skills do not involve just speaking clearly to someone but also has to do with the interaction that occurs while both speaking and listening to your intended audience

Body languageThe way your body reacts while you are talking is a better indicator of your confidence than the strength and tone of your voice You could be extremely confident of your grasp of the facts but if you can't maintain eye contact or your body shies away from the person you are communicating with you look like you are not confident in your message When talking to anyone at work be it a boss co worker employee or customer remember to maintain your eye contact naturally while you are talking Also avoid crossing your arms when you are talking It is a classic defensive posture and people will unconsciously notice and feel uneasy around you Finally remember to relax Evident signs of nervousness will also distract the listener take the focus of your message and make you look less authoritative

ListeningThe other side of effective communication skills is the ability to listen attentively Most people are great talkers but like to hear themselves talk so much they forget to listen to other people Always try to avoid interrupting as this only shows that you are not listening or taking what others have to say seriously If you find are unclear about what was just said then wait for the speaker to finish and repeat back what you understood just to be sure This shows that you are attentive and offers the opportunity to correct any misunderstandings Find out more in this ideal guide book that will give you solutions and results quickly Scroll up and click the Buy Now button to get started instantly Order the Paperback version and receive the Kindle version for FREE today
