Grapes Of Conflict:

Grapes of Conflict Sydney D. Smith, 1987 *Facilitating Deep Learning* Julian Hermida, 2014-07-01 Deep learning is a committed approach to learning. It is a process of constructing and interpreting new knowledge in light of prior cognitive structures and experiences which can be applied in new unfamiliar contexts. Deep learning produces learning that lasts a lifetime and it results in better quality learning and profound understanding. In contrast, surface learning involves a dispassionate approach to learning. The surface learner is not concerned with understanding. Information acquired is usually lost after examinations and there is no profound understanding or knowledge construction. Research studies show that most university and college students today take a surface approach to learning. The purpose of this book is to show readers how to create a learning environment that promotes deep learning in their classes. The book will do so by providing readers with the theoretical and pedagogical tools needed to understand the notion of deep learning, design and implement courses that encourage students to take a deep approach to learning, design engaging and innovative teaching and learning activities that encourage students to use higher order cognitive skills to construct knowledge and negotiate meaning, implement assessment tools aimed at facilitating the deep learning process, support international and other nontraditional students to construct learning deeply. The book begins with an examination of the big picture, the institutional constraints that hinder a culture of deep learning. From there, it deconstructs the concept of deep learning and examines every element of the deep learning process. It also discusses the factors that contribute to produce a deep learning environment. The rest of the chapters are about how to facilitate deep learning. The book examines every component of the teaching and learning system: goals, performances, and evaluation. It discusses strategies and methods that teachers can adopt to help students learn how to read and write in their disciplines in a deep way. The book also discusses the notion of inclusive deep learning environments which focus on engaging nontraditional students. Theories of Human Learning Guy R. Lefrançois, 2019-10-24 Mrs. Gribbin invites you to join her as she explores the changing landscape of learning theories and their implications. **Farm Workers and the Churches** Alan J. Watt, 2010-02-23 In the mid 1960s, the charismatic Cesar Chavez led members of California's La Causa movement in boycotting the grape harvest and melon pickers in South Texas called a strike against growers contesting unfair labor and wage practices in both states. In *Farm Workers and the Churches*, Alan J. Watt shows how the religious and social contexts of the farm workers, their leaders, and the larger society helped or hindered these two pivotal actions. Watt explores the ways in which liberal expressions of Northern Protestantism transplanted to California and combined with the pro-labor wing of the Catholic Church and the heritage of Mexican popular piety provided a fertile field for the growth of broad support for Chavez and his organizing efforts. Eventually, La Causa was able to achieve collective bargaining victories, including a historic labor contract between California agribusiness and farm workers. The movement did not fare as well in Texas, where the combination of a locally weak union leadership, a more conservative Southern Protestant ethos, and the strikebreaking

measures of the Texas Rangers all boded ill However a general Chicano a movement ultimately took permanent root in the state because of the workers struggle Watt offers a careful examination of the complex interactions among religious traditions social heritage and ethnicity as these factors affected the course and outcomes of these two pioneering campaigns undertaken by La Causa
