Great American Priorities:

The Great American Mission David Ekbladh, 2011-08-08 The Great American Mission traces how America's global modernization efforts during the twentieth century were a means to remake the world in its own image David Ekbladh shows that the emerging concept of modernization combined existing development ideas from the Depression He describes how ambitious New Deal programs like the Tennessee Valley Authority became symbols of American liberalism's ability to marshal the social sciences state planning civil society and technology to produce extensive social and economic change For proponents it became a valuable weapon to check the influence of menacing ideologies such as Fascism and Communism Modernization took on profound geopolitical importance as the United States grappled with these threats After World War II modernization remained a means to contain the growing influence of the Soviet Union Ekbladh demonstrates how U S led nation building efforts in global hot spots enlisting an array of nongovernmental groups and international organizations were a basic part of American strategy in the Cold War However a close connection to the Vietnam War and the upheavals of the 1960s would discredit modernization The end of the Cold War further obscured modernization's mission but many of its assumptions regained prominence after September 11 as the United States moved to contain new threats Using new sources and perspectives The Great American Mission offers new and challenging interpretations of America's ideological motivations and humanitarian responsibilities abroad

The 100 Greatest Americans of the 20th Century Peter Dreier, 2012-06-26 A chronological collection of brief biographies on important figures for social justice in American history including Franklin D Roosevelt Fannie Lou Hamer and Bob Dylan

How Do We Make the Greatest America Dok Kyu Pak, 2019-12-09 There is a crime and a social disorder in any nation's society But I hope the first class countries like America do not have that This book tries to cultivate conflicts disputes in the great America These are the result of redistributing social production cleansing political power and re arranging people's duties and rights Conflicts disputes reproduce and develop all human social cultural and economic values These raise awareness of human ethics and moral norms and challenge existing forms This challenge is human life force Conflicts disputes criticize social cultural artistic social order and values and seek higher values in all sectors Therefore this book wants to be positive romantic and future oriented Therefore there is a contention in this book that conflicts with American law tradition or social practice but it is motivated by conflict I have not escaped from the intention of building the great America under any circumstances Logical contradictions also have a productive purpose Because this book is dialectic

The Great American University Jonathan R Cole, 2010-01-12 Although America's universities have become the envy of the world for their creative energy and their production of transformative knowledge few understand how and why they have become preeminent This groundbreaking book traces the origins and the evolution of our great universities It shows how they grew out of sleepy

colleges at the turn of the twentieth century into powerful institutions that continue to generate new industries and advance our standard of living Far from inevitable this transformation was enabled by a highly competitive system that invested public tax dollars in university research and students while granting universities substantial autonomy Today America's universities face considerable threats Even greater than foreign competition are the threats from within the United States Under the Bush administration government increasingly imposed ideological constraints on the freedom of academic inquiry Restrictive visa policies instituted after 9 11 continue to discourage talented foreign graduate students from training in the United States The international financial crisis which has depleted university endowments and state investments in higher education threatens the vitality of some of our greatest institutions of higher learning In order to sustain and enhance the American tradition of excellence we must nurture this powerful yet underappreciated national resource **Speechwriting**

in Perspective Thomas H. Neale, Jean M. Bowers, 2003 Writing for the spoken word is a special discipline it requires that speechwriters products be written primarily although not exclusively to be heard not read Speeches are better cast in simple direct and often short sentences that can be easily understood by listeners Rhetorical devices such as repetition variation cadence and balance are available to and should be used by the speechwriter It is important for speechwriters to analyse audiences according to factors such as age gender culture profession and income level size of audience political affiliation if any and on the occasion for or purpose of the speech Most effective speeches do not exceed 20 minutes in length After researching a topic speechwriters must prepare an outline from which the speech will be developed They should strive to maintain a clear theme throughout the speech Most speeches will have a three part structure consisting of an introduction a body and a conclusion The accepted style of contemporary American public address is natural direct low key casual and conversational This puts the listeners at ease and promotes a sense of community between the audience and speaker Punctuation should reflect the sound structure of the speech reinforcing the rhythm and pace of actual speech Clarity of expression is as important a consideration in speech grammar as rigid adherence to the rules for written law This book presents the essentials of speechwriting Preface Speechwriting in Perspective A Brief Guide to Effective and Persuasive Communication Thomas H Neale Public Speaking and Speechwriting Selected References Jean M Bowers Index
