**Graphic Design in Educational Television** Beverley Clarke, 1974 **The Encyclopaedia of Educational Media Communications & Technology** NA NA, 2015-12-25 **Educational Media Technician, a Suggested Two-year Post High School Curriculum** United States. Office of Education, 1975 **Designing the BBC** Iain Macdonald, Paula Williams, 2025-02-06 *Designing the BBC* provides an insider perspective on the groundbreaking work of the BBC's Television Graphic Design Department from 1954-2005. Drawing on the unique holdings of the BBC Motion Graphics Archive and first hand perspectives of former BBC staff, this book provides a timely overview of over 50 years of the BBC's innovative practice and lasting impact in the field of television motion graphics. Taking a thematic approach, the volume considers the graphic design of a range of TV genres including household favourites such as *Doctor Who*, sports programming such as *Grandstand* and big sporting events like the Olympics, children's television including *Grange Hill*, popular science programmes such as *Tomorrow's World*, news output such as *The Nine O'Clock News*, Election Night specials, the weather and the channel identities of BBC 2. The book brings together BBC staff with leading scholars in design and television studies who investigate the Archive, bringing to life cultural memories and consider the Graphic Design Department's lasting impact both at the time and today. [Resources in Education](#), 1997 **Research in Education**, 1974 *Library of Congress Subject Headings* Library of Congress, 2010 **The Education of a Graphic Designer** Steven Heller, 2015-10-20. Revised and updated, this compelling collection of essays, interviews and course syllabi is the ideal tool to help teachers and students keep up in the rapidly changing field of graphic design. Top designers and educators talk theory, offer proposals, discuss a wide range of educational concerns such as theory versus practice, art versus commerce, and classicism versus postmodernism, and consider topics such as emerging markets, shifts in conventions, global impact, and social innovation. Building on the foundation of the original book, the new essays address how graphic design has changed into an information presenting, data visualization, and storytelling field rooted in art and technology. The forward thinking course syllabi are designed for the increasingly specialized needs of undergraduate and graduate students. Personal anecdotes from these designers about their own educations, their mentors, and their students make this an entertaining and illuminating idea book.
