Educational Review Nicholas Murray Butler, Frank Pierrepont Graves, Charles Alexander Nelson, 1926 **The Educational Ideas of Charles Fourier** David Zeldin, 2019-06-04 Originally published in 1969 this book aims to show that Charles Fourier has much to say that is of interest to modern educationists Fourier hardly ever figures in histories of education because only recent developments in educational practice have shown his ideas to be of topical and practical importance to the schoolteacher and the planner of today Fourier devised a system of education to suit a self indulgent democratic society in which children s energies could be used in ways which were both socially useful and personally rewarding He was a pioneer advocate of comprehensive education so as to establish harmony between classes He urged vocational training and guidance so as to establish harmony between men and their work He devised close links between education and industry to bring pleasure into both school and work and to integrate the two He was one of the first to plan social service to the community by children This prophetic though eccentric writer sometimes extravagant often amusing but always endearing who has already exerted much influence on socialist theory deserves to be better known by students of

education **Unauthorized Methods** Shirley Steinberg, Joe L. Kincheloe, 2012-11-12 This work makes accessible and practicable some of the best theoretical innovation in critical pedagogy of the last decade. Issues of knowledge are explored as the authors consider how an integration of popular culture and cultural studies into the lesson plan can enrich and reinvigorate the learning experience. These essays, ranging widely in topic and educational level, are based in theory but are practice oriented. In translating this theory, the contributors provide educators with techniques which will inform rather than oppress classroom skills.

How to Do Research in Education Carter Victor Good, 1928 Studies in Education National Society of College Teachers of Education, 1923 Medical Education and Medical Service William Allen Pusey, 1925

Christianity in Education F. H. Hilliard, William Roy Niblett, Ernest Gordon Rupp, 2012 The Christian churches have frequently pioneered educational advances from the seventh century down to the nineteenth. Schools, universities, and colleges of education stand as tangible evidence of these efforts. Do all these ventures belong merely to educational history, relics of the days when Christianity was influential enough to play a leading part in education? Or has Christianity still a distinctive contribution to make to educational thought and practice? The educationalists who contributed to the Hibbert Lectures of 1965 are convinced that it has. They examine the nature of this contribution and show how it is to be made a time when education seems to be mainly influenced by secular rather than religious assumptions and aims. The six lectures fall into two main parts. Christianity in the schools is the theme of the first three; Christianity in higher education that of the last three.

The Nature of Scientific Explanation Jude P. Dougherty, 2013-01-16 In his newest work, distinguished philosopher Jude P. Dougherty challenges contemporary empiricisms and other accounts of science that reduce it to description and prediction.
