Prehistory To Politics Tim Bonyhady, Tom Griffiths, 2016-10-18 Who are public intellectuals Why do they matter What is the difference between an academic and an intellectual Prehistory to Politics explores these issues by examining the life and work of John Mulvaney one of Australia's foremost prehistorians who has both changed our understanding of the past and made a major contribution to public debate and public policy about world heritage archaeological and conservation practice the function and operation of museums and the relevance of the humanities A major campaigner for preservation of the Franklin River in the early 1980s Mulvaney has also been an influential member of the Australian Heritage Commission and one of the most important advocates of the National Museum of Australia He played a significant role in the campaign to preserve the site of First Government House in Sydney Perhaps most controversially he has been outspoken in his views about the return of skeletal remains by Australian Museums to Aboriginal people In exploring these many facets of Mulvaney's work Prehistory to Politics not only has much to say about the changing nature of Australian universities and the opportunities and obligations of academics but also casts new light on a wide set of archaeological anthropological and environmental issues It is both a history of ideas and a book about their implementation

Maria Montessori: Her Thoughts and Her Beliefs for Today Vickie Jacob, 2024-11-26 Maria Montessori along with many other enlightened thinkers of our time foresaw nothing less than the emergence of a new human culture In Maria Montessori's time hers was a futurist vision She puts forth her vision in her books such as *The Formation of Man To Educate the Human Potential* and *Education for a New World* Once we understand what is happening to education in the public schools we begin to wonder if this endless nightmare will have some light shed later on down the road not in just knowing about the Montessori schools but the bigger problem of the system that has been implemented today When the government attempts to impose a set of values it will always countermand some parents authority and often ignites a school war America was founded and built on God's principles and over a hundred fifty years experience shows that we cannot have a society that is both free and peaceful when legislators use schools to shape attitudes or control the content of students minds These wars are over whose values are being taught We're seeing a system that has too many cracks in it to be fixed Is God speaking to America Perhaps because our watchmen have gone to sleep About the Author A mother of three children and four grandchildren Vickie Jacobs is retired and spends much of her time with gardening ducks chickens and many dogs Raising children brought her into contact with educators and seeing a lot of changes since her own school days Vickie is very grateful to her husband and family who encouraged her with this work

Teach the Nation Anne-Elizabeth Murdy,2018-10-24 Is knowledge power In Teach the Nation Anne Elizabeth Murdy explores the history and contradictions in the notion that education and literacy are vital means for improving social and political status in the US By closely examining the rapidly shifting social context of education and the emerging literature by and for African American women during the 1890s Murdy proves that the histories of education and literature are deeply connected and argues that their current lives must be regarded as mutually dependent Teach the Nation offers a new understanding of literacy and pedagogical study and identifies how literary history enhances current feminist and anti racist teachings By excavating notions about education in the 1890s as turbulent a time for American public education as today Murdy asks readers to step back from this historical moment to better understand the contexts and institutions within which we theorize learning and teaching In doing so she compels readers to reimagine the potential for gaining social power through education and literature

Un-Democratic Acts Charles Lowery,Anthony Walker,2016-10-26 In Un Democratic Acts New Departures for Dialogues in Society and Schools the focus is on ideals of democracy and democratic leadership to promote passionate debate critical thinking and change Each chapter utilizes the unique voice and experiences of the author to tackle topics that are often taboo and or politicized for ratings or votes but seldom for progress and change Rather than continuing the circular course of back and forth arguments whose beginning

and end points are the same the authors utilize their voice to invoke change and focus on solutions While each chapter takes on a life of its own the collective work embodies the purpose and challenge that today s leadership faces from a variety of perspectives Most importantly these concepts are intended to create dissonance and divergence a moving away from the typical and usual ways of doing to break down the status quo thinking that dominates the related fields of academia and schooling Do we accept the status quo and work to find our niche within the system Or do we hold ourselves and others accountable to truly honor the founding principles of freedom and equality for all as professed in the United States Constitution In *Un Democratic Acts New Departures for Dialogues in Society and Schools* the editors create a space in which imagining the possibility of a democratic and just society where all individuals are truly respected and treated fairly is the American way

The Future of the Public Domain Lucie M. C. R. Guibault,2006-01-01 The presence of a robust public domain is an essential precondition for cultural social and economic development and for a healthy democratic process But the public domain is under pressure as a result of the ongoing march towards an information economy Items of information which in the old economy had little or no economic value such as factual data personal data genetic information and pure ideas have acquired independent economic value in the current information age and consequently become the object of property rights making the information a tradable commodity How and to what extent does the commodification of information affect the free flow of information and the integrity of the public domain Does the freedom of expression and information guaranteed inter alia in the European Convention on Human Rights call for active state intervention to save the public domain What means both legal and practical are available or might be conceived to guarantee and foster a robust public domain These were the main questions that were addressed in a major collaborative research project led by the Institute for Information Law of the University of Amsterdam IViR in co operation with the Tilburg Institute for Law Technology and Society TILT of Tilburg University and funded by ITeR the Dutch National Program for Information Technology and Law Thirteen contributions from academia worldwide make up the present book addressing the future of the public domain from a different angle In addition all authors were invited to

reflect upon the notion and role of the public domain in the context of information law and policy Should this concept be limited to that of a negative image of intellectual property protection i e all publicly available information not subject to a property right and therefore freely i e gratis available or should a broader approach be taken e g all information available from public sources at affordable cost Should information policies be aimed at maximizing the public domain or optimizing information flows To what extent are these aims congruent This book takes a broader information law oriented approach towards the question of preserving the public domain in which a wide range of interrelated legal questions converge Issues treated in this book include Economic analysis of the public domain Fundamental rights analysis of the public domain Impact of the application of technological protection measures and contractual restrictions on the public domain The impact of the expansion of copyright database right and patent rights on the public domain The impact of the commodification of private data government information indigenous knowledge on the public domain The capacity of the Open Source and Creative Commons Movements to preserve the integrity of the public domain The Future of the Public Domain is an important work for all those interested or involved in the regulation of the knowledge economy Legal scholars academic and research institutions corporate counsel lawyers government policymakers and regulators all these and more will benefit enormously from the thoughtful and incisive discussions presented here
