Approaches to

Language: Data, Theory, and Explanation Ángel J. Gallego, Aritz Irurtzun, 2020-12-24 The study of language has changed substantially in the last decades. In particular, the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers' judgments, surveys, corpus studies, or fieldwork. This move is an enriching feature of contemporary linguistics, allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact. Chomsky 2005. This has generated some sort of divergence not only in research approaches but also in the phenomena studied with an increasing specialization between subfields and accounts. At the same time, it has also led to subfield isolation and methodological *a priori* with some researchers even claiming that theoretical linguistics has little to offer to cognitive science. See for instance Edelman, Phillips, den Dikken, Bernstein, Tortora, Sprouse, Schtze, Phillips 2013.

Deaf Cognition Marc Marschark, Peter C. Hauser, 2008-06-30 Deaf Cognition examines the cognitive underpinnings of deaf individuals' learning. Marschark and Hauser have brought together scientists from different disciplines which rarely interact to share their ideas and create this book. It contributes to the science of learning by describing and testing theories that might either over- or underestimate the role that audition or vision plays in learning and memory and by shedding light on multiple pathways for learning. International experts in cognitive psychology, brain sciences, cognitive development, and deaf children offer a unique integrative examination of cognition and learning with discussions on their implications for deaf education. Each chapter focuses primarily on the intersection of research in cognitive psychology, developmental psychology, and deaf education. The general theme of the book is that deaf and hearing individuals differ to some extent in early experience, brain development, cognitive functioning, memory organization, and problem solving. Identifying similarities and differences among these domains provides new insights into potential methods for enhancing achievement in this traditionally underperforming population. *The Routledge Companion to Education* James Arthur, Andrew Peterson, 2013-07-23 The Routledge Companion to Education presents the most comprehensive up-to-date guide available to the major topics and theories in education. Forty specially commissioned chapters covering all aspects of education introduce you to the key thinkers, events, ideas, research, and issues that have shaped the field of education.

Synergies of English for Specific Purposes and Language Learning Technologies Milorad Tošić, 2017-06-23 Bilingualism and multilingualism both make a major contribution in cross-cultural interaction but at the same time improve various cognitive abilities such as better attention and multitasking. Meaning in the world around us is represented by means of the language that is used for communication and knowledge exchange between intelligent individuals. The phenomena of human interaction and communication are recently experiencing unprecedented influence from digital technologies. Language learning is part of the global revolution meaning that language learning technologies are playing an increasingly important role in learning English for Specific Purposes. This volume addresses theoretical and practical aspects of learning technology adoption and pedagogy.

in the context of English for Specific Purposes **Family Language Transmission** Brigitte E. Lambert, 2008 This book examines the whys and wherefores of family language transmission from the perspective of parents as language planners and managers of their linguistic resources It draws on a qualitative interview based study of twenty families in which German is was or could have been the target language Successive census analyses have charted a marked decline in the number of German speakers in Australia indicating that motivation for transmitting German has waned The situations where it is presently being transmitted are therefore particularly interesting Data analysis was facilitated by a decision map depicting the planning implementation and outcome phases of the transmission undertaking The main findings show that the parents decision is negotiated around their own needs interests and ambitions in terms of child focussed reciprocal and parent centred motives These in turn are linked to transmission strategies and the linguistic outcomes for the children Through an understanding of the motivational issues arising in this context it will hopefully be possible to better predict the effectiveness of the transmission strategies presently applied *American Book Publishing Record* ,2004 *Task-Based Instruction for Teaching Russian as a Foreign Language* Svetlana V. Nuss, Wendy Whitehead Martelle, 2022-03-09 Task Based Instruction for Teaching Russian as a Foreign Language presents the most recent developments in the field of task based language teaching TBLT and highlights impactful research based instructional practices of applying TBLT for the teaching of Russian This comprehensive volume extends the current understanding of the nature and role of tasks in course development authenticity in task design the role of the instructor in TBLT teaching culture through TBLT the intersection of complex morphology and explicit grammar instruction with task based approaches collaborative interaction within TBLT and technology mediated tasks This resource focuses on the unique set of factors and challenges that arise when applying TBLT in the instruction of Russian and other morphologically rich languages This edited volume will be of interest to teachers of Russian as well as researchers in Russian language acquisition language pedagogy and Slavic applied linguistics *Resources in Education* ,1996 **Linguistics and Language Behavior Abstracts** ,2008 **Research in Education** ,1974 The British National Bibliography Arthur James Wells, 2003 El-Hi Textbooks and Serials in Print ,1985 **ERIC Educational Documents Index, 1966-69: Minor descriptors and author index** ,1970 **DSH Abstracts** ,1971 *The Routledge International Handbook of Young Children's Thinking and Understanding* Sue Robson, Suzanne Flannery Quinn, 2014-11-13 This ground breaking handbook provides a much needed contemporary and authoritative reference text on young children s thinking The different perspectives represented in the thirty nine chapters contribute to a vibrant picture of young children their ways of thinking and their efforts at understanding constructing and navigating the world The Routledge International Handbook of Young Children s Thinking and Understanding brings together commissioned pieces by a range of hand picked influential international authors from a variety of disciplines who share a high public profile for their specific developments in the theories of children s thinking learning and understanding The handbook is organised into four complementary parts
