## **Education Of A French Model:**

**Chinese Education Models in a Global Age** Chuing Prudence Chou,Jonathan Spangler,2016-04-06 China's rise and an increasing emphasis on international education benchmarking and a global recognition of East Asian countries' success in this regard have brought the issue of Chinese education to the forefront of public consciousness. In particular, the concept of a Chinese education model is one that has sparked debate and quickly become a major focus of education research around the world, especially in light of regional achievements vis-à-vis university rankings, bibliometric indices, the Programme for International Student Assessment (PISA), Trends in International Mathematics and Science Study (TIMSS), and other such benchmarks. *Chinese Education Models in a Global Age* tackles this controversial issue head-on by synthesizing a diversity of analyses from a world-class team of twenty-seven authors. It reveals that Chinese education models, which are present in many different geographic and institutional contexts, have an important influence on social and institutional norms as well as individual belief systems and behaviors in China and beyond. The first of its kind, this edited volume establishes a foundation for future research while providing a nuanced and tightly integrated compilation of differing perspectives on the role and impact of Chinese education models worldwide. It is essential reading for all scholars, policymakers, students, parents, and educators interested in the rising demographic and economic influence of people of Chinese descent on education around the world.

**The Nordic Education Model in Context** Daniel Tröhler, Bernadette Hörmann, Sverre Tveit, Inga Bostad, 2022-08-15 Tracing historical and cultural factors which gave rise to the Nordic Education Model, this volume explores why Northern European education policy has become an international benchmark for schooling. The text explains the historical connection between a Nordic ideal of democracy and schooling and indicates how values of equality, welfare, justice, and individualism might be successfully integrated in national school systems and curricula around the world. The volume also highlights recent debates around the longevity of the Nordic model and explores the risks and challenges posed by international policy and assessment agendas. Exploring how Nordic education policies successfully merge social equity with academic excellence, the book combines cultural, historical, sociological, and philosophical analysis with a deep exploration of curriculum and teaching. This book will be of great interest to researchers, scholars, and postgraduates working across the fields of curriculum, comparative education, cultural studies, and history, and philosophy of education and education policy.
