Educational Documents Stuart Maclure, 1968 *Education in England and Wales* Franklin Parker, Betty June Parker, 2018-02-06 Originally published in 1991 this title was begun just before passage of the Education Reform Act of 1988 ERA 88 which was implemented in the 1990s This major act along with still in force provisions of the 1944 Education Act with its 17 amendments comprises the statutes governing education in England and Wales The study reflects both the criticism and the praise showered on that important legislation particularly in the Brief History and School Structure sections and in Chapter 1 with its longer than usual annotations on ERA 88 Education Documents D. W. Sylvester, 2016-07-22 These collections of documentary material illustrate the main themes of educational history from the early middle ages to the late twentieth century It contains extensive extracts from every major educational document of this period including royal and parliamentary commissions Each document is supported by short commentaries and an annotated bibliography Whilst the main theme is the creation of a genuine national education system the volumes also address the relations between church and state in education teacher training the progressive development from elementary to primary and secondary education for all and the growth of technical education from a private to a public activity Educational documents , 1968 *Education Since 1800* Ivor Morrish, 2013-10-28 Originally published in 1970 this volume provides a survey of the wide field of the development of education since 1800 The book is structured as follows Part One The General Development of Popular Education English Elementary Education the Development of Primary Education English Secondary Education Part Two Specific Topics in Education Independent Private and Public Schools Technical and Technological Education The Universities Teacher Training Further and Adult Education The Youth Services Part Three Educational Thinkers Johann Friedrich Herbart 1776 1841 Friedrich Froebel 1782 1852 Froebelianism and Montessori John Dewey 1859 1952 **Education in Nineteenth-Century British Literature** Sheila Cordner, 2016-04-20 Sheila Cordner traces a tradition of literary resistance to dominant pedagogies in nineteenth century Britain recovering an overlooked chapter in the history of thought about education This book considers an influential group of writers all excluded from Oxford and Cambridge because of their class or gender who argue extensively for the value of learning outside of schools altogether From just beyond the walls of elite universities Jane Austen Elizabeth Barrett Browning Thomas Hardy and George Gissing used their position as outsiders as well as their intimate knowledge of British universities through brothers fathers and friends to satirize rote learning in schools for the working classes as well as the education offered by elite colleges Cordner analyzes how predominant educational rhetoric intended to celebrate England s progress while simultaneously controlling the spread of knowledge to the masses gets recast not only by the four primary authors in this book but also by insiders of universities who fault schools for their emphasis on memorization Drawing upon working men s club reports student guides educational pamphlets and materials from the National Home Reading Union as well as recent work on nineteenth century theories of reading Cordner

unveils a broader cultural movement that embraced the freedom of learning on one's own *Schooling and Social Change 1964-1990* Roy Lowe, 2002-01-04 This is the first book to offer an overview of the ways in which the sweeping social and economic changes of the modern period have impacted on the education system Roy Lowe draws on extensive research to paint a vivid picture of the ways in which schools and universities were moulded by external events and of the part they played in promoting modernisation of society The book explores some key themes the nature of the economic transformations taking place the growing awareness of gender issues the changing ethnic composition of modern Britain the bureaucratisation of society and the rise of a new politics Exploring the links between these issues and educational provision Lowe argues that the growing political significance of educational issues is largely explained by the critical part played by the education system in providing social and economic stability during these years of swift social change Roy Lowe is Professor of Education at the University of Wales Swansea **Sound Beginnings** Pamela May, Erica Ashford, Gillian Bottle, 2018-09-18 By celebrating the spirit and principles that are enshrined in the Curriculum Guidance for the Foundation Stage DfES 2000 this book describes how children learn and develop best in good Early Years practice It encourages the practitioner to take a step back from their day to day routines and objectives and instead focus on the child and how to

the Early Eighteenth Century Jeffrey Wigelsworth, 2018-06-26 In the first detailed history of All Souls College under the Wardenship of Bernard Gardiner Jeffrey R Wigelsworth offers a character driven story that addresses scheming duplicity and self righteousness projected against some of the most important political and religious episodes of the early eighteenth century and the people who animated them Throughout this book Wigelsworth illuminates the ways in which All Souls and its warden were caught between competing visions of what England and consequently Oxford would look like in the aftermath of the Glorious Revolution of 1688

The Rise of a Central Authority for English Education A. S. Bishop, 1971-03-02 This book traces the nineteenth century formation growth and structure of the central authority for education in England The author uses a wide variety of published and unpublished material and describes the influences religious social political and economic and others that moulded the authority He considers the effect of the form of the three bodies that originally held authority for education the Education Department the Science and Art Department and the Charity commission on educational provision and progress throughout the Victorian era In particular the author considers the impact of the machinery of government on the developing educational system Dr Bishop discusses such questions as to what extent was the provision and content of institutionalized education determined by essentially administrative considerations What factors caused the fragmentation of such educational services as were then provided and was the lack of unity of supervision at the centre the product of chance or design

From virtue to venality Peter Jones, 2016-05-16 From virtue to venality examines the problem of corruption in British urban society and politics between 1930 and 1995 It is not a conventional study of the politics of local government since it seeks to place corruption in urban societies in a wider cultural context The accounts of corruption in Glasgow a British Chicago as well as the major corruption scandals of John Poulson and T Dan Smith show how Labour controlled towns and cities were especially vulnerable to corrupt dealings By contrast the case of Dame Shirley Porter in the City of Westminster in the late 1980s reveals that Conservative controlled councils were also vulnerable since in London the stakes of the political struggle were especially intense This book will be of special interest to students of history and politics and those who are concerned about the growth of corruption in British political culture

vital importance to students of social administration and include the relationship between welfare capitalism and the social services the definition of need the distribution of resources professionalism and the structure of the social services and the question of consumer influence and the balance of power in the provision social services Designed especially for teachers and students of social administration this is a lucid exploration of the philosophy and concepts which are relevant to the discipline of social administration It offers a framework for the subject which transcends the study of individual services on which most of the literature is based

The Literature of Education W. Kenneth Richmond, 2019-01-15 Original blurb The volume of writing on educational topics has increased so prodigiously in recent years that the student is likely to lose himself in a sea of print This may lead him to opt for the first book that comes to hand or waste time rifling through half a dozen when a thorough grasp of one key text is all that is needed Reading lists commonly look impressive not to say daunting In fact the multifarious titles conceal an enormous amount of duplication an endless raking over of other people's research findings It is a safe bet writes W Kenneth Richmond that less than 5 percent of the contents of any new book on education will be in any way original This critical bibliography originally published in 1972 is concerned with the noteworthy books and major official reports that had appeared in the English language during the twenty five years prior to publication In his introduction and in the commentaries prefacing each section the author explains the background to the genuinely new departures of the period and describes successive changes in the climate of educational opinion
