**The Evolving Spatial Form of Cities in a Globalising World Economy** Martin J. Murray, Human Sciences Research Council, 2004 In this paper Murray draws attention to the large metropolises that dominate as economic power base cities such as New York and Japan and then contrasts them with cities that aspire to such world class status as Johannesburg and S o Paulo using the concept of global cities as a key context to the discussion

Of States and Cities Peter Marcuse, Ronald van Kempen, 2002 The nature and effects of globalization are coming under critical scrutiny across all continents This book focuses on one aspect the globalization of cities It examines the claim that the state is powerless to influence events and that history geography and culture have become irrelevant in the worldwide trend towards a uniform urban model a model which features increased segregation decline of the central city and social polarization The international team of contributors is well placed to put these claims in perspective Drawing on their experiences of cities as diverse as New York and Warsaw Istanbul and Sao Paulo they demonstrate that states and cities have adopted widely varying approaches to the advent of globalization and that its impact has been constrained by each city s history physical layout location environment role in the international economy and demographic composition The diversity of urban development and political response revealed is enormous and provides ample practical examples of what might be done to bring about improvements for the increasing number of people who live in cities

Thomas, 2019-02-25 Cities Change and Conflict was one of the first texts to embrace the perspective of political economy as its main explanatory framework and then complement it with the rich contributions found in the human ecology perspective Although its primary focus is on North American cities the book contains several chapters on cities in other parts of the world including Europe and developing nations providing both historical and contemporary accounts on the impact of globalization on urban development This edition features new coverage of important recent

developments affecting urban life including the implications of racial conflict in Ferguson Missouri and elsewhere recent presidential urban strategies the new waves of European refugees the long term impacts of the Great Recession as seen through the lens of Detroit's bankruptcy new and emerging inequalities and an extended look into Sampson's Great American City Beyond examining the dynamics that shape the form and functionality of cities the text surveys the experience of urban life among different social groups including immigrants African Americans women and members of different social classes It illuminates the workings of the urban economy local and federal governments and the criminal justice system and also addresses policy debates and decisions that affect almost every aspect of urbanization and urban life
