This book is an extended argument for the critical importance which justice and ethical leadership should have in business ethics education The book examines the history of ideas and purposes in education the contemporary role of business schools and the social foundations of moral education to conclude that the pragmatic pursuit of the good must be a central aim of business strategy To meet the challenges of facing society today the masters of business must be moral craftsmen in a just and democratic private property economy that serves the common good The author grounds this vision for business leadership in the centrality of systems of exchange in human society in generating prosperity and providing for the general welfare Business ethics education has focused primarily on moral formation of individual leaders and managers in the context of ethical codes organizational culture and legal compliance Important as this approach is it fails to generate a sufficient level of business responsibility to satisfy legitimate social concerns regarding the use of natural resources environmental sustainability reasonable limitation of systemic risk in capital markets and fair allocation of goods and services If the social purpose of business is not intentionally embraced and diligently pursued the economy may enrich a few but impoverish the society its resources and its democracy Hence this book argues for a new vision of business ethics that is grounded in public accountability of business operations and outcomes for the common good as a matter of justice      *The*
