## **Educational Agenda For The 1980s:**

**Educational Agenda for the 1980s** Fred M. Hechinger, 1981 Major objectives of this monograph are to explore the condition of American public education offer an educational agenda for the 1980s and suggest ways to restore public confidence in education America s public education system is characterized as being currently stymied by the end of economic growth unsure of what is expected of it beset by declining enrollments trying to solve problems on the basis of political balancing and unable to deal with expectations that all students are entitled to equal benefits regardless of ability effort or output Various suggestions are offered to help educational policy makers deal with these and other problems Major suggestions include that educators should concentrate on 1 developing and rewarding merit among teachers and students 2 strengthening basic skills including art and music as well as history reading writing and arithmetic 3 including more practical experience in teacher education programs 4 developing a common intellectual ground among students by exposing them to great literary works and 5 providing students with opportunities to study foreign languages and humanities The conclusion is that educators will be successful in improving the educational system and in restoring public confidence in education if they concentrate on implementing these and similar reforms and if they take a cohesive look at what the sum total of 12 years of education ought to achieve DB *Resources in Education* ,1991-10 **Political Agendas for**

**Education** Joel Spring, 2010-05-26 Bringing up to date Joel Spring s ongoing documentation and analysis of political agendas for education in the US the fourth edition of *Political Agendas for Education* focuses on the Republican and Democratic parties in the 2008 national election and post 2008 election era considered within the context of the evolution of the Republican and Democratic education agendas **The Great Transformation in Higher Education, 1960-1980** Clark Kerr, 1991-01-01 Clark Kerr former President of the University of California and a leader in higher education policymaking offers his views of the turbulent decades when colleges and universities scrambled to provide faculty and facilities for the burgeoning student population only to be faced later with economic depression and subsequent conservatism From his unique vantage point Kerr offers insights into the role of higher education its performance under pressure its changing climate its efforts to serve the multiplicity of demands made upon it and its success or failure in meeting those demands

Committee on Labor and Human Resources. Subcommittee on Employment, Poverty, and Migratory Labor, 1980 [How Computers Entered the Classroom, 1960-2000](#) Carmen Flury, Michael Geiss, 2023-06-19 In the history of education the question of how computers were introduced into European classrooms has so far been largely neglected This edited volume strives to address this gap The contributions shed light on the computerization of education from a historical perspective by attending closely to the different actors involved such as politicians computer manufacturers teachers and students political rationales and ideologies

as well as financial political or organizational structures and relations The case studies highlight differences in political and economic power as well as in ideological reasoning and the priorities set by different stakeholders in the process of introducing computers into education However the contributions also demonstrate that simple cold war narratives fail to capture the complex dynamics and entanglements in the history of computers as an educational technology and a subject taught in schools The edited volume thus provides a comprehensive historical understanding of the role of education in an emerging digital society

Challenging the Internationalisation of Education Lucy Bailey,2023-07-07 This book presents a searing critique of the global take on education questioning why the idea that education should be international has come to dominate the field and positing that the discourse of internationalisation has altered the way we conceptualise education Using diverse examples from the Middle East the UK and South East Asia the book gathers insights from international schooling refugee education and the internationalisation of higher education to argue that the global gaze renders other ways of looking at education as invisible It suggests that an oversaturation of international comparison amongst individuals and institutions alike creates a culture of powerlessness exclusion and silencing Furthermore this volume also debates the issues that are caused when education is required to transcend national boundaries Ultimately questioning the global education system in its current form this book will be an important contribution for academics researchers and students in the fields of higher education education policy and politics and education and development more broadly

International Studies in Educational Inequality, Theory and Policy Richard Teese,Stephen Lamb,Marie Duru-Bellat,2007-06-03 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization More and more populations both rich and poor depend on successful use of school and on gaining post school qualifications But access to high quality schooling success at school and chances of higher education all remain socially divided with implications for economic opportunities personal growth and civic and community development What causes these divisions in how education systems work Have decades of public investment brought about at least some improvements even if major gaps remain If not what are the barriers the social processes which have frustrated the efforts of government The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies covering many different global contexts from the wealthiest to some of the poorest nations on earth What have we learnt from the policy experience globally Do we know more today than yesterday about the origins of social inequality Are our policies better framed better designed to tackle inequality And which way forward What does the evidence suggest in terms of future approaches and emphasis This work is published in three volumes which together form a 3 volume set

