**The Pain Mothers Must Never Expose:** Michelann Parr, 2024-07-04 In this collection, contributors reject the narrative that suggests that the pain of mothers must never be exposed. They allow their pain to wander outside the frame of the requisite pathos. Individual pieces reveal pain to be a complex and intersectional practice that encompasses denial and disenfranchisement, where pain is birthed and named, disorientation leading to a search for stable ground, destabilization that inspires non-normative mothering and discovery as an active stance that transforms intergenerational pain. As contributors take up the challenge of unravelling their stories, they reach for a life-sustaining and hopeful shift in consciousness that allows them to listen to what pain has to offer without judgment, to imagine and create a different future for themselves, their children, and the world, and to let go of maternal pain and suffering as a way of being. Readers will be inspired by raw honesty, authenticity, and willingness to embrace story as a gift to self.

**Movies and the Modern Psyche** Sharon Packer MD, 2007-09-30 By looking at the interactions between cinema and psychology, Packer offers readers clear and basic insights into some of the most fundamental reasons why film is such an important influence upon our lives today. *Movies and the Modern Psyche* first describes the basic concepts of psychoanalysis, experimental psychology, behavioral conditioning, and hypnosis, which have all played major roles in the histories of both film and psychiatry. It then goes on to discuss the recent rise in film therapy, drug treatments, treatment for drug abuse, and the closing of asylums, to show how shifts in treatment techniques, theories, and settings are foreshadowed and fossilized by film. Psychology and cinema are kindred cousins, born at the same time and developing together, so that each influences the other. From the mind-controlling villains that occupy early horror films and Cold War thrillers like *Caligari*, *Mabuse*, and *The Ipcress File* to the asylums that house numberless political allegories and personal dramas in *Shock Corridor*, *Spellbound*, *One Flew over the Cuckoo's Nest*, and *Girl Interrupted*, to the drugs, phobias, and disorders that pervade so many of our favorite films, including as a small sample *Vertigo*, *Night of the Hunter*, *Psycho*, *Rainman*, *Fight Club*, *Requiem for a Dream*, and *Batman Begins*, there is no escaping either psychology in the movies or the movies in psychology. By looking at the interactions between cinema and psychology, this book offers readers clear and basic insights into some of the most fundamental reasons why film is such an important influence upon our lives today. *Movies and the Modern Psyche* first describes the basic concepts of psychoanalysis.
