital games and social media It then concludes with specific recommendations for fairer forms of educational technology An ideal read for anyone interested in the fast changing nature of contemporary education

Distrusting Educational Technology comprises an ambitious and much needed critique

Education and Technology Neil Selwyn, 2011-03-17 Digital technology lies at the heart of contemporary education provision This book considers the key issues in the field and addresses some fundamental but often unvoiced questions about the ever growing use of technologies in education It focuses on the social as well as the technical aspects of these issues giving careful thought to the people practices processes and structures behind the use of technologies in education The book considers a range of current debates and controversies Will technology replace the school or university Will technology replace the teacher What do we really know about learning and technology Does technology make learning fairer Can technology address the many educational problems and inequalities faced by people around the world What does the future hold for technology and education What can be learnt from the history of technology use Neil Selwyn takes a critical look at some of the major debates concerning digital technologies and education Study questions and annotated further reading are included to support readers along with a companion website linking to online sources and resources

Global Issues in Education Greg Wiggan, Charles Hutchison, 2009-08-16 Global Issues in Education bridges the discourse on globalization and education with international studies on race class gender ethnicity culture and multiculturalism The contributors to this volume address educational challenges of post colonial Ghana the United Arab Emirates the Caribbean China and Germany juxtaposed against Western education in the United Kingdom and the United States They synthesize macrosociology with educational research which provides readers with the background core knowledge and global focus that is needed to understand international issues as well as deal with diversity in the classroom Global Issues in Education also addresses the need for additional research that makes the connections between the geopolitical economy and education and it does this with a focus on the link to culture ethnicity and education

Networks, New Governance and Education Stephen J. Ball, Carolina Junemann, 2012 This topical book uses network analysis and interviews with key actors to address the changes in education with a focus on education and the role of new philanthropy

50 Ways to Close the Achievement Gap Carolyn J. Downey, 2009 Outlines research based strategies for developing high performing schools and fostering educational equity for all students

Media Capitalism Thomas Klikauer, 2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the

media's ability to sell the commodities of mass consumerism. Media capitalism also creates pro-capital attitudes among a target population and establishes an ideological hegemony. Thirdly, media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty, rising inequalities, and the acceleration of global warming. To illuminate this, the book's historical chapter traces the emergence of media capitalism. Its subsequent chapters show how media capitalism has infiltrated the public sphere, society, schools, universities, the world of work, and finally democracy. The book concludes by outlining how societies can transition from media capitalism to a post-media capitalist society.

Games-To-Teach or Games-To-Learn Yam San Chee, 2015-08-18. The book presents a critical evaluation of current approaches related to the use of digital games in education. The author identifies two competing paradigms: that of games to teach and games to learn. Arguing in favor of the latter, the author advances the case for approaching game-based learning through the theoretical lens of performance rooted in play and dialog to unlock the power of digital games for 21st-century learning. Drawing upon the author's research, three concrete exemplars of game-based learning curricula are described and discussed. The challenge of advancing game-based learning in education is addressed in the context of school reform. Finally, future prospects and educational opportunities for game-based learning are articulated. Readers of the book will find the explication of performance theory applied to game-based learning especially interesting. This work constitutes the author's original theorization. Readers will derive four main benefits: 1) an explication of the difference between game-based teaching and game-based learning and why this difference is of critical importance; 2) an exposition of the theory of game-based learning as performance; 3) concrete exemplars and research outcomes relating to three game-based learning curricula that have been empirically evaluated in schools; and 4) an understanding of complex issues related to the human side of school change that must be effectively addressed to achieve take-up of game-based learning in schools. Schools Under Surveillance Torin Monahan, Rodolfo D. Torres, 2009-10-13. Schools Under Surveillance gathers together some of the very best researchers studying surveillance and discipline in contemporary public schools. Surveillance is not simply about monitoring or tracking individuals and their data; it is about the structuring of power relations through human, technical, or hybrid control mechanisms. Essays cover a broad range of topics including police and military recruiters on campus, testing and accountability regimes such as No Child Left Behind, and efforts by students and teachers to circumvent the most egregious forms of surveillance in public education. Each contributor is committed to the continued critique of the disparity and inequality in the use of surveillance to target and sort students along lines of race, class, and gender. Contemporary Debates in the Sociology of Education R. Brooks, M. McCormack, K. Bhopal, 2013-07-12. Some of the most prominent sociologists working in education today have collaborated to address a wide range of empirical and theoretical issues. Adopting an international perspective, this book foregrounds cutting-edge research that highlights both the diversity and complexity of understanding education in society. School Space and its Occupation, 2018-09-06. School Space and its