*An Education in Politics* Jesse H. Rhodes,2012-04-21 Since the

early 1990s the federal role in education exemplified by the controversial No Child Left Behind Act NCLB has expanded dramatically Yet states and localities have retained a central role in education policy leading to a growing struggle for control over the direction of the nation s schools In *An Education in Politics* Jesse H Rhodes explains the uneven development of federal involvement in education While supporters of expanded federal involvement enjoyed some success in bringing new ideas to the federal policy agenda Rhodes argues they also encountered stiff resistance from proponents of local control Built atop existing decentralized policies new federal reforms raised difficult questions about which level of government bore ultimate responsibility for improving schools Rhodes s argument focuses on the role played by civil rights activists business leaders and education experts in promoting the reforms that would be enacted with federal policies such as NCLB It also underscores the constraints on federal involvement imposed by existing education policies hostile interest groups and above all the nation s federal system Indeed the federal system which left specific policy formation and implementation to the states and localities repeatedly frustrated efforts to effect changes national reforms lost their force as policies passed through iterations at the state county and municipal levels Ironically state and local resistance only encouraged civil rights activists business leaders and their political allies to advocate even more stringent reforms that imposed heavier burdens on state and local governments Through it all the nation s education system made only incremental steps toward the goal of providing a quality education for every child School Library Media Quarterly ,1981 School's in Paul Manna,2006 Manna explores the dynamics of forty years of education policymaking to answer a puzzling question if state and local governments are the primary caretakers of elementary and secondary education how have federal policymakers so greatly expanded their involvement in the country s schools since 1965 From Lyndon B Johnson s signing of the carefully worded funding bill the Elementary and Secondary Education Act of 1965 to George W Bush s imposing but underfunded No Child Left Behind initiative Washington s influence over America s schools has increased significantly At the same time the states have developed more comprehensive and often innovative education policies A wide array of educational issues has appeared on the political agenda both nationally and at the state level Manna argues that this is no accident that national and state leaders have borrowed strength from each other strength in terms of both politically viable arguments and of such governmental capacity to act as financing the existence of regulatory agencies and professional capability to develop and enact educational reforms He shows how our nation s education agenda has taken shape through the interaction of policy entrepreneurs at national and state levels in our federal system of government Based on Manna s analyses of public laws presidential speeches congressional testimony public opinion political advertising and personal interviews this book draws on concepts of federalism and agenda setting to offer an original view of the growing federal role in education policy

### **The Theory and Practice of Development Education** Douglas

Bourn, 2014-10-03 Development education is much more than learning about development it is a pedagogy for the globalised societies of the twenty first century that incorporates discourses from critical pedagogy and postcolonialism and a mechanism for ensuring that differing perspectives are reflected within education particularly those from developing countries Learning about development and global issues is now part of the school curriculum in a number of countries and terms such as global citizenship sustainable development and cultural understanding are commonplace in many educational contexts Development education has been recognised as one of the educational discourses that has influenced the acceptance of these terms for both policy makers and practitioners This ground breaking volume addresses the history theoretical influences practices and impact of development education in Europe North America Australia and Japan Chapters include how development education evolved the influence of theorists such as Paulo Freire the practices of aid and development agencies and the impact of governments seeking evidence of public understanding of and engagement with development The Theory and Practice of Development Education provides essential reading for anyone engaged in re thinking and reflecting upon the educational needs of a globalised society and seeking approaches towards learning that place social justice at the heart of that practice It will be of particular interest to academics and postgraduate students in the fields of development education international education and globalisation

Education Fred Schultz, 1982 *No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005* Patrick J. McGuinn, 2006 Education is intimately connected to many of the most important and contentious questions confronting American society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance Elementary and secondary schooling has long been the province of state and local governments but when George W Bush signed into law the No Child

Left Behind Act in 2002 it signaled an unprecedented expansion of the federal role in public education This book provides the first balanced in depth analysis of how No Child Left Behind NCLB became law Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country s long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act chronicles the concerns raised by the 1983 report A Nation at Risk and shows how education became a major campaign issue for both parties in the 1990s McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict McGuinn traces the Republican shift from seeking to eliminate the U S Department of Education to embracing federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform
