The 29 revised full papers presented were carefully selected and reviewed from 78 submissions. The papers are solicited describing original results on all aspects of graph theoretic concepts in Computer Science e.g. structural graph theory, sequential, parallel, randomized, parameterized and distributed graph and network algorithms and their complexity, graph grammars and graph rewriting systems, graph based modeling, graph drawing and layout, random graphs, diagram methods and support of these concepts by suitable implementations. The scope of WG includes all applications of graph theoretic concepts in Computer Science including data structures, data bases, programming languages, computational geometry, tools for software construction, communications, computing on the web, models of the web and scale free networks, mobile computing, concurrency, computer architectures, VLSI, artificial intelligence, graphics, CAD, operations research and pattern recognition.

Graph-Theoretic Concepts in Computer Science Rolf H. Möhring, 1997-10-29 This book constitutes the carefully refereed post proceedings of the 22nd International Workshop on Graph Theoretic Concepts in Computer Science WG 96 held in Cadenabbia Italy in June 1996. The 30 revised full papers presented in the volume were selected from a total of 65 submissions. This collection documents the state of the art in the area. Among the topics addressed are graph algorithms, graph rewriting, hypergraphs, graph drawing, networking, approximation and optimization, trees, graph computation and others.

Graph-Theoretic Concepts in Computer Science Gunther Schmidt, Rudolf Berghammer, 1992-01-29 This volume contains contributions to the 17th International workshop on Graph Theoretic Concepts in Computer Science WG 91 held in Southern Bavaria in June 1991. These annual workshops are designed to bring together researchers using graph theoretic methods to discuss new developments relating to or emerging from a diversity of application fields. The topics covered in this volume include tree related problems, graph grammars and rewriting, complexity, computational geometry, parallel algorithms, vertex orderings, path oriented algorithms, applications to VLSI and disjoint cycle problems.

Graph-Theoretic Concepts in Computer Science Christophe Paul, Michel Habib, 2009-12-03 The 35th International Workshop on Graph Theoretic Concepts in Computer Science WG 2009 took place at Montpellier France June 24-26, 2009. About 80 computer scientists from all over the world (Australia, Belgium, Canada, China, Czech Republic, France, Germany, Greece, Israel, Japan, Korea, The Netherlands, Norway, Spain, UK, USA) attended the conference. Since 1975 it has taken place 20 times in Germany, four times in The Netherlands, twice in Austria, as well as once in Italy, Slovakia, Switzerland, the Czech Republic, France, Norway and the UK. The conference aims at uniting theory and practice by demonstrating how graph theoretic concepts can be applied to various areas in computer science or by extracting new

problems from applications The goal is to present recent research results and to identify and explore directions of future research The conference is well balanced with respect to established researchers and young scientists There were 69 submissions Each submission was reviewed by at least three and on average four Program Committee members The Committee decided to accept 28 papers Due to the competition and the limited schedule some good papers could not be accepted The program also included excellent invited talks on given by Daniel Kr

Algorithms for Classes of Graphs with Bounded Expansion the other by David Eppstein on Graph

Theoretic Solutions to Computational Geometry Problems The proceedings contains two survey papers on these topics

Graph-Theoretic Concepts in Computer Science Hans L. Bodlaender, 2003-10-27 The 29th International Workshop on Graph Theoretic Concepts in Computer Science WG2003 was held in the Mennorode conference Center in Elspeet The Netherlands The workshop was organized by the Center for Algorithmic Systems of the Institute of Information and Computing Sciences of Utrecht University The workshop took place June 19-21, 2003 The 72 participants of WG 2003 came from universities and research institutes from 18 different countries and several different continents The workshop looks back at a long tradition It was first held in 1975 and has been held 20 times in Germany twice in Austria and once in Italy Slovakia Switzerland and the Czech Republic and has now been held for the third time in The Netherlands The workshop aims at uniting theory and practice by demonstrating how graph theoretic concepts can be applied to various areas in computer science or by extracting new problems from applications It is devoted to the theoretical and practical aspects of graph concepts in computer science The goal is to present recent research results and to identify and explore directions of future research The talks given at the workshop showed how recent research results from algorithmic graph theory can be used in computer science and which graph theoretic questions arise from new developments in computer science **Graph-Theoretic**
