Williams, 2025-03-16 This volume investigates the methods and techniques used to investigate expressivity a term used to describe linguistic phenomena that serve an expressive function and deliver sensory information about an event entity or other culturally determined category through a set of grammatical resources The study of expressivity has gradually grown in stature over the last decade in particular while there are much earlier accounts of expressivity particularly within descriptive traditions of African East Asian and European linguistics modern linguistic theory has been rather slow to incorporate information regarding these forms and processes into contemporary dialogue In many earlier grammars discussion of expressive elements such as ideophones and mimetics was relegated to footnotes at best This is no longer the case in modern linguistic documentation and description necessitating new fieldwork methods and analytical tools The chapters in this book represent a new stage in the history of

the study of expressivity they explore a variety of different expressive items from a wide range of languages focusing on the question of how to capture expressivity in language and culture      **Grasshoppers and Grassland Health** Jeffrey A.
