The Evolution of Luxury

Ian Malcolm Taplin, 2019-09-11 This book offers a unique analysis of how our definitions of luxury have changed over the ages and with that the role and actions of both suppliers and buyers of luxury products It traces the way luxury was seen as avarice and emblematic of morally corrosive behavior in past societies to being viewed in more virtuous terms as the inevitable outcome of structural changes that legitimize the acquisition and display of wealth It examines the origins of the shift from criticism to acceptance and traces these changes to fundamentally different notions of what constitutes the basis for social order Whereas pre industrial hierarchies cloaked inequality in various secular and sacred guises to mitigate its presence capitalism justified and reified inequality as a measure of individual success and initiative through interdependent market behavior The result of this transformation is that status markers have become aspirational tools as hierarchies became porous and self identity less ascriptive Correspondingly as demand for luxury became legitimized the supply side underwent dramatic changes Such changes are explored fully in the sectors of fashion art and wine As demand for high priced and scarce goods in each of these sectors has increased in each case key actors have manipulated markets to purposefully either consolidate their pre eminence or manufacture the requisite scarcity that affords them canonical status The demand for and supply of luxury goods is now global consumers seeking validation and affirmation of their status whilst producers engineer scarcity Luxury is seen not only as good it is virtuous its demand possibly insatiable and extremely profitable
