Bowyer, James C. Green, 1988 **Imaging in High Energy Astronomy** L. Bassani, G. di Cocco, 2012-12-06 An almost complete collection of the papers given at the International Workshop on Imaging in High Energy Astronomy Anacapri Italy 1994 These proceedings which concentrate on imaging above 10 keV represent the state of the art in the field resulting from the success of many missions I C Granat and CGRO carrying detectors for high energy astronomy with imaging capabilities The main topics of the book are Bragg concentrators coded mask modulation collimators double Compton telescopes the occultation method tracking chambers and new experimental techniques The book also contains some papers dealing with image reconstruction and processing with an emphasis on the above techniques

Handbook of X-ray and Gamma-ray Astrophysics Cosimo Bambi, Andrea Santangelo, 2024-02-29 This book highlights a comprehensive coverage of X ray and Gamma ray astrophysics The first and the second parts discuss respectively X ray and Gamma ray experimental techniques and observatories The third part is devoted to science including galactic and extragalactic sources The fourth and last parts are dedicated to analysis techniques in X ray and Gamma ray astronomy spectral analysis imaging analysis timing analysis and polarimetric analysis Presenting the state of the art in X ray and gamma ray astronomy this is both a valuable book for students and an important reference resource for researchers in the field **Silver-Halide Recording Materials** Hans I. Bjelkhagen, 2013-06-29 Silver Halide Recording Materials gives a detailed analysis of the theory the characteristics the manufacturing and the processing methods of silver halide materials used for the recording of holograms Emphasis is placed on the selection of suitable silver halide materials for conventional as well as special holographic applications A detailed account of current developing and bleaching methods used in the production of silver halide holograms is given The author also supplies a large number of recipes for different types of processing baths The text is complemented by a comprehensive list of references which will facilitate further study The monograph will be suitable for courses in holography where the student possesses some background knowledge about the general holographic process and the holographic technique **Energy Research Abstracts**, 1992 **International**
