Education And Democracy Re Imagining Liberal Learning In America:

Education and Democracy Robert Orrill, 1997 Liberal education has long been associated with a focus on so called great books drawn largely from the European past In sharp contrast this collection of essays explores the theory and practice of contemporary liberal education from the perspective of a distinctively American pragmatic tradition The result is a reimagined liberal education adapted to the needs of American democracy in the twenty first century **Democracy and Music Education** Paul Woodford, 2005 Counterpoints Music and Education Estelle R Jorgensen editor **Music Education in an Age of Virtuality and Post-Truth** Paul G. Woodford, 2018-10-25 This is a deliberately provocative book crossing many disciplinary boundaries and locating music and art education within a context of contemporary social and political problems in a time of growing disruption and authoritarianism Intended firstly for music teacher educators practicing music teachers and graduate and undergraduate music education majors the book also speaks to arts and media studies teachers parents or others interested in exploring how composing performing improvising conducting listening dancing teaching learning or engaging in music or education criticism are all political acts because fundamentally concerned with social values and thus inseparable from power and politics Among the book's central themes are the danger of democratic deconsolidation in the West and how music education can help counter that threat through the fostering of democratic citizens who are aware of music's ubiquity in their lives and its many roles in shaping public opinion and notions of truth and for better or for worse The arts can obviously be used for ill but as George Orwell demonstrated in his own work they can also be employed in defense of democracy as modes of political thought and action affording opportunities for the revitalization of society through its reimagining **New Perspectives in Service Learning** Andrew Furco, Shelley H. Billig, 2006-10-01 [Educating Citizens](#) Anne Colby, 2003-02-17 [Educating Citizens](#) reports on how some American colleges and universities are preparing thoughtful committed and socially responsible graduates Many institutions assert these ambitions but too few act on them The authors demonstrate the fundamental importance of moral and civic education describe how the historical and contemporary landscapes of higher education have shaped it and explain the educational and developmental goals and processes involved in educating citizens They examine the challenges colleges and universities face when they dedicate themselves to this vital task and present concrete ways to overcome those challenges Through a grand tour of American higher education [Educating Citizens](#) shows how institutions can equip students with the understanding motivation and skills of responsible and effective citizenship The book includes rich examples from in depth studies at twelve institutions and from a wide range of effective programs and approaches on other campuses The authors' guidelines for implementing these programs can be applied in the full range of higher education institutions [Educating Citizens](#) is essential reading for all who believe that higher education can play a critical role in the health of American democracy by helping students become responsible citizens of the nation the world and their own communities **Encountering Global Environmental Politics**

Smith,2010-07-10 Daryl G Smith s career has been devoted to studying and fostering diversity in higher education She has witnessed and encouraged the evolution of diversity from an issue addressed sporadically on college campuses to an imperative if institutions want to succeed In Diversity s Promise for Higher Education she analyzes how diversity is practiced today and offers new recommendations for effecting lasting and meaningful change Smith argues that in the next generation of work on diversity student population mix and performance will no longer be acceptable indicators of an institution s diversity effectiveness To become more relevant to society the nation and the world while remaining true to their core mission institutions must begin to see diversity like technology as central to teaching and research She proposes a set of practices that will help colleges and universities embrace diversity as a tool for institutional success This thoughtful volume draws on 40 years of diversity studies It offers both researchers and administrators an innovative approach to developing and instituting effective and sustainable diversity strategies

Facilitating Deep Learning Julian

Hermida, 2014-07-01 Deep learning is a committed approach to learning It is a process of constructing and interpreting new knowledge in light of prior cognitive structures and experiences which can be applied in new unfamiliar contexts Deep learning produces learning that lasts a lifetime and it results in better quality learning and profound understanding In contrast surface learning involves a dispassionate approach to learning The surface learner is not concerned with understanding Information acquired is usually lost after examinations and there is no profound understanding or knowledge construction Research studies show that most university and college students today take a surface approach to learning The purpose of this book is to show readers how to create a learning environment that promotes deep learning in their classes The book will do so by providing readers with the theoretical and pedagogical tools needed to Understand the notion of deep learning Design and implement courses that encourage students to take a deep approach to learning Design engaging and innovative teaching and learning activities that encourage students to use higher order cognitive skills to construct knowledge and negotiate meaning Implement assessment tools aimed at facilitating the deep learning process Support international and other nontraditional students to construct learning deeply The book begins with an examination of the big picture the institutional constraints that hinder a culture of deep learning From there it deconstructs the concept of deep learning and it examines every element of the deep learning process It also discusses the factors that contribute to produce a deep learning environment The rest of the chapters are about how to facilitate deep learning The book examines every component of the teaching and learning system goals performances and evaluation It discusses strategies and methods that teachers can adopt to help students learn how to read and write in their disciplines in a deep way The book also discusses the notion of inclusive deep learning environments which focus on engaging nontraditional students *Transforming*

Reconstructing the "Uni-versity" Harvey J. Graff, 2025-09-14

Slogans, myths, and isolated anecdotes are inadequate substitutes for documented history and contextual understanding. Literature on the history of higher education is dominated by ahistorical and contextually ignorant slogans. Seldom acknowledged in discussions of the decline or failure of the modern university is 1 how long it has been going on at least since the 1960s and 2 universities' own complicity in this long, complicated, and contradictory process. Myths intertwine inseparably with slogans to echo yet another lost cause. Our collective as well as individual pasts provide essential lessons if we know how to read and learn from them. More complicated is imagining a plausible better future for universities. In *Reconstructing the University: From the Ashes of the Mega and Multi-University to the Futures of Higher Education*, Harvey J. Graff, bringing experience from over 50 years as a professor, provides an accurate history of higher education, redefining the issues and terms to establish a new agenda.

Knowledge for Social Change Lee Benson, 2017-07

Employing history, social theory, and a detailed contemporary case study, *Knowledge for Social Change* argues for fundamentally reshaping research universities to function as democratic, civic, and community-engaged institutions dedicated to advancing learning and knowledge for social change. The authors focus on significant contributions to learning made by Francis Bacon, Benjamin Franklin, Seth Low, Jane Addams, William Rainey Harper, and John Dewey, as well as their own work at Penn's Netter Center for Community Partnerships to help create and sustain democratically engaged colleges and universities for the public good. *Knowledge for Social Change* highlights university-assisted community schools to effect a thoroughgoing change of research universities that will contribute to more democratic schools, communities, and societies. The authors also call on democratic-minded academics to create and sustain a global movement dedicated to advancing learning for the relief of mankind's estate, an iconic phrase by Francis Bacon that emphasized the continued betterment of the human condition and to realize Dewey's vision of an organic Great Community composed of participatory, democratic, collaborative, and interdependent societies.
