

GRAPHIC DESIGN PART IN THE POST-DIGITAL AGE

A SURVEY OF
PRACTICES FUELLED BY :
CREATIVE CODING :

20+ INTERVIEWS

Graphic Design in the Post-Digital Age examines the challenges and opportunities in the wake of the rapid rise of creative coding within a growing community of designers opting to make their own design tools. This comprehensive overview covers educational approaches in design programs and the historic and economic contexts of programming in graphic design, as well as the implications surrounding the integration of coding with design. The book includes over twenty interviews in which major figures in design reflect upon the ways in which coding has innovated and transformed their design practice and strategies, and the direction it will take in the future.

Digital Design Theory Helen Armstrong, 2016-06-28 Digital Design Theory bridges the gap between the discourse of print design and interactive experience by examining the impact of computation on the field of design As graphic design moves from the creation of closed static objects to the development of open interactive frameworks designers seek to understand their own rapidly shifting profession Helen Armstrong's carefully curated introduction to groundbreaking primary texts from the 1960s to the present provides the background necessary for an understanding of digital design vocabulary and thought Accessible essays from designers and programmers are by influential figures such as Ladislav Sutnar Bruno Munari Wim Crouwel Sol LeWitt Muriel Cooper Zuzana Licko Rudy VanderLans John Maeda Paola Antonelli Luna Maurer and Keetra Dean Dixon Their topics range from graphic design's fascination with programmatic design to early strivings for an authentic digital aesthetic to the move from object based design and to experience based design Accompanying commentary assesses the relevance of each excerpt to the working and intellectual life of designers

The Craft of Scientific Writing Michael Alley, 2013-04-18 In October 1984 the weak writing in a scientific report made national news The report which outlined safety procedures during a nuclear attack advised industrial workers to don heavy clothes and immerse themselves in a large body of water The logic behind this advice was sound Water is a good absorber of heat neutrons and gamma rays Unfortunately the way the advice was worded was unclear Was everyone supposed to come up for air Be completely submerged The writing conveyed the wrong impression to the public The report came across as saying go jump in a lake not the impression you want to give someone spending thousands of dollars to fund your research Chances are that Dan Rather will not quote your documents on national television Still your writing is important On a personal level your writing is the way in which people learn about your work When you communicate you receive credit for your work When you do not communicate or are too slow to communicate the credit often

goes to someone else On a larger level your writing and the writing of other scientists influence public policy about science and engineering
