*B-29 Superfortress vs Ki-44 "Tojo"* Donald Nijboer,2017-10-19 By the time the Americans began their aerial bombardment of Japan in 1944 both the JAAF and IJNAF were spent forces What the Japanese did have though was the Ki 44 Tojo Armed with two 40 mm cannon it was the most heavily armed and feared single seat fighter to see action against the new American bomber the B 29 Superfortress For the bomber crews they had what they believed was their ace in hole a fully armed B 29 carried four remotely operated gun turrets and a tail gunner s position making it the world s most advanced self defending bomber In every respect the Ki 44 pilots were fighting a desperate battle Many who made their mark did so using suicidal ramming attacks or taiatari Illustrated with full colour artwork this volume examines why the Ki 44 was unable to break up bomber formations conventionally during the Pacific War and how its ramming tactics while terrifying graphically revealed Japan s inability to stop the B 29

*German Flak Defences vs Allied Heavy Bombers* Donald Nijboer,2019-10-31

Since the end of World War II the strategic bombing of Germany has inspired numerous studies countless books and several documentary films and it is not surprising With more than one million tons of bombs dropped close to 300 000 civilians killed 700 000 wounded and in excess of 3 500 000 industrial and residential structures destroyed the Allied bomber offensive was industrial war on a grand scale The air battle that raged over Germany has often been described as a battle between Allied and German fighters but what has been frequently missed by historians on all sides is the impact of German anti aircraft defences flak Though often dismissed as ineffective and a waste of valuable material and personnel the German flak arm made a major contribution to the defence of the Third Reich at least half of the American aircraft shot down over Germany fell to flak and according to the RAF Official History it was estimated that flak accounted for 1229 of 3302 aircraft lost by Bomber Command between 1942 and April 1945 Additionally the strategic role of flak extended beyond simply shooting down aircraft its other more important task was to force bombers to drop their ordnance sooner or from a higher altitude thus reducing bombing accuracy Both these roles are explored in depth in this detailed study of the German flak defences and of their adversaries the Allied heavy bombers Containing full colour illustrations including cockpit scenes and armament views this is the definitive guide to the much overlooked conflict between Allied planes and German anti aircraft defences **No 126 Wing RCAF** Donald Nijboer,2013-05-20 The success of No 126 Wing began before the D Day landings and through operations at Falaise Gap Operation Market Garden the winter offensive in the Ardennes and crossing the Rhine into Germany Donald Nijboer examines the wing s operations chapter by chapter demonstrating how the five squadrons of Spitfires of No 126 Wing were self sufficient in everything they did and how after the Normandy landings the ground forces could not move without this valuable support Squadron and ace biographies and stunning artwork bring this fascinating book to life **Carrier Strike** Donald Nijboer,2023-12-15 Among many other developments World War II saw naval warfare shift from the battleship to the aircraft carrier which remains one of the iconic weapons of the war and the core of modern battle fleets Developed in the 1920s and 1930s the aircraft carrier came into its own in World War II and featured prominently in numerous battles including the Coral Sea Midway Guadalcanal and Leyte Gulf Later in the war with many of its own carriers destroyed and its carrier borne air force crippled the Japanese relied on kamikazes to replace its aerial strike force and to attack the United States carrier force and the United States used its carriers to attack the Japanese homeland In this photo history Donald Nijboer traces the history of aircraft carriers from their early development just after World War I to the Japanese carrier borne attack on Pearl Harbor through the great battles of the Pacific War which featured some of military history s great ships the Yorktown the Enterprise the Hornet the Lexington and other vessels Special sections cover British carrier operations in the Indian and Pacific Oceans as well as the limited carrier operations of the German Navy including the Graf Zeppelin *Air & Space Smithsonian* ,2006-04 Operation Crossbow Allan Williams,2013-05-30 The story of the photographic intelligence work undertaken from a country house at Medmenham Buckinghamshire is one of the great lost

stories of the Second World War At its peak in 1944 almost 2 000 British and American men and women worked at the top secret Danesfield House interpreting photographs the majority stereoscopic so they could be viewed in 3D to unlock secrets of German military activity and weapons development Millions of aerial photographs were taken by Allied pilots flying unarmed modified Spitfires and Mosquitos on missions over Nazi Europe it was said that an aircraft could land the photographs be developed and initial interpretation completed within two hours marking the culmination of years of experiments in aerial intelligence techniques Their finest hour began in 1943 during the planning stages of the Allied invasion of Europe when Douglas Kendall who masterminded the interpretation work at Medmenham led the hunt for Hitler s secret weapons Operation Crossbow would grow from a handful of photographic interpreters to the creation of a hand picked team and came to involve interpreters from across the Medmenham spectrum including the team of aircraft specialists led by the redoubtable Constance Babington Smith In November that year whilst analysing photographs of Peenemunde in northern Germany they spotted a small stunted aircraft on a ramp This intelligence breakthrough linked the Nazi research station with a growing network of sites in northern France where ramps were being constructed aligned not only with London but targets throughout southern Britain Through the combined skill and dedication of the Crossbow team and the heroism of the Allied pilots throughout late 1943 and 1944 V weapon launch sites were located and through countermeasures destroyed saving hundreds of thousands of lives and changing the course of the war Operation Crossbow is a wonderful story of human endeavour and derring do told for the first time

**The Comic Art of War** Christina M. Knopf,2015-07-28 For military cartoonists the absurdity of war inspires a laugh or cry response and provides an endless source of un funny amusement Cartoons by hundreds of artists at arms from more than a dozen countries and spanning two centuries are included in this study the first to consider such a broad range of military comics War and military life are examined through the inside jokes of the men and women who served The author analyzes themes of culture hierarchy enemies and allies geography sexuality combat and civilian relations and describes how comics function within a community A number of artists included were known for their work with Disney Marvel Comics the New Yorker and Madison Avenue but many lesser known artists are recognized

*Air Combat 1945* Donald Nijboer,2015-09-15 The final year of World War II witnessed the decline of the piston engine fighter and the beginning of the jet age Taking to the skies were tried and true fighters improved versions of old aircraft and newly developed jets including prototypes that flew for the first time just before the war ended

**World War II Aerial Combat 1937 - 1945** Donald Nijboer,2025-09-15 Here for the first time is the story of the victorious the vanquished and the forgotten air forces that fought in the Second World War in more than 300 period photographs World War II would see the full potential of air power over the battlefield and oceans From mere appendages of the army and navy air forces became essential tools of destruction and critical for future battlefield and naval success The histories of air warfare during World War II have focused exclusively on the air forces of the major powers the United States Britain

Germany the Soviet Union and Japan What has been completely ignored is the forgotten men and machines that fought alongside the Allies and Axis air forces and there were many Some of these air forces even found themselves fighting for both sides at the same time Along with coverage of the major air powers World War II Aerial Combat 1937 1945 includes information rare photos and illustrations from the numerous small Allied and Axis air forces that left their mark This is the story of the forgotten air forces of Poland Belgium Norway Netherlands France Greece India China Yugoslavia Italy Romania Hungary Bulgaria Croatia Slovakia and Finland all of which fought with determination and some with great skill against overwhelming odds World War II Aerial Combat 1937 1945 fills an important gap in our knowledge of the Second World War and the history of aviation in the mid 20th century The Compact Timeline of Aviation History Anthony A. Evans, David Gibbons, 2008 The Compact Timeline of Aviation History encompasses the entire history of flight from the days of legends balloons and gliders to the latest high tech aircraft **Library Journal** Melvil Dewey, Richard Rogers Bowker, L.
