

What does 'grassroots' mean, anyway?

Grassroots means coming from, led by, and accountable to the people most impacted by a problem.

In the case of our ecological crisis, **those most impacted are frontline communities or those bearing the brunt of the impacts from extractive industries** and most directly affected by climate chaos, often Indigenous Peoples, women, peasant farmers, and youth.

Grassroots organizing has been a central strategy of almost every major social and economic transformation in world history. It builds people power and creates change across geographies and sectors.

From the Ground Up Carol A. Chetkovich, Frances Kunreuther, 2006 Grassroots social change organizations are a critical resource for progressive movement building in the United States They provide political education and sites for constituent engagement and they are beginning to create networks across issues and or communities they promote home grown leadership among groups that have been disadvantaged they contribute to a shared understanding of the problems of inequality and injustice and they offer a public space for the dialogue needed to identify common principles From the Ground Up From community organizing for affordable housing in neglected neighborhoods to providing antiviolence training for youth or litigating for the rights of sex workers grassroots organizations are engaged in energetic efforts to increase the power of marginalized groups Social change organizations operate in communities all over the United States but little has been written about the details of their operations From the Ground Up takes a close look at how social change organizations address challenges related to leadership staff development decision making resource needs and collaborations Carol Chetkovich and Frances Kunreuther both experienced nonprofit managers draw on their in depth interviews with leaders and staff members from sixteen diverse social change organizations to provide a detailed analysis of these groups and their activities They note that even working in isolation these organizations make important contributions to justice in their communities together they might form the base of a larger progressive movement for change

Middle East Robert A. Stebbins, 2017-07-05 Community involvement and leisure are rarely mentioned in mass media coverage of the Middle East and North Africa Yet leisure and community involvement form a part of life in the region and are becoming increasingly significant as modernization becomes pervasive This work seeks to examine how the interconnection of work and leisure operates in a culture far removed from North American or European traditions Robert A Stebbins argues that the Middle East is a region in the throes of a developmental crisis one of cultural underdevelopment He indicates that while leisure and community involvement may be labeled as largely trivial activities they in fact involve a nexus that crosses with the labor process Discussing activities as diverse as theater and falconry rotary clubs and brutal leisure such as acts of

terrorism and revolutionary violence Stebbins offers a variety sufficient enough to confirm that cultural development through leisure work and community involvement has been possible To provide the background for this argument Stebbins explains what community involvement is how it fosters cultural development and offers a look at contemporary leisure and work in a changing economic climate This is a unique look both at community involvement in the Middle East and how it has affected the cultural political and religious crisis The book concludes by proposing that a new view of work and leisure may serve to override social divisions and traditional impediments to cultural development
