Goa Indica A Critical Portrait Of Postcolonial Goa:

Goa Indica Arun Sinha, 2015 **Portuguese Colonialism, Food, and Society in Goa** Maria de Lourdes Brava da Costa, 2025-06-30 This interdisciplinary study examines the food history of colonial Goa between 1900 and 1961 foregrounding the centrality of food in the region's sociocultural economic and political life Drawing on archival materials periodicals in Konkani Portuguese and English oral history folklore and literary sources the book brings together perspectives from anthropology history and literary studies to analyse how food scarcity and abundance shaped everyday experiences and power structures Focusing on the staple crop of rice the work explores its symbolic and material significance in Goan society particularly through a close reading of *O Signo da Ira* by Orlando da Costa The study reveals how rice shortages empowered elite landlords entrenched social hierarchies and intensified the exploitation of *mundkars* tenant labourers and small cultivators by *gaunkars* village elites and the *Comunidade* agrarian institution It critiques the collusion between landlords and the colonial government in manipulating rice prices and maintaining systemic inequities through taxation and landholding practices By recovering the voices and struggles of the subaltern classes this book offers a nuanced and critical history of food in Goa during the late colonial period It addresses a significant gap in Goan historiography highlighting food as a vital lens through which to understand colonialism's enduring impact on everyday life

Khazan Ecosystems of Goa Sangeeta M. Sonak, 2013-10-01 This book elaborates on the *Khazan* ecosystems of Goa India *Khazans* are human managed ecosystems which are reclaimed from coastal wetlands salt marshes and mangrove areas where tidal influence is regulated through a highly structured system of dykes canals furrows and sluice gates using resources that are amply available locally *Khazan* ecosystems are marvels of tribal engineering They are a simple architectural design which operate at a very low running cost using tidal hydro and solar energy The design contributes to a highly complex but eco friendly ecosystem integrating agriculture aquaculture and salt panning *Khazan* ecosystems have been functional for the last 3500 years The history of *Khazans* is very ancient and can be traced to the transition from food gathering to food growing which has been regarded as the biggest step in the history of human civilization *Khazan* ecosystems thus have a high historical and world heritage value They are also repositories of global biodiversity with unique flora suitable to their unique and highly variable environment They are endemic and heritage ecosystems of Goa and ultimately reservoirs of history and heritage Using the example of the *Khazan* lands the book analyzes and comments on traditional ecological knowledge and indigenous technology It presents the evolution of *Khazan* management institutions over a period of more than three thousand years as well as factors that have contributed to its decline in recent years It develops a conceptual framework for ecosystem performance and suggests strategies for conservation of *Khazans* as well as strategies to build on these indigenous adaptation mechanisms to cope with the global environmental change **Goa 2011** Savio Abreu, Rudolf.
