Grape Culture and Wine-Making in California George Husmann,2015-08-04 Excerpt from *Grape Culture and Wine Making in California* A Practical Manual for the Grape Grower and Wine Maker A book specially devoted to Grape Culture and Wine Making in California would seem to need no apology for its appearance however much the author may do so for undertaking the task California seems to him at least as the chosen land of the Lord the great Vineland and the industry now only in its first stages of development destined to overshadow all others It has already assumed dimensions within the short period of its existence hardly forty years that our European brethren can not believe it and a smile of incredulity comes to their lips when we speak of vineyards of several thousand acres with a product of millions of gallons per annum But while fully cognizant of the importance of these large enterprises it is not for their owners that this little volume is written specially The millionaire who is able to plant and maintain a vineyard of several thousand acres can and should provide the best and most scientific skill to manage his vineyard and his cellars it will be the wisest and most economical course for him he can afford to pay high salaries and the most costly wineries provided they are also practical would be a good investment for him We have thousands perhaps the large majority of our wine growers however who are comparatively poor men many of whom have to plant their vineyards nay even clear the land for them with their own hands make their first wine in a wooden shanty with a rough lever press and work their way up by slow degrees to that competence which they hope to gain by the sweat of their brow About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do

Vickers,2016-05-15 So You Think You Know California Wines is designed to simplify your understanding by identifying growing trends grape descriptions and the history of California wine production The edition profiles the 27 top wine grapes and principal growing regions The 81 page edition is idea for wine collectors winemakers and anyone who appreciates a world class California vintage The following are just fourteen from hundreds of little known facts about California wines and the 2015 grape harvest 1 Of California s 3 7 million tons of wine grapes harvested in 2015 the Central Valley growing region raised 73% and 70% of the white wine grapes California grows 17% more red wine grapes than white In 1976 the red grape ratio was two to one over whites 2 The Napa Valley accounted for only 4 5% of the red wine grapes and 2% of the white The Sonoma Marin region accounted for 5% of the red and 4 7% of the white wine grapes 3 The average value of Napa red wine grapes is over 10 1 2 times and for white grapes 6 1 2 times more than the Central Valley Sonoma Marin s regional red

grapes are valued over 6 1 2 times and for white grapes 5 1 2 times more 4 The California drought had a negligible effect on the Central Valley's 2015 grape yields as production nearly equaled their 2014 figures 5 Wine grape production yields declined dramatically in the Napa Valley 29 4% Sonoma Marin 28 8% Central Coast 28 8% and Monterey Valley regions 37 8% 6 Cabernet Sauvignon is the most lucratively priced wine grape in California and the second most cultivated Napa Valley grape growers concentrated 59% of their red grape production into Cabernet Sauvignon Its value is 14 times the Central Valley equivalent Yields declined 23 37% in the premium wine regions 7 During the 1976 harvest Chardonnay represented less than 2% of California's white wine grape production In the 2015 harvest Chardonnay was the state's largest grown grape accounting for 38% of the white wine grapes and over 16% of the overall harvest production 2105 yields were down 25 32% throughout premium wine regions 8 Juice Valuation is the elemental cost of grape juice contained in a bottle of wine excluding any related post harvest production expenses financing costs marketing expenses and or retail mark up The 2015 juice price on a bottle of Napa Valley Cabernet Sauvignon was 8 42 Zinfandel 4 71 Merlot 4 35 Pinot Noir 3 76 and Chardonnay 3 60 Within the Central Valley region the comparable juice prices average between 40 and 75 cents per bottle 9 During the 2015 harvest the wine grapes that experienced the greatest production increase from 2014 included Symphony Barbera Rubired Pinot Gris Muscat of Alexandria Burger and Petite Sirah 10 During the 2015 harvest the wine grapes that experienced the greatest production decrease from 2014 included Muscat Blanc Triplett Blanc Sauvignon Blanc Cabernet Franc Viognier Grenache Chenin Blanc and Syrah 11 Real Estate property values are the number one price determinant in the valuation of a grape's price Elevated land values in Napa and Sonoma County directly reflect the significantly appreciated grape values 12 Two of over thirty hybrid grapes introduced by University of California Davis viticulturist Dr Harold Olmo account for 17% of the overall red wine grape production 13 During the 1976 harvest six of the most popular California grapes were Carignan Grenache Barbera Ruby Cabernet French Colombard and Chenin Blanc Today only Rubired and French Colombard ranks in the top ten and both are used for blending or bulk wines 14 Production statistics become significant because planting decisions cannot be immediately adjusted Grapevines require three years after planting before yielding fruit and have an average lifespan of 27 years Many vines are replaced afterwards due to declining production yields and financial depreciation considerations
