Education Culture And Values:

Education Culture And Human Values V.C. Pandey, 2005-01-01 The work is a very informative systematic presentation of education culture and human values in a simple and lucid language drawing examples from various educational systems It critically analyses the subject and includes syllabi of several universities **Values, Culture and Education** Jo Cairns, Denis Lawton, Roy Gardner, 2001 First Published in 2000 Routledge is an imprint of Taylor Francis an informal company *Education, Culture and Values* Mal Leicester, Celia Modgil, Sohan Modgil, 2000 *Values in Philippine Culture and Education* Manuel B. Dy, 1994 *Values and Educational Leadership* Paul Thomas Begley, 1999-08-17 Studies values and their influences in educational leadership **Values in Education** Graham Haydon, 2007-02-15 What are the fundamental aims and values underlying education What values should education try to promote in a world of value pluralism What is morality and should schools teach it In a secular society how should schools treat the links between morality and religion How should values enter into professional education and educational leadership This book an updated edition of Teaching about Values will help the reader to think about these questions and many others concerning values in education Drawing on philosophy without assuming knowledge of the subject it is for teachers students of education and anyone who recognises the importance of values in education *Values Education and Quality Teaching* Terence Lovat, Ron Toomey, 2009-04-07 Some revision of public schooling history is necessary to challenge the dominant mythology that public schools were established on the grounds of values neutrality In fact those responsible for the foundations of public education in Australia were sufficiently pragmatic to know that its success relied on its charter being in accord with public sentiment Part of the pragmatism was in convincing those whose main experience of education had been through some form of church based education that state based education was capable of meeting the same ends Hence the documents of the 1870s and 1880s that contained the charters of the various state and territory systems witness to a breadth of vision about the scope of education Beyond the standard goals of literacy and numeracy education was said to be capable of assuring personal morality for each individual and a suitable citizenry for the soon to be new nation As an instance the NSW Public Instruction Act of 1880 cf NSW 1912 under the rubric of religious teaching stressed the need for students to be inculcated into the values of their society including understanding the role that religious values had played in forming that society's legal codes and social ethics The notion therefore that public education is part of a deep and ancient heritage around values neutrality is mistaken and in need of serious revision The evidence suggests that public education's initial conception was of being the complete educator not only of young people's minds but of their inner character as well *Education, Cultures, and Economics* Angela W. Little, Fiona E. Leach, 2013-06-17 This edited volume reviews the conflict between economic prescriptions for improved education in the developing world and local cultures Among the issues reviewed are conceptions of culture and economics in development and education literature economic considerations of school systems to promote

Education, Culture and Epistemological Diversity Claudia W. Ruitenberg,D.C. Phillips,2011-09-24 In the recent educational research literature it has been asserted that ethnic or cultural groups have their own distinctive epistemologies and that these have been given short shrift by the dominant social group Educational research then is pursued within a framework that embodies assumptions about knowledge and knowledge production that reflect the interests and historical traditions of this dominant group In such arguments however some relevant philosophical issues remain unresolved such as what claims about culturally distinctive epistemologies mean precisely and how they relate to traditional epistemological distinctions between beliefs and knowledge Furthermore can these ways of establishing knowledge stand up to critical scrutiny This volume marshals a variety of resources to pursue such open questions in a lively and accessible way a critical literature review analyses from philosophers of education who have different positions on the key issues a roundtable discussion and interactions between the two editors who sometimes disagree It also employs the work of prominent feminist epistemologists who have investigated parallel issues with sophistication This volume does not settle the question of culturally distinctive epistemologies but teases out the various philosophical sociological and political aspects of the issue so that the debate can continue with greater clarity Systems of Education

book explores to what extent transnational influences change national local values and practices in the Nordic educational systems It provides country cases and thematic chapters that give nuanced insights into the influence of transnational agencies on national governance and discourses It describes how national discourses and regulation influences school leadership values culture and practice in competition with traditional values The transnational and global discourse on educational leadership is mostly formed according to Anglo American thinking and tradition Pivotal foundations of this discourse are strong hierarchical societies class societies with liberal democracies and clearly streamed education systems The Nordic discourse however builds on a more equal society and flat hierarchies with participatory democracy and on comprehensive schooling with strong local community roots Leadership thinking and practices are formed by the culture and context they are part of they are primarily shaped by the national local values traditions and practices and only partially shaped by politics discourses and literature Due to the fact that a great deal of the literature that is being used in the Nordic contexts is of Anglo American origin and many of the research projects have Anglo American foundations it is difficult to distinguish the sources for leadership thinking and practice This book distinguishes the Nordic from the Anglo American thinking and presents important findings and arguments for leadership practitioners inside as well as outside the Nordic countries
