Impact of Migration on Income Levels in Advanced Economies Ms.Florence Jaumotte,Ksenia Koloskova,Ms.Sweta Chaman Saxena,2016-10-24 The recent refugee surge has brought attention to the macro critical policy issue of migration including speculations that migration can be an unfavorable phenomenon for the receiving economies A careful examination of the impact of migration on host economies is thus critical Focusing on the economic impact most of the academic discussion has centered on the effect of migration on labor markets and public finances Much less is known about the long term impact of immigration on the GDP per capita or the standard of living of host economies This note makes three contributions to estimating this impact it uses a restricted sample of advanced economies rather than a mixed sample of higher and lower income host countries it examines whether the GDP per capita impact varies for different skill levels of migrants and it goes beyond the aggregate impact of migration on GDP per capita to examine how broadly gains in this regard are shared across the population In particular it examines whether migration impacts the income levels of those both at the top and at the bottom of the earnings distribution or whether gains are instead concentrated in a small group of high earners It finds that immigration significantly increases GDP per capita in advanced economies that both high and lower skilled migrants can raise labor productivity and that an increase in the migrant share benefits the average income per capita of both the bottom 90 percent and the top 10 percent of earners suggesting the gains from immigration are broadly shared

Perspectives on Global Development 2017 International Migration in a Shifting

World OECD,2016-12-12 Perspectives on Global Development 2017 presents an overview of the shifting of economic activity to developing countries and examines whether this shift has led to an increase in international migration towards developing countries *Strategies for Increasing Productive Employment in Developing Countries with Special Reference to Sierra Leone* Dr. Ibrahim B.S. Sesay,2014-12-08 This book as pointed out by Professor Singer in his preface discussed divergent development problems facing developing countries Participants of the seminar from various African countries brought in case studies from their own countries as comparison with the Kenya case study where the seminar was held As a result of this comparative study field trips were organized by the seminar authorities In view of these facts and experiences gained from this seminar I was sufficiently stimulated for my task to write this book based on similar lines but with special reference to Sierra Leone My past experiences as a Labor Officer in the Ministry of Labor in Sierra Leone have in no small way also contributed to the success of the completion of this book for industrial relations readers to have interest in it On joining the Personnel and Administration Department of the Standard Bank I was moved to incorporate in my book a chapter on the role of banking particularly the role of Standard Bank formerly known as the British Bank of West Africa in Sierra Leone Readers will also find it in one of the chapters current economic development taking place in Africa particularly regional groupings for example the Mano River Union between Sierra Leone Guinea and Liberia and The Economic Community of West African States ECOWAS and the now defunct East African Economic Community For this reason this book will be of tremendous use to planners and economists bankers industrialists teachers and various people from all works of life concerned with the development of their countries but it is more particularly useful to Sierra Leoneans because of the many references related to Sierra Leone Migration in the 21st Century Thomas N. Maloney,Kim Korinek,2010-10-04 In this volume we examine the challenges and opportunities created by global migration at the start of the 21st century Our focus extends beyond economic impact to questions of international law human rights and social and political incorporation We examine immigrant outcomes and policy questions at the global national and local levels Our primary purpose is to connect ethical legal and social science scholarship from a variety of disciplines in order to raise questions and generate new insights regarding patterns of migration and the design of useful policy While the book incorporates studies of the evolution of immigration law globally and over the very long term as well as considerations of the magnitude and determinants of immigrant flows at the global level it places particular emphasis on the growth of immigration to the United States in the 1990s and early 2000s and provides new insights on the complex relationships between federal and state politics and regulation popular misconceptions about the economic and social impacts of immigration and the status of undocumented immigrants **China's Economy** Deng Zhenglai,2009 Containing ten quality chapters on China s rural reforms and agricultural development this first volume from the Series on Developing China Translated Research from China emphasizes the importance of countryside agriculture and the role of peasants in China s economy While the Chinese revolution has traveled a path of OC encircling the cities from the

rural areas. Chinese reforms were likewise started in promoting the household contract responsibility system in the rural areas. The majority of its population living in the countryside makes it the focus of the reforms. Such structural issues that readjustment of interests entailed as urban-rural divide and poor-rich gap are closely related to the rural reform. For this a rural study centered on the three rural issues: agriculture, rural areas, and peasants, or peasantography, is actually an academic gold mine, which contains the richest possibilities for Chinese social science to contribute to the world. The above mentioned chapters cover an extensive range of issues in rural reform and agricultural development in China, including property right, food trade, structure, the Township and Village Enterprises, non-agricultural employment, the mobility of labor force, land distribution, taxation, and saving behavior. The research approach ranges from a macro to microeconomics level, while in terms of research methodology, property theory, game model, and quantitative economics are used in combination with historiography and empirical case studies.
