Toward China, 1918-1931 See Heng Teow,2020-03-23 Most existing scholarship on Japan s cultural policy toward modern China reflects the paradigm of cultural imperialism In contrast this study demonstrates that Japan while motivated by pragmatic interests international cultural rivalries ethnocentrism moralism and idealism was mindful of Chinese opinion and sought the cooperation of the Chinese government Japanese policy stressed cultural communication and inclusiveness rather than cultural domination and exclusiveness and was part of Japan s search for an East Asian cultural order led by Japan China however was not a passive recipient and actively sought to redirect this policy to serve its national interests and aspirations The author argues that it is time to move away from the framework of cultural imperialism toward one that recognizes the importance of cultural autonomy internationalism and transculturation *'Benefits Bestowed'?* J. A.

Mangan,1988 The study of the European Union has historically been a theoretical battleground Since the 1990s new theoretical directions such as neo institutionalism multi level governance and constructivism have provided a new impetus However despite these new inroads empirical work has often remained sociologically and empirically underspecified This volume seeks to bridge the gap between theory and fieldwork by developing an actor centred political sociology In doing so the volume engages in a critical dialogue with the constructivist framework and proposes to build on its insights through a sociological hardening centred on European actors The renewal of European studies through political sociology is only useful if it generates new understandings through empirical observation This volume seeks to take a new tack on constructivism by asking what it is that Europe constructs by looking at three areas social spaces and professions policy problems and policies and policy instruments such as the Eurobarometer *The Cross-cultural Transfer of Educational Concepts and Practices*

Masahiro Tanaka,2005-05-16 This book analyses comparatively the creation of American and Japanese universities on the model of German universities largely in the late nineteenth century and the reform of German and Japanese universities on the model of American universities after the end of the Second World War The argument is that transferring educational concepts and practices from one cultural context to another involves not merely a transfer but a transformation How and why this transformation occurs is what this book is about More precisely it is suggested that transformation of educational

concepts and practices during their cross cultural movement can be understood within a theoretical perspective that is proposed and developed in the book This book is divided into six chapters Chapter One as the introduction analyses several scholars approaches to the aspects of educational transfer then attempts to construct a theoretical perspective for the book on the processes of change in educational concepts and practices during their movement across cultures Chapters Two and Three offer two narratives to investigate how German university concepts and practices were transmuted as a consequence of local actors efforts to import these concepts and practices into Japan and the United States Chapters Four and Five provide another two narratives to examine how American university concepts and practices were altered as a result of American actors attempts to export these concepts and practices to Japan and Germany Chapter Six as the conclusion through reflecting on the four narratives given in the main chapters re examines the ways in which the theoretical perspective of this book is useful to understand the processes of transformation of educational concepts and practices during their movement from one culture to another

Provenzo, Michael W. Apple, 2015-12-03 In *Critical Literacy* Eugene F Provenzo Jr challenges E D Hirsch's assumptions about culture and education Calling for a broader and more democratic vision than Hirsch Provenzo critiques Hirsch's legacy up through the current conservative educational agenda for education which he argues denies not only the United States diversity but its democratic traditions of democratic participation His book shows why critical faculties and skills of students are essential not only to the success of individual students but to their participation in a healthy democracy Provenzo offers a list of 5 000 things every educated American ought to know none of them the same items as those included on Hirsch's list in *Cultural Literacy* *Critical Literacy* is essential reading for those concerned with our schools and the future of our children

Cultural Diversity and the Schools: Human rights, education, and global responsibilities James Lynch, Celia Modgil, Sohan Modgil, 1992 First Published in 1992 Routledge is an imprint of Taylor Francis an informa company *Education Systems in Historical, Cultural, and Sociological Perspectives* Daniel Tröhler, Ragnhild Barbu, 2012-03-26 For nearly half a century research on education systems has been increasingly popular However this popularity was long restricted primarily to internationally linked policy makers and education planners often backed up by international organizations such as the OECD but also by governmental or para governmental organizations within the individual countries These institutional affiliations provided education research with a specific character that often centres on notions such as excellence efficiency or standards The specific comparative character of this policy driven research agenda triggered the development of suitable research techniques such as comparative statistics and pertinent sub disciplines such as cognitive psychology Backed up by powerful global institutions this agenda purported to be rather unique and it tended to ignore the cultural complexity of the educational field and those research approaches that address this complexity This volume includes different historical cultural and sociological approaches to the education systems and to questions as to how research on education systems can be undertaken beyond the parameters of the existing research agenda They demonstrate how pertinent problems of research on education systems can only be tackled taking an international and interdisciplinary approach with regard to both research questions and methods concerning education systems **Mathematics Education in Different Cultural Traditions- A Comparative Study of East Asia and the West** Frederick Koon-Shing Leung, Klaus-D.