Occupation addresses the ongoing and pressing need for justification of education and environmental innovation Further the increasingly important work of evaluating the new learning spaces brings attention to the need for conceptual and methodological clarity The editors have assembled a collection of leading authors to explore the links between education and design progression of ideas in education and architecture as well as making sense of pedagogical trends and spatial and design relevance Post occupancy evaluation is capable of informing both educational and architectural questions to generate sustainable adaptations for educators and designers Part 2 focuses on the occupancy phase and examines the lived experience of schools to draw conclusions and make recommendations focused impacts and methodological progression Contributors Renae Acton Scott Alterator Benjamin Cleveland Craig Deed Matthew Dwyer Debra Edwards Neil Gislason Wesley Imms Peter Lippman Elizabeth Matthews Marcus Morse Vaughan Prain Matthew Riddle Warren Sellers Rebecca Townsend and Adam Wood

Transforming Education Leon Benade, Mark Jackson, 2017-08-30 This book is an edited collection grouped into three key thematic areas Its authors are researchers and theoretical scholars in the fields of education curriculum education technology education philosophy and design for education They present primary research and theoretical considerations descriptive accounts and philosophical reflections to provide readers with a broad sweep of the state of play in thinking about the place and space of learning Transforming Education distils from a panoply of critical arenas an understanding of the forces currently at play in redefining curriculum agendas for education from primary to post secondary It analyses the major ways in which the built environment of education is transforming in response to various globalised policy drivers and new education delivery technologies Its authors critique the ways education performs a governance function over the users and occupants of space be it physical or virtual For readers who may be seriously engaging with the concept of spatiality in relation to education for the first time this book provides the opportunity to develop a clear understanding of a wide scope of theory practice and critique in relation to learning environments

Passing the Principal as Instructional Leader TExES Exam Elaine L. Big Data in Education Ben Williamson, 2017-07-24 Big data has the power to transform education and educational research Governments researchers and commercial companies are only beginning to understand the potential that big data offers in informing policy ideas contributing to the development of new educational tools and innovative ways of conducting research This cutting edge overview explores the current state of play looking at big data and the related topic of computer

code to examine the implications for education and schooling for today and the near future Key topics include The role of learning analytics and educational data science in schools A critical appreciation of code algorithms and infrastructures The rise of cognitive classrooms and the practical application of computational algorithms to learning environments Important digital research methods issues for researchers This is essential reading for anyone studying or working in today s education environment Everyday Schooling in the Digital Age Neil Selwyn,Selena Nemorin,Scott Bulfin,Nicola F.

Johnson,2017-11-20 Today s high schools are increasingly based around the use of digital technologies Students and teachers are encouraged to Bring Your Own Device teaching takes place through learning management systems and educators are rushing to implement innovations such as flipped classrooms personalized learning analytics and maker technologies Yet despite these developments the core processes of school appear to have altered little over the past 50 years As the twenty first century progresses concerns are growing that the basic model of school is broken and no longer fit for purpose This book moves beyond the hype and examines the everyday realities of digital technology use in today s high schools Based on a major ethnographic study of three contrasting Australian schools the authors lay bare the reasons underlying the inconsistent impact of digital technologies on day to day schooling The book examines leadership and management of technology in schools the changing nature of teachers work in the digital age as well as student mis uses of technologies in and out of classrooms In depth case studies are presented of the adoption of personalized learning apps social media and 3D printers These investigations all lead to a detailed understanding of why schools make use of digital technologies in the ways that they do Everyday Schooling in the Digital Age High School High Tech offers a revealing analysis of the realities of contemporary schools and schooling drawing on arguments and debates from various academic literatures such as policy studies sociology of education social studies of technology media and communication studies Over the course of ten wide ranging chapters a range of suggestions are developed as to how the full potential of digital technology might be realized within schools Written in a detailed but accessible manner this book offers an ambitious critique that is essential reading for anyone interested in the fast changing nature of contemporary education **Education** , *Common Worlds* Carl A.

Maida,2018-11-23 *Common Worlds* Paths Toward Sustainable Urbanism explores expert and lay approaches to sustainable urbanism focusing on the politics and civic aesthetics of space and place project based learning and it consequences for the life chances of youth and the prospect of intergenerational civic engagement Extended case studies of sustainable urbanism describe areas undergoing demographic and socioeconomic change over the two decades since the end of the Cold War The case studies based upon participatory action research are framed through the lens of transformational anthropology which focuses on the structural factors and power relationships that contribute to social and economic disparities within a population This approach is based upon principles of personal and group transformation and it holds researchers responsible for collaborating with communities and groups in co constructing research thereby enhancing the constituents ability to

carry out subsequent transformational change studies rooted in and shaped by the local community Each case also focuses on a movement in support of aesthetic improvement including preservation conservation and restoration efforts on behalf of parkland open space agricultural land and marine wetlands in the face of external threats to their sustainability
