Around the time of the Great Depression however the Southwest suddenly became integrated into a much larger economic and cultural system Audrey Goodman examines how since that time these southwestern landscapes have come to reveal the resulting fragmentation of identity and community Through analyzing a variety of texts and images Goodman illuminates the ways that modern forces such as militarization environmental degradation internal migration and an increased border patrol presence have shattered the perception of a secure homeland in the Southwest The deceptive natural beauty of the Southwest deserts shields a dark history of trauma and decimation that has remained as a shadow on the region's psyche The first to really synthesize such wide ranging material about the effects of the atomic age in the Southwest Goodman realizes the value of combined visual and verbal art and uses it to put forth her own original ideas about reconstructing a new sense of homeland *Lost Homelands* reminds us of the adversity and dislocation suffered by people of the Southwest by looking at the ways that artists photographers filmmakers and writers have grappled with these problems for decades In assessing the ruination of the region however Goodman argues that those same artists and writers have begun to reassemble a new sense of homeland from these fragments

Wyoming Grasslands Frank H. Goodyear,Charles R. Preston,2015-07 Naturalist John James Audubon found the Great Plains and their wildlife so riveting when he visited the region in 1834 that he broke off a letter to his wife because he was too excited to write In the almost two hundred years since then the Wyoming landscape deemed the Italy of America by landscape painter Albert Bierstadt has retained its glory if not its place in the imagination of the American public This book reminds us of the remarkable bounty contained in the wild beauty and rich history of the Wyoming grasslands even as these riches are under threat from both human and natural forces This landscape is now captured in all its spectacular diversity in the photography of Michael P Berman and William S Sutton two of the modern American West s most accomplished and well known landscape photographers Essays by Frank H Goodyear Jr and Charles R Preston provide a

contextual framework for the images Goodyear introduces us to the imagery of the American West and explains the place of Berman's and Sutton's work within that tradition and Preston focuses on the natural history of the grasslands illuminating the area's ecological diversity and changes through the seasons and over the years In 2012 Berman and Sutton launched their massive Wyoming Grasslands Photographic Project a partnership between The Nature Conservancy Wyoming Chapter and the Buffalo Bill Center of the West Working in the tradition of late nineteenth century explorers and photographers of the American West Berman and Sutton shot more than 50 000 digital photographs of Wyoming prairie from the Red Desert of southwestern Wyoming to the Thunder Basin National Grassland of the state's northeastern corner The best of their extraordinarily sensitive revealing and powerful images appear in these pages documenting the sweep and the seasons of the Wyoming landscape In eloquent words and pictures including a foreword by environmental historian Dan Flores Wyoming Grasslands offers dramatic proof of how the land that inspired the likes of Audubon and Bierstadt while having altered over time still holds and demands our attention
