

NRPA PARK PULSE

Enhancing the Environment Through Parks and Recreation

93% of U.S. adults — across all ages, races, political affiliations and regions of the country — agree conservation is an essential role of parks and recreation.

According to the *Sustainability in Parks and Recreation* report (nrpa.org/SustainabilityReport), the most common park and recreation sustainability actions are planting trees, transitioning to native and climate-adaptable plants, and updating and retrofitting buildings and other park infrastructure.

Each month, through a poll of 1,000 U.S. residents focused on park and recreation issues, NRPA Park Pulse helps tell the park and recreation story. Questions span from the serious to the more lighthearted. The survey was conducted by Wakefield Research (www.wakefieldresearch.com).

Palazzo,Frederick R. Steiner,2012-06-22 This trailblazing book outlines an interdisciplinary process model for urban design

but to describe useful steps to approach the transformation of urban spaces Urban Ecological Design illustrates the different
stages in which the process is organized using theories techniques images and case studies In essence it presents a how to

method to transform the urban landscape that is thoroughly informed by theory and practice The authors note that urban design is viewed as an interface between different disciplines They describe the field as peacefully overrun invaded and occupied by city planners architects engineers and landscape architects with developers and politicians frequently joining in They suggest that environmental concerns demand the consideration of ecology and sustainability issues in urban design It is after all the urban designer who helps to orchestrate human relationships with other living organisms in the built environment The overall objective of the book is to reinforce the role of the urban designer as an honest broker and promoter of design processes and as an active agent of social creativity in the production of the public realm
