**Design: People & Processes & Products & Philosophy** Rita Almendra, João Ferreira, 2020-05-27 Design is about the creation of meaningful connections to solve problems and advance human wellbeing the discipline has always explored the beneficial links between form and function technology and meaning beauty and utility people and artefacts and problems and solutions among others This book focuses on the crucial connection between design research and design education Contemporary society grows increasingly hyper complex and globally competitive This state of affairs raises fundamental questions for both Design Education and Design Research Should research skills be integrated into undergraduate courses How can we modify design courses without compromising the positive aspects of the educational studio experience Can the three cycles of higher education in design be combined into a creative and inquisitive educational continuum To examine the relationship between research and education in Design we must address the topic of knowledge keeping in mind that the development and dissemination of new and useful knowledge is the core purpose of a University If we agree that design has its own things to know and ways to find out about them then design knowledge resides in people processes products and philosophy This book explores the intersection of these four areas with the aim of uncovering insights to advance the current state of the design discipline

**Learner-Centered Design of Computing Education** Mark Guzdial, 2022-05-31

Computing education is in enormous demand Many students both children and adult are realizing that they will need

programming in the future This book presents the argument that they are not all going to use programming in the same way and for the same purposes What do we mean when we talk about teaching everyone to program When we target a broad audience should we have the same goals as computer science education for professional software developers How do we design computing education that works for everyone This book proposes use of a learner centered design approach to create computing education for a broad audience It considers several reasons for teaching computing to everyone and how the different reasons lead to different choices about learning goals and teaching methods The book reviews the history of the idea that programming isn t just for the professional software developer It uses research studies on teaching computing in liberal arts programs to graphic designers to high school teachers in order to explore the idea that computer science for everyone requires us to re think how we teach and what we teach The conclusion describes how we might create computing education for everyone
