Recording History Peter Martland, 2013 In *Recording History* Peter Martland uses a range of archival sources to trace the genesis and early development of the British record industry from 1888 to 1931. A work of economic and cultural history that draws on a vast range of quantitative data, it surveys the commercial and business activities of the British record industry like no other work of recording history has before. Martland's study charts the successes and failures of this industry and its impact on domestic entertainment. Showcasing its many colorful pioneers from both sides of the Atlantic, *Recording History* is first and foremost an account of The Gramophone Company Ltd, a precursor to today's recording giant EMI and then the most important British record company active from the late 19th century until the end of the second decade of the twentieth century. Martland's history spans the years from the original inventors through industrial and market formation and final take off, including the riveting battle in recording formats. Special attention is given to the impact of the First World War and the that followed in its wake. Scholars of recording history will find in Martland's study the story of the development of the recording studio of the artists who made the first records from which some like Italian opera tenor Enrico Caruso earned a fortune and the change records wrought in the relationship between performer and audience, transforming the reception and appreciation of musical culture. Filling a much needed gap in scholarship, *Recording History* documents the beginnings of the end of the contemporary international record industry.

America on Record Andre Millard, 1995-10-27 This study provides a history of sound recording from the acoustic phonograph to digital sound technology.
