**Writing in Public** Trevor Ross, 2018-11-01 What is the role of literary writing in democratic society Building upon his previous work on the emergence of literature Trevor Ross offers a history of how the public function of literature changed as a result of developing press freedoms during the period from 1760 to 1810 Writing in Public examines the laws of copyright defamation and seditious libel to show what happened to literary writing once certain forms of discourse came to be perceived as public and entitled to freedom from state or private control Ross argues that with liberty of expression becoming entrenched as a national value the legal constraints on speech had to be reconceived becoming less a set of prohibitions on its content than an arrangement for managing the public sphere The public was free to speak on any subject but its speech jurists believed had to follow certain ground rules as formalized in laws aimed at limiting private ownership of culturally significant works maintaining civility in public discourse and safeguarding public deliberation from the coercions of propaganda For speech to be truly free however there had to be an enabling exception to the rules Since the late eighteenth century Ross suggests the role of this exception has been performed by the idea of literature Literature is valued as the form of expression that in allowing us to say anything and in any form attests to our liberty Yet paradoxically it is only by occupying no definable place within the public sphere that literature can remain as indeterminate as the public whose self reinvention it serves

Architecture, Print Culture and the Public Sphere in Eighteenth-Century France Richard Wittman, 2007 This book focuses on the complex ways in which architectural practice theory patronage and experience became modern with the rise of a mass public and a reconfigured public sphere between the end of the seventeenth century and the French Revolution Presenting a fresh theoretical orientation and a large body of new primary research this book offers a new cultural history of virtually all the major monuments of eighteenth century Parisian architecture with detailed analyses of the public debates that erupted around such Parisian monuments as the east facade of the Louvre the Place Louis XV the Place de la Concorde and the church of Sainte Genevieve the Pantheon Depicting the passage of architecture into a mediatized public culture as a turning point and interrogating it as a symptom of the distinctly modern configuration of individual society and space that emerged during this period this study will interest readers well beyond the discipline of architectural history
