Organisation and Complexity Jacco van Uden,2004-05 Students of organisation have used complexity theory in many different ways and for many different reasons What characterises the writings of most management thinkers however is that the authors are primarily concerned with the question of how to make this complexity thing work for us This study takes a rather different approach Ideas and concepts of the science of complexity are borrowed to develop the idea that organisations live lives of their own an idea that is very much at odds with the dominant view that understands organisations as tools that we use to realise certain goals To illustrate matters the book discusses the developments of the organisation of Vitesse a mediocre Dutch professional football club that according to its president needed to be transformed into a major player in the family entertainment industry

Psychosocial Pathways Towards Reinventing the South African University Sabrina Liccardo,2020-11-02 This book proposes a conceptual empirical framework for exploring forms of continuity and change along psychosocial pathways in South African universities It illustrates how the psychosocial pathways are grounded in the symbolic narratives and knowledges of young scientists engineers and architects all interlocutors in the research from which this book is based Alala Mamoratwa Welile Odirile Kaiya Amirah Takalani Nosakhele Naila Ambani Khanyisile Itumeleng Ethwasa and Kgnaya provide collective standpoints in the multiplicities within and between the lived lives and told stories of young Black South African women in Science Technology Engineering and Mathematics STEM fields In doing so this compelling work advances possibilities for demythologising scientific endeavour as a white male achievement and shifting knowledge communities across gendered racialised class and national divides This book presents an innovative narrative methodology utilising the myth of the Minotaur to examine the state of the university at the heart of the hierarchical labyrinth in post apartheid South Africa Throughout the work the author wrestles with and self reflexively highlights her own positionality as a white middle class South African woman to examine how this affects the production of this research in ways which serve to preserve the colonial knowledge system With the rise of the Rhodes Must Fall and Fees Must Fall student movement in South Africa demanding for the fall of institutionalised racial hierarchies the author uses the cover image of narrative formations in the spirit of exploration to think with and through undulating networked forms that could possibly forge new psychosocial pathways towards decolonising and reinventing South African universities This work offers a unique conceptual and methodological resource for students and scholars of psychosocial and narrative theory as well as those who are concerned about the politics of higher education both in South Africa and in other contexts around the world

The Paradox of Control in Organizations Philip Streatfield, 2003-09-02 Business leaders are expected to be in control of the situation in which their businesses find themselves But how can organizational leaders and managers control matters entirely out of their hands such as the next action a competitor takes or the next law a government may pass In this book Philip Streatfield reflects on his own experience as a manager to explore the question who or what is in control in an organization Adopting the perspective of complex responsive processes developed in the first two volumes of this series the author takes self organization and emergence as central themes in thinking about life in organizations He focuses on the tension between spontaneously forming patterns of conversation and intentional actions arguing that the order of organizations emerges through a combination of collective interaction and individual intentions The argument is developed by considering the day to day experiences of life in a large pharmaceutical organization SmithKline Beecham In today s organization managers find that they have to live with the paradox of being in control and not in control simultaneously It is this capacity to live with paradox and to continue to participate creatively in spite of not being in control that constitutes effective management

[Axial Shift](#) Benjamin Gussen, 2019-05-17 This book uses historical analysis constitutional economics and complexity theory to furnish an account of city subsidiarity as a legal ethical political and economic principle The book contemplates subsidiarity as a constitutional principle where cities would benefit from much wider local autonomy Constitutional economics suggests an optimal limit to

jurisdictional footprints territories This entails preference for political orders where sovereignty is shared between different cities rather states where capital cities dominate The introduction of city subsidiarity as a constitutional principle holds the key to economic prosperity in a globalizing world Moreover insights from complexity theory suggest subsidiarity is the only effective response to the problem of scale It is a fitness trait that prevents highly complex systems from collapsing The nation state is a highly complex system within which cities function as attractors The collapse of such systems would ensue if there were strong coupling between attractors Such coupling obtains under legal monism Only subsidiarity can make the eventuality of collapse improbable The emergent and self organizing properties of subsidiarity entail a shift in policy emphasis towards cities with a wide margin of autonomy
